# In transition to stronger growth

- TNP posted a soft 2Q22 net profit of THB34m (-4% q-q, -22% y-y), caused by lower purchasing power.
- We think TNP's NP is likely to rebound in 2H22-2023, driven by improving SSSG, branch expansions, and improving gross margin.
- Maintain BUY and our DCF-based TP of THB6.8.

## A small hiccup on rising costs

TNP posted a soft 2Q22 net profit of THB34m, down 4% q-q and 22% y-y, missing Bloomberg's consensus forecast by 3%. Revenue dipped to THB579m in 2Q22, down 2% q-q and 4% y-y due to lower SSSG at 12.3%, caused by lower purchasing power on the shortfall of the government's economic stimulus packages, particularly compared to 1Q21. However, TNP is now generating higher revenues from its seven new branches opened in 2021-1H22, in line with the company's growth plan to gradually offset the one-time revenue growth from the government's stimulus packages.

## Gross margin improved q-q on effective cost control

The 2Q22 gross margin improved q-q to 17.4%, up from 17% in 1Q21 but down from 17.9% in 2Q21 due to the lack of the one-time government stimulus packages. Cost of sales was at THB478m, down 2% q-q and 4% y-y, in line with the drop in revenue. Distribution costs and SG&A expenses rose to THB61m in 2Q22, up 4% q-q and 7% y-y due to higher logistics costs and higher personnel expenses related to the new branch expansion.

#### In the transition period to a new growth phase in 2H22-2023

After TNP's strong net profit in 1H21, driven mainly by the non-recurring positive impact of the government's packages, TNP is now in transition to generate more sustainable and higher margins and revenue growth from its growth strategies, which include 1) branch expansions by 3-5 branches annually to the markets where TNP has the strength to capture demand; and 2) cost control to reduce SG&A expenses and improve the gross and net margins.

## Maintain BUY; small but beautiful

We maintain BUY and our DCF-based TP of THB6.8. We think TNP's quarterly net profit has already bottomed in 2Q22 and is likely to rebound continuously in 2H22-2023, driven by improving SSSG, branch expansions, and an improving gross margin. TNP announced an interim dividend of THB0.035/share for its operations in 1H22, XD on 23 Aug-22, and we expect TNP to pay a higher dividend for its 2H22 operations as we expect its net profit to grow h-h on higher SSSG.

## RECOMMENDATION STRUCTURE

## Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
