## Slightly negative view from meeting

- The tone of the post-results meeting was slightly negative due to the potential for an increase in NPLs and ECL in 2H22.
- MTC is increasing its NPL ratio target to less than 2.5% this year and lowering its targeted coverage ratio to c100% due to the high inflation environment.
- Maintain BUY with our GGM-based TP of THB60.

### Post-2Q22 results meeting

MTC held its post-2Q22 results meeting with analysts on 11 August 2022. The tone of the meeting was slightly negative, in our view. Most questions were about asset quality.

### NPLs should continue to increase in 3Q22

MTC expects that its NPL ratio will continue to rise in 3Q22 due to the high inflation environment and the changing risk profile of its loan portfolio. Management expects an NPL ratio of less than 2.5% in 2022 (higher than its previous target of 2%). MTC's normal NPL ratio should be lower than 3%, according to management. MTC is targeting a coverage ratio of c100% in 2022, which is lower than its previous target of 120%. MTC will continue to accelerate its write-off process in 2H22, resulting in an expected high ECL level. In 2H22, MTC might increase the incentive fees for its staff to accelerate the debt collection process. But, it believes that the cost to income ratio should be in its target range of 47-49% (48% in 1H22). MTC reaffirms its 2022 loan growth target of 30-35% y-y due to strong demand from clients. Management has limited concern over competition.

### Share price likely to be under pressure in the short term

We have a slightly negative view from the analyst meeting. We think the market will continue to be concerned about the asset quality for both MTC and consumer finance. MTC's share price might be pressured in the short term. We think it might take two to three quarters to solve the asset quality problem.

### Maintain BUY with our 2023 GGM-based TP of THB60

With the potentially higher NPLs than expected, MTC should be able to deliver impressive loan growth. Therefore, we still see an insignificant downside risk to our net profit forecasts. We think the benefits from sacrificing its profit margin to gain more market share in the past two years should clearly manifest from 2H22 onward, potentially rewarding MTC with the most robust 2023 net profit growth among big auto title lenders at 23% y-y. We maintain our BUY call and our 2023 GGM-based TP of THB60.

**Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 10-Aug-2022 unless otherwise stated.

**RECOMMENDATION STRUCTURE****Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
