### IPPs led to strong 2Q22 results

RATCH's 2Q22 net profit (NP) was THB2.2b, up 39% y-y and 3.5% q-q on y-y higher earnings from independent power producers (IPPs) and an FX gain. 2Q22 core NP was THB2.2b, up 87% q-q but down 0.7% q-q, beating our forecast by 4% and BBG's consensus estimate by 13%. Share of profits from IPPs came to THB1.92b, up 62% q-q and 20% y-y on the higher q-q utilisation rate for the Hongsa power plant (HPC). There were additional earnings from the start-ups of two new small power producers (SPPs), including the 49%-owned NRES. Key points were: 1) equity NP from HPC of THB1.2b (including a THB0.1b FX gain), up 17% y-y; 2) THB81m equity income from its coal-fired power plant in Vietnam; 3) equity income from its hydropower plant Nam Ngum 2 at THB66m (-28% y-y); and 4) higher revenues from two wind farms, Yandin and Collector, in Australia following their full-quarter operations.

### Weaker SPP NPs offset by stronger NPs from IPPs

RG's revenue rose y-y on higher energy payments but saw 25% y-y lower availability payments, while revenue from RATCH-Australia (RAC) rose to THB1.4b (+63% y-y) due to the full-quarter operations of the two new wind farms, Yandin and Collector. RATCH Cogen (RCO) saw 52% higher y-y revenue of THB811m due to higher demand. RATCH's small power producers saw mixed NP results in 2Q22, including Berkprai (-THB3m y-y), Navanakorn Electricity (-THB55m y-y), and RW Cogen (-THB4m y-y) due to the higher gas cost.

### New capacity growth to continue

We expect RATCH's NP growth to rise in 2022-23, premised on 1) a high utilisation rate estimated at 85-90% for HPC; and 2) equity capacity growth (137MW) from two coal-fired power plants, Thang Long and Paiton, the Riau power plant in Indonesia (+146MW in Feb-22), NRER (Apr-22), and HKP in Thailand (+700MW estimated in 2024-25).

### Maintain BUY with overhang removal from capital increase

We maintain BUY and our SoTP-based TP of THB60. We think RATCH's share price has already bottomed out after its THB25b capital increase by issuing 769.23m new shares at THB34.48 in Jun-22 and is now likely to rerate, driven by stronger net profit growth momentum on new growth.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
