Impressive earnings in 2Q22

- AH reported a core profit in 2Q22 of THB281m (-31% q-q, +35% y-y), 32% higher than our expectation.
- AH's 1H22 earnings already account for 62% of our full-year forecast
- Maintain BUY with the same TP of THB29.50; remains our top pick.

Impressive earnings in 2Q22

AH's core profit in 2Q22 of THB281m (-31% q-q, +35% y-y) was 32% higher than our expectation. The company's reported net profit was flat at THB410m (+2% q-q, +64% y-y) thanks to a huge extra forex gain of THB129m due to the depreciation of the THB against the USD. The company's revenue was in line at THB6.1b (-9% q-q, 27% y-y), with the q-q decrease due to the auto industry low season. Auto parts manufacture and car dealership revenue grew by 24% y-y and 39% y-y, respectively. Share of profits from associates in 2Q22 surged to THB122m – the highest share of profits by quarter in the past two years thanks to the solid performance from Sakthi and Hyundai.

Outperformed the industry

AH's performance as an auto parts manufacturer in Thailand outperformed the industry, growing by 28% y-y in 2Q22, while car production in Thailand grew by only 3% thanks to the higher order volumes from major customers and new orders. AH's China operation was impacted by the Shanghai lockdown for almost a month, but its revenue fell only 2% y-y. Growth in its car dealership business in Thailand was driven by the new car showrooms of Mazda and MG. In Malaysia, the end of the government's Sales and Service Tax exemption in Jun-22 boosted the number of cars sold by 58% y-y in 2Q22. The company's GPM dropped slightly to 10.1% vs 11.1% in 1Q22 and 11.6% in 2Q21 due to 1) the low season; and 2) a higher revenue proportion from the low-margin car dealership business.

On track to post strong earnings growth in 2022

AH's 1H22 core earnings at THB687m (+33% y-y) account for 62% of our 2022 earnings forecast of THB1.1b. This boosts our confidence that AH's earnings should match or beat our expectation, despite the small downside risk from a potential global economic slowdown.

Maintain BUY with the same TP of THB29.50

AH's outlook remains solid. The company is on track to book its highest earnings in the past four years. Maintain BUY with the same 2023 TP of THB29.50 pegged to 8x P/E (+0.5SD of its mean). Note that the company announced an interim dividend of THB0.58 (30% payout), reflecting a 2.7% dividend yield.

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
