Solid earnings in 2Q22

- PLANB's core profit in 2Q22 surged to THB175m (+96% q-q), its highest quarterly earnings in the past two years.
- Although its outlook for 3Q22 remains unclear, we think PLANB's earnings should continue to grow in the long term.
- Maintain BUY with the same 2023 TP of THB7.60.

Highest quarterly earnings in the past two years

PLANB's reported core profit in 2Q22 at THB175m (+96% q-q) was its highest quarterly earnings in the past two years since the Covid outbreak began. Its earnings were higher than the Bloomberg consensus estimate and our expectation by 27% and 41%, respectively. The company's revenue reached an all-time high of THB1.6b (+35% q-q, +48% y-y) thanks to 1) the additional revenue from its investment in the 301 static billboards and 141 digital billboards of Aqua Corporation (AQUA TB, NR); 2) the better-than-expected utilisation rate of 57.3% on out-of-home media in 2Q22 vs 52.1% in 1Q22; and 3) revenue from the election campaign, BNK48 concerts, and other events that resumed after the easing of Covid-19 prevention measures.

Solid GPM

Despite the expectation that the additional revenue from AQUA should have a low margin – the company said AQUA's performance in this quarter was at break-even – PLANB's GPM, however, continued to rise to 28.8% vs 27.9% in 1Q21. The company continued to manage its expenses efficiently through operating process improvements. SG&A expense increased by 23% due to the added employee expense from the AQUA media acquisition. However, its SG&A to sales in 2Q22 at 12.6% was still lower than 1Q22 at 13.8%.

More upside from 'The Voice All Stars'

PLANB, and its subsidiary which has invested 80% of the cost of jointly producing "The Voice All Stars" TV program, has gained positive feedback from viewers with a hit TV rating of around 1.6 points. We think the show's success could generate additional earnings for the company of around THB10m this year, which represents a 2% upside risk to our full-year forecast. Moreover, PLANB still retains the right to renew the contract for co-producing the next season of "The Voice Thailand". We think this could be a way for PLANB to expand and diversify in the future as well as boost the artist management business of its subsidiary.

Maintain BUY with the same TP of THB7.60

PLANB's 1H22 earnings account for 46% of our full-year forecast. Although its outlook for 3Q22 remains unclear due to the uncertain economy, we think PLANB's earnings have bottomed and should grow long term. Maintain BUY with the same 2023 TP of THB7.60.

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
