Decent growth in TV rating

- We have a positive view on ONEE as its TV channel has continuously improved.
- Event business should be the key support catalyst in 2H22.
- Maintain BUY with the same 2023 TP of THB12.

Decent growth in TV rating is the key driver for the company

The TV rating of ONEE's channel, ONE31, has seen a continuous improvement since the beginning of the year. In Jul-22, its TV rating was at 0.686 vs 0.625 at the end of last year, compared to BEC World (BEC TB, BUY, TP THB15) whose TV rating declined from 1.078 to 0.975 in the same period. Management aims to boost its TV rating and aims to reach the third rank from its current fourth place among Thai TV channels by next year. We have a positive view on its past performance as well as its future. We believe the company has the potential to achieve its target because it has a lot of strong content that can capture the audience's interest. This should help the company to demand a higher advertising rate at the end of this year and next.

Event business should be the key support in 2H22

Management admits that although there are signs of a recovery in advertising expenditure (adex) for 2H22, it remains doubtful. The current economic situation in Thailand is very sensitive. However, the resumption of its event business in 2H22 with over 13 events in the pipeline, some of which have sold out already, should partially offset the weak outlook for adex.

Promising sign for the content business

ONEE has partnered with Netflix to broadcast one Thai movie in 4Q22. There are also three more pieces of content in the pipeline. Moreover, we think content licensing to over-the-top (OTT) platforms still has room to grow in 2H22 thanks to 1) more OTT players in the future; 2) ONEE should be able to demand a higher price thanks to its decent content; and 3) a larger amount of content to be sold in 2H22.

Maintain BUY with the same TP of THB12

Although earnings growth for this year may not look attractive, with a downside risk from economic pressure, we believe the current valuation of ONEE is very attractive. The company has ranked 96th on the SET100 in terms of share price performance in the past two months, reflecting that it is one of the most laggard plays on the SET100. We maintain our BUY call with our TP of THB12 at 27x 2023E P/E (-0.5SD of its mean). ONEE is now trading at only 21x 2023E P/E (-2SD of its mean).

Investment thesis

ONEE is a subsidiary of GMM Grammy (GRAMMY TB, NR). GRAMMY is the biggest music company in Thailand. The company owns ONE TV, currently the top-rated TV channel in Thailand. ONEE has strong content including traditional Thai dramas, sitcoms, series, and variety shows. Thanks to its strong content, we believe ONEE has an opportunity to sell its content to streaming platforms globally. With continued high demand for Thai content in both local and international markets, we think this should be the key driver for the company in 2022.

Company profile

A holding company which engages in media and entertainment business and is vertically integrated from being a content creator to owning offline and online distribution channels.

Catalysts

- High potential growth in its content business;
- The recovery in advertising expenditure.

Risks to our call

The key downside risks to our P/E-based TP are a lower-than-expected adex recovery and the company's worse-than-expected cost reduction.

2Q22 results were slightly better than expected

ONEE's earnings in 2Q22 grew to THB179m (-29% q-q, -32% y-y); 7% higher than our expectation thanks to other income. The company's revenue was in line with our expectation, falling by 5% q-q but growing by 7% y-y to THB1.49b. Revenues for every business unit were close to our expectation.

ONEE's operating cost was slightly better than expected. GPM in 2Q22 dipped to 44.2% vs 45.5% in 1Q22. Other income jumped to THB42m, the highest other income since we started collecting data in 2020. This was due to an FX gain of THB8m and the growth of Oshopping, the TV shopping business that gained more income by THB7m.

1H22's net profit dropped slightly to THB429m (-6% y-y), accounting for 48% of our full-year forecast. The company announced an interim dividend payment of THB0.12 per share (57% payout ratio).

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 18-Aug-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations
