THAILAND / INDUSTRIAL

BUY

Strengthening the OCC supply chain

- SCGP announced the acquisition of a 90.1% stake in Jordan Trading Inc., a trader of recovered paper based in New York.
- We are positive on this move as Jordan will further strengthen SCGP's procurement network for RCP.
- Maintain BUY and our target price of THB67.

Moving into the US OCC market

On 5 September 2022, SCGP announced the acquisition of a 90.1% stake in Jordan Trading Inc. (Jordan), a trader of recovered paper (RCP) based in New York, US. The transaction is worth USD1.98m (THB73m) and the remaining 9.9% stake will be held by its parent company Siam Cement (SCC TB, BUY)'s subsidiary, SCG International USA. SCGP will start to consolidate Jordan's financial results in September 2022 onward.

Strengthening the OCC procurement network

We are positive on this move as Jordan will further strengthen SCGP's procurement network for RCP, which is a key raw material cost for SCGP. Currently, SCGP secures its old corrugated containers (OCC) – a major type of RCP – from four sources, including local suppliers at 1.1mt (26% of total 4.3mtpa), its own recycling plants at 0.8mtpa (19%), partners at 0.4mtpa (10%), and imports at 2mtpa (45%). With Jordan and its recently acquired 100%-owned Peute Recycling B.V. – a packaging materials recycling company based in the Netherlands – we think SCGP is now strategically positioned to enhance its OCC network to reduce the OCC cost, particularly via American OCC imports, which SCGP imports at 0.6mtpa (30% of total imports). Of the remainder, 40% is imported from Europe and 30% is imported from Japan and Asia.

AOCC price drop to overshadow the coal cost rise

In the past four quarters, the price of American OCC (AOCC) has continued to decline from the peak of USD310/t in 3Q21 down to USD220/t in Jul-Aug 2022, widening the margin of the testliner paper price over the AOCC cost to USD265/t, up from USD165/t in 3Q21. We think the significant rise in the gross margin due to the sharp drop in the AOCC price should more than offset the rising coal cost, which is now hitting a record high at over USD460/t for the benchmark Newcastle coal price index as of 5 September 2022.

Time to relook

Maintain BUY and our target price of THB67, based on 16.1x 2023E EV/EBITDA. We think SCGP's share price has already priced in the worst case under the high costs of coal and AOCC, and is likely to rise to reflect its improving product margins on the structurally lower AOCC price.

TARGET PRICE THB67.00

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Company	Ticker	Price	Rating	Valuation & Risks
SCG Packaging	SCGP TB	THB 54.75	BUY	Downside risks to our EV/EBITDA-based TP include a lower-than-expected demand for packaging, rising raw material costs of recycled paper and higher energy costs.
Siam Cement	SCC TB	THB 357.00	BUY	Downside risks to our SOTP based TP include 1) a lower-than-expected demand for chemicals, CBM, and packaging; 2) rising coal costs for its cement and packaging units; and 3) weaker demand from the automobile industry that could erode the demand for SCC's chemical unit and its dividend contributions.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 02-Sep-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
