THAILAND / UTILITIES - CONVENTIONAL

Stepping into the US power market

- GULF announced the acquisition of a 49% stake in Jackson Generation LLC, a 1.2GW gas-fired power plant located in the US.
- This in line with GULF's strategic growth roadmap to penetrate the US power market via the strength of its partner J-POWER.
- Maintain BUY and our SoTP-based TP of THB60.

Moving into the US power market

On 9 September 2022, GULF announced the acquisition of a 49% stake in Jackson Generation LLC (Jackson), with an investment worth USD409.6m. It was acquired from J-POWER Jackson Partners, a subsidiary of J-POWER, GULF's long-time partner in a number of other power plant projects in Thailand and overseas. The transaction is expected to be completed by end-2022. We estimate the EIRR to be around 11%.

What is Jackson's asset?

Jackson is a 1.2GW gas-fired power plant located in Will County, Illinois, US, which commenced its commercial operation date in May 2022. Jackson sells its electricity to the Pennsylvania-New Jersey-Maryland Interconnection (PJM) grid, a regional transmission organisation with the highest reliability and electricity demand in the US, covering 13 states and the District of Columbia, according to GULF.

THB1.5b-3.5b annual net profit contribution starting in 1Q23

The acquisition of Jackson is in line with GULF's strategic growth roadmap to penetrate the US power market via the strength of its partner J-POWER, with the aim of owning low-emission, high-efficiency power assets. Financially, we estimate that GULF's 49% stake in Jackson would generate an annual net profit in the range of THB1.5b-THB3.5b, depending on the gas price. Under the assumption of a Henry Hub gas index (HH) price of USD5-9/mmbtu, Jackson would earn a net profit of THB1.5b at USD5/mmbtu or USD3.5b at USD9/mmbtu, thanks to Jackson's low heat rate of 6,400-6,800btu/kWh vs the PJM's average 9,500-11,500btu/kWh heat rate. With a higher HH price, larger gas cost savings would follow, with over 3,100btu/kWh heat-rate savings estimated, according to GULF's management.

More growth to come

Maintain BUY and our SoTP-TP of THB60. We think GULF is one of the most attractive power plays in Thailand given its strong and highly visible capacity growth outlook from both renewable and conventional power assets in Thailand (wind, solar, and waste-to-energy), Vietnam (wind, LNG-to-power), Laos (hydro), Europe (wind), and the US (gas-fired).

Disclaimer:

The disclosure of the survey results of the Thai Institute of Directors Association ('IOD") regarding corporate governance is made pursuant to the policy of the Office of the Securities and Exchange Commission. The survey of the IOD is based on the information of a company listed on the Stock Exchange of Thailand and the Market for Alternative Investment disclosed to the public and able to be accessed by a general public investor. The result, therefore, is from the perspective of a third party. It is not an evaluation of operation and is not based on inside information.

The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey results may be changed after that date. FSS International Investment Advisory Company Limited does not confirm nor certify the accuracy of such survey results.

Level Certified

This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.

Declared This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 09-Sep-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
