## Car and motorcycle hire purchase: regulatory shakeup

- OCPB might implement rate caps on car and motorcycle hire purchases.
- NCAP would likely be the most negatively affected, followed by SAWAD and MICRO. The negative impact on MTC and SAK would be more limited, in our view. Meanwhile, most banks would likely not be affected by this potential new mandate.
- Maintain Overweight recommendation for banks and diversified financials.

### OCPB might take control of car and motorcycle hire purchase contracts

According to the local Thansettakij newspaper, the Office of the Consumer Protection Board (OCPB) will take control of hire purchase (HP) contracts for motorcycles and cars instead of the Bank of Thailand (BoT). To recap, the BoT held a public hearing regarding the control of HP during 15-31 Aug-22. The news said that the OCPB might implement 1) rate caps for new cars/used cars/motorcycles at 10%/15%/23%, respectively; 2) interest savings for clients from early prepayments at 60% for debtors who repay debts of not less than one-third and at 70% for debtors who repay debts from one-third to two-thirds; and 3) in the case of car seizures – if there is a deficit from the car auction, operators would only be able to further ask for the principal portion. The measures would potentially be effective in early 2023.

### Motorcycle hire purchase would be the most negatively affected

We read the potential new measures as negative for the HP industry, especially for motorcycle HP (MHP). We think that MHP operators would see the largest negative impact as the potential 23% rate cap is far below the current market rate of 30-35%. In order to minimise the negative impact, MHP operators might need to 1) increase credit underwriting; 2) reduce commissions paid to dealers; and 3) increase motorbike selling prices.

### Negative impact on diversified financials; limited impact on banks

Among diversified financials under our coverage, there are five companies that would be affected by the mandates. We think NCAP would be the most negatively affected, followed by SAWAD and MICRO, as their rate charges are 30-35%. Currently, 100%/23%/1% of NCAP/SAWAD/MICRO's portfolios are MHP. As for MTC and SAK, their rate charges are around 22-24%. Thus, the impact would be more limited. For the banking sector, most covered banks' rate charges are lower than the potential rate cap, except for TISCO, whose MHP makes up 2% of total loans. Thus, we see an insignificant impact on banks.

### Maintain Overweight for banks and diversified financials

We maintain our Overweight view on the banking sector. We believe banks would be minimally affected by the potential HP mandates. Our top picks are KTB and BBL. We also maintain our Overweight call on diversified financials with a selective Buy strategy. Our most preferred by order are JMT, SINGER, MTC and THANI. JMT, SINGER and THANI should not be affected by the mandates. MTC might face tighter competition. However, as MHP contributes only 5% of its portfolio, we think it would be able to manage the impact.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
