# Moderna write-off to hit 3Q22

- Expect BCH to book a net loss of THB0.4b, mainly due to the Moderna vaccine write-off.
- Opportunity to accumulate stock as it trades at a cheap valuation, while non-Covid revenue has significantly improved from pre-Covid.
- Maintain BUY with a lower DCF-TP of THB26/shr.

# 3Q22 revenue should drop by 34% q-q

We estimate Covid-related revenue to drop by 70% q-q and account for 26% of total revenue in 3Q22 (vs 56% in 2Q22). However, non-Covid cash patient revenue, both Thai and international, should grow by 16% q-q due to the high healthcare season (rainy season). Social Security Office (SSO) revenue should also grow by 1% q-q, led by a larger SSO registered member base (1.0m in 3Q22 vs 976k in 2Q22).

### Booking entire provision of Moderna up to THB1.1b in 3Q22

BCH will book a provision expense totalling cTHB1.1b for the second lot of Moderna vaccines consisting of c1.1m doses in 3Q22. The rationale to book a provision is conservative accounting. The second lot of Moderna vaccines should expire in March 2023. If BCH can sell vaccines after booking the provision, it would be recorded as bad debt recovery later. As a result, we expect BCH to post a loss of THB0.4b in 3Q22. Excluding provision expenses, BCH would book a 3Q22E core profit of THB0.6b.

#### Non-Covid operations have exceeded pre-Covid level by 10-15%

BCH's share price has plunged 15% over the past three months and underperformed the SET by 12% on market concerns over the Moderna vaccine write-off. The decision to book a provision should remove the market overhang and provide an opportunity to buy the stock after the 3Q22 results announcement. We believe the bad news has already been priced in, given that it is a one-off and implies only cTHB0.44/shr. We suggest investors focus on organic operations (non-Covid), which have significantly improved vs the pre-Covid level. Cash patient revenue should exceed pre-Covid by 15%, while the SSO member base is larger than the pre-Covid level by 14% (1.0m in 3Q22 vs 877k in 2019).

## Revise down 2022E earnings, but maintain 2023-24E

We revise down our 2022E earnings by 31%, mainly due to the Moderna write-off. However, we maintain our 2023-24E and derive a new TP of THB26/shr. BCH trades at an undemanding 22x 2023E P/E, lower than its peers' average of 33.5x and 5-yr average of 31.9x. This is unjustified in our view, as its 2023E core profit should exceed the pre-Covid level by 72% (vs peers' 61%). We believe the market will turn its attention to BCH once the Covid revenue decline stabilises, around 4Q22-1Q23.

#### Investment thesis

BCH is the leading service provider under the Social Security Office (SSO) scheme with a 5% market share. It will likely be the hospital that benefits the most from Covid-19 services, including screening services and treatment services for Covid patients.

After Covid-19 subsides, the World Medical Hospital (WMC) should continue to capture the rising demand from medical tourists. Currently, 50% of WMC's revenue is derived from international patients, especially Middle Eastern patients. The recovery of that patient segment should start in 2022.

BCH opened three new hospitals in 2020-21. We see Covid-19 as the driver for its new hospitals to turn around earlier than expected due to the influx of Covid patients, some of which could convert to regular patients in the future.

# Company profile

The company operates its business as a group, providing healthcare services for both cash patients and patients under the social security scheme.

## **Catalysts**

Key growth drivers include 1) more SSO registered members; 2) rising demand from medical tourists; and 3) an improving EBITDA margin led by new hospitals

#### Risks to our call

Downside risks to our DCF-based target price include 1) a slowdown in international patients due to economic concerns, political protests or floods; 2) regulatory risks from drug prices and medical bill controls; and 3) SSO provision expenses following a limited SSO budget.

#### Earnings sensitivity

- For every 1% increase in patient volume, we project 2023 earnings would rise by 2%, and vice versa, all else being equal.
- For every 1% increase in EBITDA margin, we project 2023 earnings would rise by 5%, and vice versa, all else being equal.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 21-Oct-2022 unless otherwise stated.

#### RECOMMENDATION STRUCTURE

#### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
