## Expect unattractive 3Q22 results

- We expect only a small recovery in SAT's 3Q22 core earnings to THB232m (+11% q-q, +9% y-y).
- Car production industry in 3Q22 has had a solid recovery, but SAT is facing a slowdown in 1) Kubota tractors; and 2) higher expenses.
- Maintain HOLD with a new TP of THB22 from THB19.50.

TARGET PRICE	THB22.00

## Expect unattractive 3Q22 results

We expect SAT's core earnings in 3Q22 to recover by 11% q-q and 9% y-y to THB232m, thanks to a recovery in both revenue and GPM. However, the recovery momentum should be lower than the industry and its peers due to the slowdown in tractor production volume in 3Q22 to around 20k units vs 27k units in the previous quarter, despite the revenue from auto parts potentially being in line with the industry. We estimate that this would result in SAT's total revenue growing to only 7% q-q and 12% y-y to THB2,250m vs Thailand's total car production that grew 27% q-q and 35% y-y in 3Q22.

## Expect GPM to stay at a low level until the end of this year

We expect SAT's GPM to improve in 3Q22 to 18% vs 17.6% in 2Q22, thanks to the steel price that has become more stable in 3Q22 and higher utilisation from higher revenue. However, the company admits that in 4Q22 its GPM should be pressured by 1) the steel price which has started to increase again; and 2) a higher electricity cost, which contributes about 6-7% of its operating costs. Therefore, we may not see a continuous improvement in SAT's GPM in 4Q22.

## Unexciting catalyst

Despite there being better signs of improvement in Thailand's car production outlook for this year and next, SAT still has a key uncertainty in its outlook, specifically the steel price which has pressured its GPM to below its average since 3Q21. The company admits that it is still unable to foresee the trend of the steel price, but expects it to be better starting from 2Q23 onward. Moreover, we also think that SAT has an unexciting earnings outlook in both 3Q and 4Q this year. The only key investment highlight for the company is its expected dividend yield at over 7% p.a.

## Maintain HOLD with a new TP of THB22

Although we increase our 2023 TP from THB19.50 to THB22 – pegged to 9x 2023E P/E (its mean P/E) from 8x – with the rising steel price pressuring SAT's GPM, we maintain our HOLD recommendation. We prefer Aapico Hitech (AH TB, BUY, TP THB35.50) over SAT as it has a better earnings growth outlook and higher upside, in our view.

## Investment thesis

SAT is the largest producer of axle shafts (76% market share), which are used in the manufacturing of one-tonne pickup trucks and large commercial cars.

SAT is the safest company in the automotive sector, in our view, as it has no debt and holds more than THB2.5b in cash, equal to THB6 per share. The company has a solid earnings outlook, as Thailand's automobile manufacturing industry is one of the largest drivers of the country's economy. The demand for new cars in Thailand has consistently remained at 0.8m-1m units per year, according to historical data. Therefore, when the economy returns to normal, we expect Thailand's automobile production volume to also return to its normal level in 2023, which would directly benefit SAT.

## Company profile

SAT manufactures parts for the motor vehicle industry. These parts are for: passenger cars, pickup trucks, and the agricultural industry. Its major customers are original equipment manufacturers (OEMs) on long-term purchase contracts, as well as the replacement equipment manufacturer (REM) segment.

[www.satpcl.co.th](http://www.satpcl.co.th)

## Principal activities (revenue, 2021)

■ Auto - 75.0 % ■ Non-auto - 25.0 %

Source: Somboon Advance Technology

## Major shareholders

■ Kitapanich Family - 44.0 %  
 ■ Thai NVDR - 7.7 %  
 ■ NORTRUST NOMINEES - 3.6 %  
 ■ Others - 44.6 %

Source: Somboon Advance Technology

## Catalysts

- The expectation that its earnings should reach another all-time high for 2023;
- Solid dividend yield track record at 5-7% p.a.

## Risks to our call

The key downside and upside risks to our P/E-based TP are the domestic car manufacturing industry recovering slower or faster than expected, a faster-than-expected adoption rate for electric vehicles in Thailand, higher raw material prices, and worse global demand for pickup trucks.

## Event calendar

Date	Event
Nov-22	3Q22 results announcement

## Key assumptions

	2021	2022E	2023E	2024E
Car production growth (%)	18	(0.1)	4.1	6.2
Kubota tractor growth (%)	43	(6)	5	5

Source: FSSIA estimates

## Earnings sensitivity

- For every 1% increase in auto parts revenue, we project 2023 earnings to rise by 0.5%, and vice versa, all else being equal.
- For every 1 bp increase in gross profit margin, we project 2023 earnings to rise by 1.4%, and vice versa, all else being equal.

**Disclaimer:**

The disclosure of the survey results of the Thai Institute of Directors Association ("IOD") regarding corporate governance is made pursuant to the policy of the Office of the Securities and Exchange Commission. The survey of the IOD is based on the information of a company listed on the Stock Exchange of Thailand and the Market for Alternative Investment disclosed to the public and able to be accessed by a general public investor. The result, therefore, is from the perspective of a third party. It is not an evaluation of operation and is not based on inside information.

The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey results may be changed after that date. FSS International Investment Advisory Company Limited does not confirm nor certify the accuracy of such survey results.

\* CGR scoring should be considered with news regarding wrong doing of the company or director or executive of the company such unfair practice on securities trading, fraud, and corruption SEC imposed a civil sanction against insider trading of director and executive

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Somboon Advance Technology	SAT TB	THB 21.40	HOLD	The key downside and upside risks to our P/E-based TP are the domestic car manufacturing industry recovering slower or faster than expected, a faster-than-expected adoption rate for electric vehicles in Thailand, higher raw material prices, and worse global demand for pickup trucks.
AAPICO Hitech	AH TB	THB 30.25	BUY	Key downside risks to our P/E-derived TP include lower-than-expected car production volumes and lower car sales in both Thailand and Malaysia, higher steel prices, semiconductor shortages, and exchange rate risk.

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 27-Oct-2022 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
