## Strong growth potential, but priced in

- KCC reported a weak 3Q22 net profit of THB9m (-31% y-y, -80% q-q), pressured by slower cash collection, higher ECL, and higher interest expenses.
- We expect its 4Q22 net profit to resume growth mode, as we think the company should start to benefit from its aggressive NPL acquisitions in 2Q22.
- We maintain our HOLD call with a GGM-based TP of THB7.1.

### 3Q22 net profit missed on cash collection

KCC posted a weak 3Q22 net profit of THB9m (-31% y-y, -80% q-q), which was slightly lower than our expectation of THB14m due to lower-than-expected cash collection. Its 9M22 net profit accounts for 73% of our 2022 net profit forecast.

### Slow cash collection led to soft 3Q22 performance

KCC's soft operations were due to three reasons. First, its cash collection was lower q-q at THB32m from THB158m in 2Q22 from the absence of big-plot corporate NPL deals and large housing NPL sales. Second, its ECL increased y-y and q-q as most of its interest income came from new portfolios, for which the company has not yet provided debt restructuring. Third, its interest expenses rose y-y from a rise in its interest bearing debt and the interest rate uptrend environment. As for its NPL acquisitions, KCC still purchased new NPLs aggressively, totalling THB180m. The accumulated 9M22 NPL acquisitions amounted to THB720m compared to its 2022 target of THB800m.

### Expect stronger earnings growth in 4Q22

KCC has accelerated its asset acquisitions since 2Q22 after receiving new funds from its IPO to expand its business. After four to six months of acquisitions, we think the company will start to have a higher cash collection rate in 4Q22. On top of that, we think KCC will continuously purchase NPLs in 4Q22. Therefore, we expect KCC's 4Q22 net profit to rise y-y and q-q.

### Maintain HOLD with a 2023 GGM-based TP of THB7.1

Although we still like KCC in terms of its outstanding net profit growth potential, expected at a three-year CAGR of 52% in 2022-24, we think its current valuation is very demanding. Accordingly, we maintain our HOLD recommendation with an unchanged GGM-based TP of THB7.1.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
