Softer earnings anticipated in 4Q22

- We expect SAT's core earnings in 4Q22 at THB204m (-4% q-q, +7% y-y) due to a slowdown in revenue and higher costs.
- Still waiting for improvement in its GPM in 2Q23.
- Maintain HOLD with a TP of THB22. The high dividend yield of almost 7% p.a. should be the key support for its share price.

Expect softer 4Q22 results

We expect SAT's core earnings in 4Q22 to soften q-q to THB204m (-4% q-q, +7% y-y). The company's revenue should dip by 3% q-q and 5% y-y to THB2.2b due to a significant decline of almost 20% in Kubota tractor production volume, despite an increase in auto parts revenue that was in line with Thailand's car production volume growth of 5% q-q. On the cost side, the full recognition of the higher electricity cost that came into effect in Sep-22 and higher steel prices continue to pressure the company's GPM, which should dip to 18% vs 18.3% in 3Q22. Note that the company should recognise an FX loss of about THB12m in 4Q22 due to the fast appreciation of the THB.

STRON has started its operation but should have no impact yet

STRON, a subsidiary in which SAT holds a 60% share, partnered with Tron Energy Technology, a Taiwanese company with a high-tech system for assembling electric vehicles and automation, has started producing e-tuk-tuks and minibuses. However, the current production volumes remain small and have not generated a profit for the company. This could result in a hiccup for SAT's performance in 1H23 as STRON could record a small loss during the early stage of production.

Keep an eye on 2Q23

The company believes that it has finally caught up with rising steel prices and will be able to pass the increased costs through to its customers in 2Q23 after bearing it for over a year, now that the price of the steel that SAT uses has finally stabilised at the beginning of this year. Note that although revenue is projected to hit an all-time high in 2022, SAT expects its GPM to be stuck at only c18%, lower than its 2018/19 GPM at 18.5%. Therefore, we believe that SAT should see its GPM for this year improve to 18.4%, which should be another key driver for the company's earnings.

Maintain HOLD with the same TP of THB22

We believe that SAT's performance in 2Q23 will be the key to predicting its earnings growth in 2023. Therefore, despite expecting an unattractive earnings result in 4Q22, we still maintain our HOLD recommendation and TP of THB22 as we wait for signs of a clear improvement in its GPM. Although the company's growth outlook remains unclear, the company still offers a rich dividend yield that we expect to stay at c7% p.a.

Investment thesis

SAT is the largest producer of axle shafts (76% market share), which are used in the manufacture of one-tonne pickup trucks and large commercial cars.

SAT is the safest company in the automotive sector, in our view, as it has no debt and holds more than THB2.5b in cash, equal to THB6 per share. The company has a solid earnings outlook as Thailand's automobile manufacturing industry is one of the largest drivers of the country's economy. The demand for new cars in Thailand has consistently remained at 0.8m-1m units per year, according to historical data. Therefore, when the economy returns to normal, we expect Thailand's automobile production volume to also return to its normal level in 2022, which would directly benefit SAT.

Company profile

SAT manufactures parts for the motor vehicle industry. These parts are for: passenger cars, pickup trucks, and the agricultural industry. Its major customers are original equipment manufacturers (OEMs) on long-term purchase contracts, as well as the replacement equipment manufacturer (REM) segment.

Major shareholders

Source: Somboon Advance Technology

Catalysts

- The expectation that its earnings should reach another all-time high for 2023;
- Solid dividend yield track record at 5%-7% p.a.

Risks to our call

The key downside and upside risks to our P/E-based TP are the domestic car manufacturing industry recovering slower or faster than expected, a faster-than-expected adoption rate for electric vehicles in Thailand, higher raw material prices, and worse global demand for pickup trucks.

Earnings sensitivity

- For every 1% increase in auto parts revenue, we project 2023 earnings to rise by 0.5%, and vice versa, all else being equal.
- For every 1 bp increase in gross profit margin, we project 2023 earnings to rise by 1.4%, and vice versa, all else being equal.

Disclaimer:

The disclosure of the survey results of the Thai Institute of Directors Association ("IOD") regarding corporate governance is made pursuant to the policy of the Office of the Securities and Exchange Commission. The survey of the IOD is based on the information of a company listed on the Stock Exchange of Thailand and the Market for Alternative Investment disclosed to the public and able to be accessed by a general public investor. The result, therefore, is from the perspective of a third party. It is not an evaluation of operation and is not based on inside information.

The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey results may be changed after that date. FSS International Investment Advisory Company Limited does not confirm nor certify the accuracy of such survey results.

* CGR scoring should be considered with news regarding wrong doing of the company or director or executive of the company such unfair practice on securities trading, fraud, and corruption SEC imposed a civil sanction against insider trading of director and executive

Level

Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Naruedom Mujjalinkool started covering this stock from 01-Oct-2020

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Somboon Advance Technology	SAT TB	THB 21.50	HOLD	The key downside and upside risks to our P/E-based TP are the domestic car manufacturing industry recovering slower or faster than expected, a faster-than-expected adoption rate for electric vehicles in Thailand, higher raw material prices, and worse global demand for pickup trucks.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finasia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finasia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 1-Feb-2023 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
