GFPT: ผู้ประกอบธุรกิจสัตว์ปีกครบวงจร

GFPT ประกอบธุรกิจสัตว์ปีกอย่างครบวงจร ตั้งแต่การผลิตอาหารสัตว์ การทำฟาร์ม การแปรรูป และการแปรรูปอาหาร บริษัทฯ ผลิตและจัดจำหน่ายสินค้าทั้งภายใต้แบรนด์ตัวเองและของลูกค้าสำหรับตลาดทั้งในและต่างประเทศ กลุ่ม GFPT มีขนาดใหญ่เป็นอันดับ 2 ของประเทศในด้านการส่งออกไก่และอันดับ 8 ในด้านการผลิตโดยมีส่วนแบ่งตลาดคิดเป็น 13% และ 5% ของตลาดรวมตามลำดับ

ราคาหุ้น 4Q22 จะลดลง q-q

ราคาหุ้น 4Q22 ที่ 459 ลบ. (-33% q-q, +747% y-y) กำไรน่าจะลดลง q-q ตามปัจจัยด้านฤดูกาล อย่างไรก็ตาม เราคิดว่าราคาหุ้น 4Q22 จะเป็นกำไรไตรมาสที่ทำจุดสูงสุดใหม่ ราคาหุ้นที่โตสูง y-y มาจากฐานที่ต่ำ ราคาปริมาณส่งออกไก่ใน 4Q22 ที่ 8,500 ตัน (-3.4% q-q, +13.3% y-y) จากการฟื้นตัวในตลาดญี่ปุ่นและปัญหาการขาดแคลนตู้บรรทุกสินค้าที่คลี่คลาย อย่างไรก็ตาม แม้อัตราการขึ้นราคาจะสูงก่อนโควิดอย่างมาก แต่จะถูกลดลงด้วยรายได้ที่ลดลงและค่าใช้จ่ายที่สูงขึ้น ด้วยเหตุนี้จึงกล่าวได้ว่าส่วนกำไรจากการขายและบริหารต่อยอดขายอาจเพิ่มเป็น 9.5% ใน 4Q22 (เทียบกับ 8.8% ใน 4Q21) หากกำไร 4Q22 ออกมาตามคาด ราคาหุ้น 2022 จะทำสถิติสูงสุดเป็นประวัติการณ์ที่ 2.05 พัน ลบ. (+9.8x y-y)

กำไรปี 2023 อาจลดลงแต่ยังสูงกว่าระดับก่อนโควิด

เรามองการเติบโตของปริมาณส่งออกในปี 2023 เป็นบวกจากการบริโภคในญี่ปุ่นและจีนที่ฟื้นตัวและกำลังการผลิตใหม่ของ GFPT อย่างไรก็ตาม เราคาดว่าแนวโน้มราคาไก่จะมีความระมัดระวัง โดยคาดว่าราคาไก่จะลดลงในปี 2023 เราคิดว่าสถานการณ์โรคระบาด ASF กำลังดีขึ้น ในขณะที่อุปทานไก่มีชีวิตก็ปรับขึ้นมาตั้งแต่ปีที่แล้ว ด้วยเหตุนี้จึงกล่าวได้ว่าราคาไก่ในประเทศไทยปี 2023 ที่ 40 บาทต่อ กก. (เทียบกับ 42.2 บาทในปี 2022) นอกจากนี้ราคาส่งออกในปี 2023 ยังอาจลดลงประมาณ 5%-10% y-y จากลูกค้าในสหภาพยุโรปที่ต่อราคาลง นอกจากนี้ต้นทุนวัตถุดิบจะทรงตัวในระดับสูง ราคาหุ้นปี 2023 ที่ 1.68 พัน ลบ. (-18% y-y) แม้อัตราการขึ้นราคาจะสูงก่อนโควิดอย่างมาก แต่ยังมีมูลค่าที่น่าสนใจ

แนะนำซื้อจากระดับการประเมินมูลค่าที่น่าสนใจ

เราเริ่มด้วยคำแนะนำซื้อที่ราคาเป้าหมาย 18 บาท ราคาตั้งกล่าวคิดเป็น 13x ของค่า 2023E P/E ซึ่งเป็นค่าเฉลี่ย 5 ปีย้อนหลัง ราคาหุ้นของ GFPT ปรับตัวลดลง 15% ในปี 2022 จากความกังวลของนักลงทุนเกี่ยวกับราคาไก่ซึ่งอาจผ่านจุดสูงสุดไปแล้วในปี 2022 ปัจจุบันหุ้นมีการซื้อขายที่เพียง 10x ของค่า 2023E P/E

บทวิเคราะห์ฉบับนี้แปลมาจากต้นฉบับภาษาอังกฤษ ที่ออกรายงานเมื่อวันที่ 3 กุมภาพันธ์ 2023

Investment thesis

GFPT focuses on organic growth through expanding its processed chicken capacity along with its vertically integrated chicken production. Backward integration starts from the expansion of grandparent chicken farms, parent chickens, and broiler farms. In the next 1-2 years, GFPT plans to expand a new chicken processing line by setting up new slaughterhouses with a 100% capacity increase to 300,000 tonnes/year. We have a positive view on the 2023 chicken export recovery from the low base last year. Although we estimate that the THB/USD exchange rate will strengthen to THB33 from THB35 in 2022, GFPT should see a limited impact from a stronger THB due to fully natural hedging. In addition, we think GFPT's share price is inexpensive, trading at only 10x 2023E P/E, below its five-year historical average.

Company profile

GFPT operates a vertical, fully integrated poultry business covering feed production, grandparent farms, breeder farms, broiler farms, the production and distribution of chicken meat, cooked chicken products, and other chicken-related products under its own and customers' brands for both domestic and export markets. In 2022, GFPT had a chicken processing capacity of 150,000 tonnes/year and a cooked chicken product capacity of 30,000 tonnes/year.

Major shareholders

Source: GFPT

Catalysts

Potential catalysts for GFPT's earnings growth in 2023 are 1) revenue growth driven by a chicken export recovery; 2) a higher-than-expected chicken price; and 3) declining raw material costs.

Risks to our call

Downside risks to our P/E-based TP include 1) a slower-than-expected consumption recovery; 2) high volatility in chicken and raw material prices; 3) a stronger THB than expected; and 4) a minimum wage increase and/or a labour shortage.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2023 net profit to rise by 0.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2023 net profit to rise by 4.1%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A, we estimate 2023 net profit to fall by 3.8%, and vice versa, all else being equal.

Source: FSSIA estimates

Integrated poultry company

GFPT was established in 1981 and became a public limited company in 1994. The company and its subsidiaries' core businesses cover agriculture, livestock, and food processing. GFPT operates an integrated poultry business. Its vertical, fully integrated chicken production consists of feed production, integrated farm operations, further processing, and food processing. GFPT produces and distributes frozen chicken meat and processed chicken and its by-products under its own and customers' brands for both domestic and overseas markets.

The company invested in a 49% stake in McKey Food Services (Thailand) to produce and distribute frozen semi-finished foods in 1993. In 2008, GFPT invested in a 49% stake in a joint venture with Nichirei Foods called GFN to operate a chicken processing plant and a further processing factory to export products to Japan and international markets. The revenue proportion from selling live broiler and chicken parts to GFN and McKey in 2021 accounted for 25% and 12%, respectively, of GFPT's total revenue.

Exhibit 1: Total revenue breakdown in 2021 by business segment

Source: GFPT

Exhibit 2: Total revenue breakdown in 2021

Source: GFPT

Its operations can be divided into three business segments, which are as follows:

1. Food segment (52% of 2021 total revenue)

GFPT is primarily engaged in the production, processing, marketing, and distribution of fresh, frozen, and fully-cooked chicken meat products for retailers, wholesalers, and food service businesses in Thailand and other international markets. The company's products are fully-cooked chicken products and fresh chicken meat.

- GFPT exports its fully-cooked chicken products and frozen chicken parts to Japan, England, the EU, China, and other countries. In 2021, its export revenue accounted for 22% of total revenue.
- The company also sells live broilers to its two subsidiaries, GFN and McKey, which produce ready-to-eat or semi-finished food for export. This revenue category is considered as indirect exports, accounting for 13% of total revenue.
- For the domestic market, fresh chicken parts are marketed domestically to food retailers, food wholesalers, food service distributors, restaurants, and modern trade businesses. In 2021, its domestic revenue accounted for 12% of total revenue.

Exhibit 3: Revenue breakdown by destination in 2021

Source: GFPT

Exhibit 4: Export revenue breakdown by country in 2021

Source: GFPT

2. Farm segment (28% of 2021 total revenue)

GFPT raises chickens in its own farm facilities and trades key raw materials internally among the group, such as live broilers, day-old-chicks, chicken feed, etc. Broiler chicks are raised in large modern grow-out housing with evaporative cooling systems and automatic feeding and watering systems for 40-45 days to reach the target processing weight.

3. Feed segment (20% of 2021 total revenue)

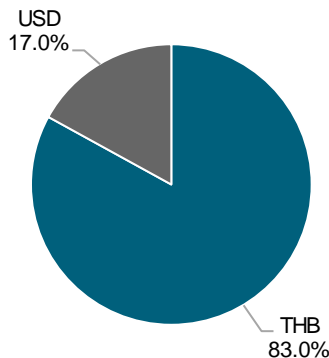

The company has two feed mill facilities which produce broiler feed and breeder feed to be used in GFPT’s integrated chicken production facilities only. Aside from that, GFPT produces and sells various kinds of land animal feed and aquatic feed under its own brands. In 2021, animal feed and aquatic feed revenue accounted for 9% and 11% of total revenue, respectively.

Expect 4Q22 net profit to drop q-q, but still grow y-y

Our forecast calls for a 4Q22 net profit of THB459m (-33% q-q, +747% y-y). The drop q-q would come from the low export season and the declining chicken price – the 4Q22 average price was THB42.5 per kg (-3.4% q-q, +35% y-y). However, we think GFPT's 4Q22 net profit will mark a record high in terms of fourth-quarter profits. The sharp y-y increase can be attributed to the low base last year. We expect a chicken export volume of 8,500 tonnes (-3.4% q-q, +13.3% y-y), thanks to the consumption recovery in the Japan market and the easing of the container shortage.

We expect GFPT's 4Q22 gross margin to decrease to 16% from 18.6% in 3Q22, due to the stable high price of raw materials, while we forecast the sales volume to decrease. Although GFPT's logistics cost is decreasing in line with the lower freight container charges, it could be offset by a drop in total revenue and higher bonus expenses. Hence, SG&A to sales could increase to 9.5% in 4Q22 (vs 8% in 3Q22 and 8.8% in 4Q21). In addition, profit sharing from its two subsidiaries, GFN and McKey, could decrease by 28% q-q to THB150m, due to the low season for the export industry.

Assuming in-line 4Q22 results, GFPT's 2022 net profit would hit a record high at THB2.05b (+9.8x y-y).

Conservative view on 2023 chicken price

We have a positive view on export volume growth in 2023, as 1) GFPT plans to expand its new slaughterhouse capacity by 100% to 300,000 birds/day in 2H23; 2) we see a potential consumption recovery from Japan and China; and 3) GFPT has an opportunity to export chickens to Saudi Arabia after receiving permission to export there in Mar-22.

However, we have a conservative outlook on the chicken price which will likely decline in 2023. We think the African Swine Fever (ASF) outbreak is presently easing, and will cause the domestic pig price to decrease in 2H23. Meanwhile, the live chicken supply has increased since last year, prompted by the sharp increase in the chicken price. This situation might hasten the decline in the chicken price in 2H23. Overall, we estimate the 2023 domestic chicken price at THB40 per kg (vs THB42.2 in 2022). Moreover, we forecast the 2023 export selling price to drop by around 5%-10% y-y, coming from EU customers' negotiations following the decrease in the freight container charges to near pre-Covid levels.

In 1H23, raw material costs are likely to maintain at high prices and drop at a slower-than-expected rate. However, we believe corn and soybean costs will decline in 2H23.

Overall, we project GFPT's 2023 net profit at THB1.68b (-18% y-y), but it should remain substantially higher than the pre-Covid level.

Valuations

We initiate coverage of GFPT with a BUY recommendation and a TP of THB18, based on 13x 2023E P/E, in-line with its five-year historical average. GFPT's share price fell 15% in 2022, reflecting investors' concerns over the chicken price, which might have already passed the peak in 2022. Its share price is trading at only 10x 2023E P/E, below its five-year historical average, with a high upside potential of 37%.

ESG and sustainability management

GFPT operates an integrated poultry business including feed mill, breeder farms, hatchery farms, broiler farms, chicken evisceration and processed food. Main products are cooked chicken, fresh and frozen chicken meat, processed food, and land and aquatic animal feeds. During 2019-2021, food/farm/feed contributed respectively 49.8%/30.2%/20.0%, with 78.1% sold domestic and 21.9% export.

Materiality issues	Activities and practice
Fierce competition	GFPT manages substitution risk and industry competition by adjusting its sales strategy to minimise low price effect in the short term, maintain customer satisfaction, and expand to potential markets in the Middle East and North America.
Change of consumers' behaviour	The company innovates high value-added products and services with support from R&D to correspond with in-depth consumer preference analysis.
Food safety	GFPT implemented new technology in the production process to meet international standards to both effectively control and trace errors from raw materials, packaging designs, packing, transport, and storage. Complaint and recall systems are in place to gain consumer confidence. GFPT's products are certified by various related international food safety standards, such as GMP, HACCP, ISO 9001, ISO/TS 22022-6, ISO 17025, ISO 14001, HALAL etc.
Outbreak	Prevention is priority. The company utilises a farm technology called Evaporative Cooling System (EVAP) to prevent germs entering chicken houses, apart from strict compliance with international animal welfare policies and practices. GFPT certifies good agricultural practices for its integrated chicken farms including breeders, broilers, and hatcheries. Employees are educated about animal diseases in order to understand and deal with them properly.
Covid-19 outbreak	During the spread of Covid-19, the company strictly implemented occupational health measures on prevention, activated a continuity business plan and allowed flexibility at work. Financially, GFPT reviewed cashflow and liquidity management to cope with uncertainty and implement online distribution.
Fluctuation of feed materials	GFPT 1) has an experienced procurement unit to monitor the situation and search for alternatives in terms of both quality and availability, and modify the formula by its own feed nutritionists; 2) uses derivative instruments to manage exposure. Since feed prices are regulated, product price rises may not compensate for the increase in commodity prices.
Volatility of product prices	Product prices are systematically uncontrollable. Nevertheless, the company mitigates the price volatility for day-old-chicks and chicken meat by launching a variety of products and creating value-added products to meet consumer demand.
Waste from operations	Compared with 2019, non-hazardous waste reduced significantly by 16.7% to 21,788 tonnes, while hazardous waste increased 41% to 41.8% at 19,680 kg.
Health, safety and work environment	In 2021, the number of employee work injuries leading to employee absences increased 5.9% to 125 times from 2019's 118 times. The number of employees reduced 12.8% to 4,906, from 2019's, 5,623, of which 33.3% were male and 66.7% were female.
Human rights in supply chain	GFPT sets its human rights policy in accordance with the international human rights standards UDHR, UNGP, and ILO, and adopts HRDD to monitor operations throughout the supply chain. The company also seeks cooperation from business partners to follow similar standards. A compliance/whistle-blowing and human rights culture are also established to ensure awareness within the organisation and among stakeholders.
Foreign exchange risk	Having foreign currency transactions for both import and export is a form of natural hedging that partially helps to mitigate risks, as Thai baht appreciation may lower revenue and depreciation could raise raw material costs. GFPT uses forward contracts to fix raw material costs and determine selling prices to lock in profitability, but also adopts Value at Risk to limit the exposure.
Reputational risk	The company focuses on good corporate governance, disclosures and transparency to ensure equality and fairness to all stakeholders and the business chain. Apart from strictly implementing CG, GFPT operates its business with environmental respect, sustainability integration, and social responsibility.
Major shareholder risk	At end-2021, the 52.35% stake of the Sirimonkolkasem family provides a potential to control the "majority" of votes in shareholder meetings, such as appointing directors. The company clarified that the authorised directors and executives are responsible for their duties and the results of their action to all stakeholders. Based on available information from the SET, the family held a 60% stake in 2009.
Awards and recognition	In 2021, GFPT received a Corporate Governance Report (CGR) of excellence along with a five-star CG score for six consecutive years, given by the Thai Institute of Director Association (IOD) accompanied with the Stock Exchange of Thailand (SET) and the Securities Exchange Commission (SEC). GFPT was also announced by The Stock Exchange of Thailand in 2021 to be one of Thailand's Sustainability Investment (THSI) companies, and has been certified to be a member of Thailand's Private Sector Collective Action Coalition Against Corruption (CAC) since 2017.

Additional information: UDHR = Universal Declaration of Human Rights; UNGP = United Nations Guiding Principle on Business on Human Rights; ILO = International Labor Organisation Declaration on Fundamental Principles and Rights at Work; HRDD = Human Rights Due Diligence

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 02-Feb-2023 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
