EQUITY RESEARCH - COMPANY REPORT

AP (THAILAND) AP TB

THAILAND / PROPERTY DEVELOPMENT

- AP's 4Q22 earnings grew 16% y-y but dropped 19% q-q due to a lack of new transfers from its JV and high SG&A.
- Expect 1Q23 profit to rise q-q but drop y-y. However, momentum should build in 2Q-3Q23 and peak this year in 4Q23.
- Maintain BUY and our TP of THB14.

4Q22 net profit dropped 19% q-q but grew 16% y-y

AP reported a 4Q22 net profit of THB1.15b (-19% q-q, +16% y-y), in line with our estimate. In 4Q22, transfer revenues were equal to THB8.6b (-1% q-q, +19% y-y). Of that, 97% was from low-rise projects due to strong presales for new projects which have a higher margin. As a result, the property gross margin rose 133bps q-q and 165bps y-y to 33.7%. However, the q-q results fell on lower profit sharing from its JV by 13% q-q to THB284m, as there were no new projects to transfer from. Moreover, the SG&A-to-revenue ratio increased to 22.8% in 4Q22 (vs 20.1% in 3Q22) following the introduction of more new projects.

More low-rise projects and newly built condos to support 2023

On a full-year basis, 2022 net profit hit a three-year record high of THB5.9b (+29% y-y), with transfer revenues up 21.5% y-y to THB37.5b. This was supported by low-rise transfers of THB35.6b (+22% y-y). The property gross margin widened to 32.7% vs 31.1% in 2021. For 2023, we anticipate continued net profit growth of 7% y-y at THB6.3b. Transfer revenue should be supported by the aggressive launches, especially low-rise, and four newly built condos. Currently, AP has a backlog of THB35.2b, which is enough to secure 48% of our 2023 transfer estimate.

Expect 1Q23 earnings to recover q-q but decrease y-y

AP has had no new project launches since the beginning of this year. However, it plans to launch new projects from this weekend to the end of March. They comprise five low-rise projects worth THB5.6b, which is lower than the THB26.4b value in 4Q22 and THB9.2b in 1Q22. Hence, we expect 1Q23 presales to drop q-q and y-y. Preliminarily, we forecast net profit in 1Q23 to recover q-q from two newly built condos but slip y-y from the high base in 1Q22. The earnings momentum should build in 2Q3Q23 and peak this year in 4Q23 following two new condo launches in 3Q23 plus more newly launched low-rise projects, especially in 2Q-4Q23.

Maintain BUY rating with a TP of THB14

We maintain our TP of THB14, based on 7x 2023E P/E. We retain our BUY rating on AP. The stock trades at 6.3x 2023E P/E, lower than the sector's average of 8.4x. Also, AP has announced a DPS of THB0.65 for its performance in 2022, implying a dividend yield of 5.2%. The stock's XD is on 9 May and the dividend will be paid on 25 May 2023.

Investment thesis

Management has revealed an aggressive 2023 business plan as follows: 1) 58 new project launches planned worth THB77.0b (+21% y-y), comprising 85% low-rise and 15% condos; 2) a presales target of THB58.0b (+15% y-y), split 78:22 between low-rise and condo projects; and 3) a transfer revenue target (including 100% JV) of THB56.3b. In particular, AP will focus more on the luxury market. It will also expand to five new provinces by launching five low-rise projects.

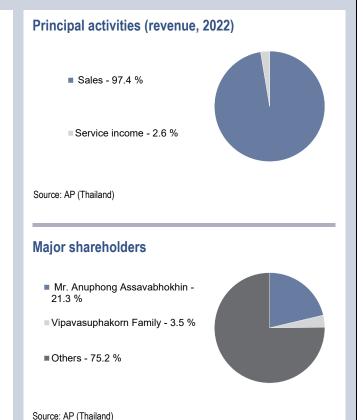

AP's strengths are its flexible and well-diversified portfolio. It covers both low-rise and condo projects in every market segment. Furthermore, its projects are located in Bangkok and provinces with high potential growth.

Company profile

Founded by Mr Anuphong Assavabhokhin and Mr Pichet Vipavasuphakorn in 1991, AP was listed in 2000 after being merged with PCM Precast Floors Plc, which was founded by Land & Houses Plc (LH). AP has no cross shareholdings with LH.

AP operates a property development business, i.e., single-detached house (SDH), townhouse, duplex home and condominium projects, in residential areas in metropolitan Bangkok and the provinces.

Catalysts

Key potential growth drivers include:

- 1) The success of new launches in the low-rise segment;
- Higher-than-expected take-up rates for new condominiums;
- 3) The potential for provincial projects.

Risks to our call

Downside risks to our P/E-based TP include 1) rising competition in the low-rise market, such that it could hurt take-up rates; 2) weaker-than-expected take-up rates of new launches; 3) construction delays from labour shortages; 4) increasing raw material prices; and 5) the impact of the expiration of the loan-to-value (LTV) limit easing.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
