## Unveiling a growth plan for 2023

- SC targets 2023 presales and transfer growth at 23% y-y and 15% y-y, respectively, following numerous new launches, strong local demand, and more overseas customers.
- Our forecast calls for a 2023 net profit of THB2.6b (+3% y-y).
- Maintain BUY and our TP of THB5.0.

### Brighter outlook for both low-rise and condos

Management believes that the property market should improve this year, supported by the economic recovery and more overseas customers. Low-rise projects should continue to grow, while condo demand should start to return. In 2023, SC plans to introduce 25 projects with a combined value of THB40b. Of the total, 75% will be low-rise and 25% condos. For low-rise projects, SC is continuing to focus on prices above THB10m. Also, it intends to develop the first ultra-luxury project with unit prices of THB100m-150m under a new brand named 95E1. For condos, its new projects are well diversified for the mid-end with two projects under the new brand. The remaining project will be high-end under Scope.

### Set for residential growth plus recurring businesses

SC targets 2023 presales to hit a record high at THB30b (+23% y-y), split 65:35 between low-rise and condos. That means low-rise presales should be equal to 2022's at THB19.5b, while condo presales should increase to THB10.5b (+2.2x y-y). SC's revenue target is THB25.0b (+16% y-y), split 95:5 between residential and recurring businesses. SC targets transfer growth at 15% y-y to THB23.7b, with 79% coming from low-rise and 21% from condos. Moreover, it continues to generate recurring income from the office, hotel, and warehouse businesses. It recently opened its first hotel named YANH Ratchawat with 79 keys on 1 March, and plans to acquire 100,000-130,000 sq.m. for warehouse space this year.

### 2023 performance should reach another record high

We project 2023 net profit of THB2.6b (+3% y-y). Transfers should grow by 8% to THB22.3b. This would help to offset a potentially lower gross margin of 31.4% (vs 31.8% in 2022) from the higher proportion of condos. We expect 1Q23 presales to drop q-q and y-y but rise in 2Q-4Q23 on newly launched projects, split 40:60 between 1H and 2H. 1Q23 profit should slip q-q from the high base but rise y-y due to ongoing transfers of three new condos from 4Q22 and the realisation of its low-rise backlog.

### Maintain BUY with a TP of THB5.0

We maintain our TP of THB5.0, based on 8x 2023E P/E, as well as our BUY rating. The stock trades at 7x 2023E P/E, lower than peers' 8.4x. SC announced a DPS of THB0.17 for 2H22, implying a dividend yield of 3.8%, and we forecast an annual dividend yield of 5.6% in 2023.

### Investment thesis

SC has a strong market position, especially in the high-priced housing segment with unit prices above THB10m. In terms of revenue, SC generates 96% from real estate sales, especially in landed property. The remaining 4% is rental and service income from office buildings, serviced apartments, consulting and management.

SC's total revenue base has ranged between THB18b-20b per annum since 2019. For the next five-year plan, SC targets total revenue of THB25b. Moreover, it plans to enlarge its proportion of recurring income to 20% from investing in various types of assets, for example, hotels and warehouses.

### Company profile

SC operates in three segments including property development for sale, rental, and consulting and management services. It generates most of its revenue from real estate sales such as single-detached houses, townhouses, home offices, and condominiums.

### Catalysts

Key potential growth drivers include 1) the success of new launches, especially in the high-priced residential segment with unit prices above THB10m; 2) efficient cost management; and 3) the economic recovery and more overseas customers.

### Risks to our call

Downside risks to our P/E-based TP include 1) weaker-than-expected purchasing power; 2) cancellation of presales; 3) bank loan rejections; and 4) construction delays.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
