Capital hike to cope with future growth

- Full subscription of the newly-issued PP shares would produce proceeds of THB4.5b for its capacity expansion of SiC, a product with a currently small market but high growth potential, particularly in EVs.
- Despite an expected EPS dilution in 2024 due to the payback period, we have a bullish view of its long-term growth.
- Cut our TP to THB64 to incorporate the newly-issued shares, but share price decreases provide a buying opportunity.

Successful 10% capital hike through PP to expand its SiC factory

HANA announced a capital increase through sales of 80.48mn PP shares (10% of total capital) to 25 institutional investors at THB57 apiece, approved at its shareholders' meeting on Apr 28, 2023, which would provide proceeds of cTHB4.5b. The objectives of the fund comprise 1) to expand SiC capacity at its factory in South Korea, operated under its subsidiary Power Master Semiconductor (cTHB2.9b in 2024), and 2) to invest in equipment for its existing business (cTHB1.6b in 2025).

SiC market remains small but has high growth potential

Although the capital hike may trigger a dilution impact in 2024, we have a bullish view of its long-term growth due to its investment to expand its SiC capacity. In this regard, HANA plans to spend cUSD100m in 2023-24. Although the SiC market remains small at cUSD2.3b (0.4% of global semiconductor sales), it has a high expected growth of c46% CAGR to USD7b by 2025. Since SiC applications in automotive and industrial currently stand at 68% and 32%, respectively, HANA sets its 2023-25 SiC revenue target at USD20m/45-48m/90-94m, respectively. Also, it anticipates EBITDA breakeven as early as 2024 and a positive bottom line by 2025.

Expect gradual profit recovery while maintaining long-term bullish view

We expect a 3Q23 net profit of THB750m (+18% q-q, +80% y-y). Excluding the high FX loss booked last year, the 3Q23 core profit should decrease 11% y-y due to the gradual consumer demand recovery and the pending Chinese market recovery. Our initial revenue forecast is USD202m (-1% q-q, -2.4% y-y). Although the 4Q23 profit should weaken q-q, in line with seasonality, the outlook is better than previously thought after customers have ended their destocking. Also, we anticipate post-covid consumer demand recovery in 2024. Therefore, we have raised our 2023-25E net profit by 9.4%/5%/8.7% but cut our EPS forecast by 1.3%/4.6%/1.2% to incorporate the newly issued shares.

Slash our 2024 TP to reflect modest dilution impact

We have cut our 2024 TP to THB64 from THB67 (a PE of 23x, unchanged). Although we anticipate a dilution of c4.6% in 2024 due to the payback period, we have a bullish view of its long-term growth. Also, the balance sheet remains healthy with a low expected D/E ratio of only 0.17x. However, the ROE remains lower than its peers at 9.4% due to the capital hike impact and should rise to 10.1% in 2024. Since our new TP offers an 11% upside, we retain our BUY rating on HANA.

Investment thesis

HANA is a leading EMS provider in Southeast Asia with a long experience of over 45 years. Since its inception in 1978, although it is mainly a midstream producer, it has strength in its diversification to several end products, such as telecommunications, computers, consumer products, automobiles, radio frequency identification (RFID), and medical products. Also, it has manufacturing bases in several countries while constantly developing new products, i.e., SiC, to catch up with industrial customer demands, particularly in EVs.

Company profile

HANA is one of South East Asia's leading independent electronics manufacturing service providers. The company produces PCBA, IC, assembles and tests micro-displays, and RFID. The company's headquarters are in Bangkok and there are six manufacturing facilities in Thailand, China, the USA, Cambodia, and South Korea. In 2022, Its revenue contribution came mainly from PCBA (56% of total revenue), followed by IC (38%), RFID (5%), and SiC (1%).

Catalysts

Potential catalysts for HANA's earnings growth in 2023 are 1) a stronger global economy and a consumption recovery; 2) a decline in raw material costs; and 3) a faster-than-expected capacity expansion.

Risks to our call

Downside risks to our P/E-based TP include 1) a slower-than-expected consumption recovery; 2) a potential rise in raw material costs; and 3) a stronger-than-expected THB against USD.

Earnings sensitivity

- For every THB1/USD increase, we estimate 2024 net profit to fall by 6.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 5.7%, and vice versa, all else being equal.
- For every 0.2% increase in SG&A, we estimate 2024 net profit to fall by 1.3%, and vice versa, all else being equal.
- For every 10% increase in labour cost, we estimate 2024 net profit to fall by 6.6%, and vice versa, all else being equal.

FSSIA ESG rating

★ ★ ★

Exhibit 15: FSSIA ESG score implication

47.25 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>20-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 17-Oct-2023 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
