3Q23 results at first glance

In line 3Q23, even though market share has not recovered

Highlights

- OSP reported a 3Q23 net profit of THB642m (16.9+% q-q, +163% yy). Excluding an extra gain of THB80m from restructuring, the normalized earnings were in line at THB562m (+2.3% q-q, +56.6% y-
- 3Q23 revenue slightly recovered. It edged up 1.6% y-y (but was down by 6.4% q-q due to lower international sales in line with seasonality), supported by domestic sales growth (+2.2% g-g, +1.5% y-y) from a recovery in tandem with the energy drink market and the low base last year when its rivals had not raised their prices. However, the market share decreased to 46.5% from 47.5% in 2Q23 and 48.2% in 3Q22. Also, international sales weakened due to seasonal factors and the high base last year.
- The gross margin increased more than expected to 35.4% from 34% in 2Q23 and 29.3% in 3Q23 due mainly to 1) lower raw material and gas costs and 2) higher production efficiency.
- Costs remained under control, and OSP did not do aggressive promotion. As a result, the SG&A-to-sales ratio decreased to 25.9% from 26.4% in 3Q22 but increased from 24.8% in 2Q23 due to q-q lower revenue.
- The profit sharing from associates recovered better than expected to THB51m from THB13m in 2Q23. However, it dropped 35% y-y from the high base last year when Covid was rampant.

Outlook

- OSP's reported 9M23 net profit equaled THB1,969m (+23% y-y). Excluding extra items, the core profit was THB1,584m (-7.5% y-y), securing 73% of our full-year estimate. In 4Q23, it should rise to this year's peak, in line with seasonal factors. Also, OSP would do more aggressive promotion in the country. However, the net profit should significantly decrease due to one-time expenses of cTHB100m from the closure of its factory in Samut Prakan from December 1, 2023, onwards.
- We maintain our 2023-24E normalized earnings of THB2,183m (+14.1% y-y) and THB2,636m (+20.7% y-y), respectively.
- We retain our 2024 TP of THB28.5 (PE 35x, maintained). Since OSP has a 16.8% upside, we reaffirm our BUY rating.

Osotspa PCL (OSP TB)

Exhibit 6: FSSIA ESG score implication

61.48 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 08-Nov-2023 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
