3Q23 net profit missed estimates

3Q23 results at first glance

Highlights

- COM7 reported a net profit of THB611m (-13% q-q, -16% y-y) due to sales growth of only 10%, sharply lower than its target of 20%. Also, the gross margin decreased due to obsolescence provision on iPhone 14 demo units.
- Sales and service revenue equaled THB16.3b (+2% q-q, +10% y-y) due to sales growth of only 10%, sharply lower than the target of 20% due to store improvement resulting in less than full-quarter revenue realization. Also, wholesale ADEPT terminated sales of Realme products, which generated a revenue of THB455m.
- The 3Q23 gross margin came in at 13.4%, down 60 bps y-y due to a change in its product mix towards low-margin items and obsolescence provision on iPhone 14 demo units (Note: COM7 also recorded this provision for iPhone13 in 4Q22). SG&A expenses jumped by 12% y-y, in line with a higher store count, mainly BeBePhone. Also, interest expenses increased q-q and y-y due to the impact of policy rate hikes on its loans. They were all short-term.

Outlook

9M23 net profit equaled THB2,189m (+3% y-y), securing 64% of our full-year estimate. Given 9M23 revenue growth of only 13%, we view that COM7 will not hit its target growth of 20%. Since it poses a downside to our estimate, we put our forecast under review.

Exhibit 7: FSSIA ESG score implication

61.78 /100

| Rating | Score | Implication |
|--------|---------|--|
| **** | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability. |
| *** | >59-79 | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers. |
| *** | >39-59 | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually. |
| ** | >19-39 | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable. |
| * | 1-19 | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

 $HOLD\ (H).$ The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.
