EQUITY RESEARCH – RESULTS FLASH

FSSIA ESG rating

3Q23 results at first glance

AAV booked a core loss of THB0.8b in 4Q23, missing our estimate

Highlights

- AAV reported a 3Q23 core loss of THB0.8b, missing our estimate of a THB0.6b core loss mainly due to higher-than-expected SG&A, which jumped to THB0.9b (vs THB0.7b in 2Q23 and 3Q19).
- Including a THB0.8b FX loss and a THB0.1b loss on expected credit losses, AAV posted a net loss of THB1.7b in 3Q23.
- Passenger revenue dropped 5% q-q in 3Q23. Passengers carried was flat q-q at 4.6m (accounted for 86% of pre-Covid level), with a strong load factor of 90% (vs 81% in 3Q19). Ticket fares slightly dropped by 2% q-q due to seasonal effect, but sill exceeded pre-Covid by 18%.
- Ancillary income dropped 3% q-q, but ancillary income per passenger remained strong at THB404 in 3Q23 (vs THB329 in 3Q19).
- Expenses increased by 9% q-q in the quarter, mainly due to a 19% q-q higher fuel cost. Meanwhile, non-fuel costs increased by 3% q-q following 4% q-q higher aircraft maintenance and 39% q-q higher SG&A.
- As a result, the operating profit margin decreased to -6% (vs 7% in 2Q23).
- AAV booked a 9M23 core loss of THB0.3b vs our 2023E core profit of THB0.1b

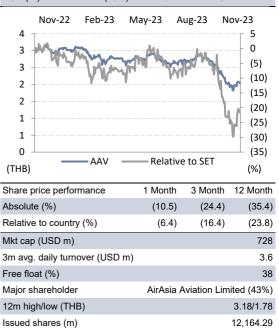

Outlook

We expect AAV to turn profitable in 4Q23, premised on the high season for the domestic market. In addition, Chinese tourist arrivals are likely to pick up following the festive season in Nov-23 to Jan-24, and peak in Feb-24, which is the Chinese New Year period. This should benefit AAV, which plans to increase the flight capacity of its China routes from 71 flights/week at end-3Q23 to 100 flights in 4Q23 (vs 140 flights at the pre-Covid level).

| FSSIA ESG rating | |
|---------------------|--|
| $\star \star \star$ | |

43.83 /100

| Rating | Score | Implication |
|---------|---------|--|
| **** | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability. |
| \star | >59-79 | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers. |
| *** | >39-59 | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually. |
| ** | >19-39 | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable. |
| * | 1-19 | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 13-Nov-2023 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
