EQUITY RESEARCH - COMPANY REPORT

SANSIRI SIRI TB THAILAND / PROPERTY DEVELOPMENT

4Q23 presales accelerate but miss the target

- The 4Q23 presales jumped (+57% q-q, +21% y-y), supported by higher condo presales. However, it missed the target due to a slower-than-expected low-rise recovery and cancellation at some projects following a construction delay.
- 2023 presales ended at THB37.6b (-2% y-y), missing the target by 20%.
- Expect 4Q23 profit to decrease q-q and y-y. Since SIRI has a limited upside, we cut our rating to HOLD.

4Q23 presales surge q-q and y-y, driven by condos

SIRI posted 4Q23 presales growth of 57% q-q and 21% y-y to THB12b. However, it missed the target of THB14b by about 20% due to lower-than-expected low-rise presales of THB5.6b (+15% q-q, -10% y-y). Although the 4Q23 new launches were the highest of the year at 13 projects with a combined value of THB23b and covered all segments, low-rise demand was sluggish. Also, some high-end low-rise projects reported cancellation due to a construction delay. However, condo presales were strong, soaring 131% q-q and 75% y-y to THB6.3b due to higher new condo launches of seven projects with a combined value of THB12b and an average take-up rate of 27% (vs. 20% in 3Q23). For instance, SHUSH Ratchathewi, VIA Ari, and The BASE Bukit Phuket recorded presales of 20%, 40%, and 36%, respectively.

2023 presales are nearly flat y-y at THB37.6b but miss the target

The 2023 presales ended at THB37.6b (-2% y-y). It missed the target of THB47b by 20% due to a slower-than-expected recovery in international presales, sluggish low-rise demand, and lower new launches of 44 projects with a combined value of THB65b than the plan of 52 projects with a combined value of THB75b. Of that, low-rise accounted for 56%, amounting to THB21b (-26% y-y). They generated presales of THB9.3b, implying an average take-up rate of 20%, down from 46% in 2022 due to sluggish low-rise demand. Also, several high-end projects launched in 2022 had a favorable response. However, condo presales surged by 64% y-y to THB16.5b due to new projects, which nearly doubled from 2022 to THB18b. They had an average take-up rate of 36%.

Dull 4Q23 performance outlook (-q-q, -y-y)

We initially expect a 4Q23 profit of THB1.2-1.3b (-20% q-q, -30% y-y). Although we anticipate transfers of THB11-12b (+q-q, flat y-y), it should see pressure from higher SG&A expenses due to the aggressive new launch plan, annual bonus, and lower profit sharing from JVs after a substantial realization from the backlog of Burasiri Krungthep Kreetha earlier.

Cut rating to HOLD at our TP of THB1.90 (unchanged) on a limited upside

We maintain our 2023E core profit of THB5b (+23% y-y), which remains achievable. However, we anticipate a 2024 profit of THB4.7b (-5% y-y). SIRI will disclose its 2024 business plan on January 23. Hence, we reaffirm our TP of THB1.90 (PER 7x). The stock has an upside of less than 10%. Also, it lacks catalysts due to its declining 4Q23 and 2024 profit outlook. Therefore, we decrease our recommendation to HOLD. Note we expect a 2H23 DPS of THB0.07, implying a dividend yield of 3.8%.

Investment thesis

SIRI disclosed an aggressive plan for 2023. It included 1) presales and transfer targets of THB47b (+22% y-y) and THB41b (+11% y-y), respectively, 2) its new launch plan of 52 projects with a combined value of THB75b (+74% y-y), and 3) a target to increase international presales by 54% y-y from markets with solid customer base, such as China, Taiwan, Hong Kong, and Russia. Also, it aimed at new potential markets, such as CLMV. However, the 2023 presales missed the target due to a slower-than-expected international presales recovery, sluggish low-rise demand, and lower new project launches than planned. Meanwhile, we anticipate a y-y lower 2024 profit due to a high base.

Company profile

SIRI aims to be Thailand's leading property developer with over 38 years of experience. Its core operation is divided into three businesses, namely property development, property services, and investment.

In 2022, property development for sale was its largest source of revenue, constituting about 91% of total revenue. It develops single-detached houses, semidetached houses, townhouses, home offices, and condominium projects for all customer groups, both in Bangkok and its vicinity and upcountry areas.

www.sansiri.com

Catalysts

Key potential growth drivers include 1) the success of its new launches, particularly high-end low-rises, such as Narasiri, BuGaan, and Setthasiri brands; 2) new condo launches with positive response and targetted take-up rates; 3) a recovery in international presales, and 4) property stimulus.

Risks to our call

Downside risks to our P/E-based TP include 1) lower-thanexpected take-up rates of new launches; 2) a slowdown in the economy and purchasing power, 3) fierce competition, 4) a higher loan rejection rate and customer cancellation, 5) a construction delay and labor shortages, and 6) a higher D/E ratio than property peers.

Earnings sensitivity

- For every 5% increase in SIRI's transfers, we estimate 2023 net profit to rise by 4.1%, and vice versa, all else being equal.
- For every 0.5% increase in property GPM, we estimate 2023 net profit to rise by 2.9%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A to revenue, we estimate 2023 net profit to fall by 3.2%, and vice versa, all else being equal.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 10-Jan-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
