EQUITY RESEARCH - COMPANY REPORT

SC ASSET CORPORATION THAILAND / PROPERTY DEVELOPMENT

A likely strong 4Q23

- SC disclosed a cautious 2024 business plan, targeting y-y flat presales of THB28b from planned new launches of THB30b (-18% y-y) and sales of its inventory of over THB91b.
- Expect a 4Q23 core profit of THB1b (+100% q-q, +3% y-y), higher than our previous forecast.
- Maintain our 2024E profit growth (flat y-y) and BUY rating on an expected 2H23 dividend yield of 5.2%.

A cautious 2024 business plan with y-y flat presales

SC disclosed a cautious 2024 property business plan amid challenges, focusing on diversifying to recurring businesses to create long-term stability. It planned to introduce 17 new projects with a combined value of THB30b (-18% y-y). Twothirds would be in 1H24 to realize within this year. Fifteen would be low-rises with a combined value of THB25b (-14% y-y), mainly high-end projects with prices of over THB10m. Two would be condos with a combined value of THB5b (-34% y-y) under the Reference brand of its JV. Under this plan, SC targets presales of THB28b, close to 2023, comprising low-rises of THB18b (+5% y-y) and condos of THB9.8b (-8% y-y), driven by sales of 86 existing projects with a combined value of THB91b (low-rises 80%, condos 20%) and new launches.

Continued investment in recurring businesses to create long-term stability

SC targeted 2024 revenue of THB26.5b, including low-rises of 70%, condos of 25%, and recurring of 5%. In this regard, its recurring unit (Engine 2) would focus on investing in four businesses, with an EBITDA target from Engine 2 at 16% in 2024 and up to 26% by 2028. In 2024, it should progress with a higher hotel room of 384 from the opening of 306-room Kromo in Sukhumvit 29 late this year and a higher storage area of 33,000 SQM from an additional warehouse of 17,000 SQM in Bangna K.M. 22 area.

4Q23 profit (+q-q, +y-y) likely beats our estimate

We expect a new quarterly-high 4Q23 core profit (excluding gain/loss from fair value adjustment of investment property, which is usually in 4Q) of THB1b (+100% q-q, +3% y-y), better than our previously forecast for a y-y loss to THB800m, due to higher transfers of THB8.5b (+64% q-q, +20% y-y) mainly from high-end low-rises with prices of over THB20m and the progress of SCOPE Langsuan condo. However, the gross margin should decrease to 30% from 31-32% in 3Q23 and 4Q22 due to a higher exposure of condo revnue. Hence, we expect a 2023 core profit of THB2.5b (flat y-y), 7% higher than our previous estimate.

Maintain our BUY call at our TP of THB4.40 on a 2H23 dividend vield of 5.2%

We retain our 2024E core profit of THB2.5b, close to 2023, cautiously assuming 7% lower transfers (including JV) than the guidance. Similarly, we reaffirm our BUY rating at our TP of THB4.40 (unchanged) after SC decreased to trade on a 2024 PE of only 5.5x. Also, the 4Q23 profit growth should surpass its peers, with an anticipated 2H23 DPS of THB0.17, implying a yield of 5.2%.

Investment thesis

SC disclosed its 2024-2028 business targets. They include 1) five-year revenue of over THB150b, supported by property and recurring income, 2) reasonable investment with a D/E of less than 1.5x, 3) diversified profit portfolio with a recurring income mix of over 25% from 17 projects in four businesses, including offices for rent (total rental space of 120,000 SQM from six buildings), hotels (545 keys from three projects), warehouses (total storage area of 160,000 SQM from four projects), and property for rent in the U.S. (78 units in four Boston locations).

Company profile

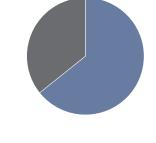

SC operates in three segments including property development for sale, rental, and consulting and management services. It generates most of its revenue from real estate sales such as single-detached houses, townhouses, home offices, and condominiums.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations
