### 4Q23 results at first glance

# Above-estimate 4Q23 profit but below-forecast dividend yield of 3%

#### **Highlights**

- ASW reported a 4Q23 net profit of THB484m (+187% q-q, +13% y-y). Excluding a share premium of THB82m from signing a new JV, the core profit equaled THB402m (+359% q-q, +46% y-y), beating our estimate by 7% due to lower-than-expected SG&A expenses.
- The profit surged q-q and y-y, supported by transfers of THB2b (+30% q-q, +13% y-y) mainly from realizing the new Kave Town Colony condo (THB1.9b, 98% sold, 61% transferred). Also, revenue from managing JV projects jumped to THB150m (+103% q-q, +166% y-y), in line with higher projects. The gross margin recovered to 40.6% from 37.6% in 3Q23 from realizing new projects with healthy margins.
- For the year ended 2023, the net profit amounted to THB1.1b (-2% y-y). Excluding extra items, the core profit came in at THB818m (+19% y-y). We maintain our 2024E net profit of THB1.1b (+3% y-y) and our 2024E core profit growth of 37% y-y. The 1Q24 profit should decrease q-q before a 2Q24 recovery due to higher newly completed condos.
- ASW announced a 2023 DPS of THB0.25, implying a dividend yield of 3%. The stock will go XD on April 30. ASW will pay the dividend on May 21, 2024. It is lower than our estimate of THB0.52 and implies a 21% payout ratio, below the dividend policy of no less than 40%. In this regard, ASW mentioned a reinvestment plan for future expansion.
- The balance sheet remained manageable. At the end of 2023, ASW had a D/E ratio of 2.3x and a net IBD/E ratio of 1.5x, lower than its covenant of 2.5x. Meanwhile, ASW has THB1.3b debentures maturing in May and October this year. It has a rollover plan by offering a new series early this year. Also, it will redeem some using operating cash flow. ASW has THB1.3b cash on hand. Additionally, it has completed several new condos with a THB8.5b backlog to realize this year.
- We retain our BUY call at our TP of THB9.50. ASW traded on a 2024 PE of 7x with a 12% upside. In the short run, the stock may see pressure from the below-forecast dividend. However, since it should drive the mid-to-long-term growth outlook through a new investment plan in line with the acquisition of TITLE last year, reserving cash for this purpose will help ASW avoid any loss of investment opportunity, in our view.

## **ASSETWISE PCL (ASW TB)**

#### **Exhibit 5: FSSIA ESG score implication**

27.00 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 22-Feb-2024 unless otherwise stated.

#### RECOMMENDATION STRUCTURE

#### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
