4Q23 results at first glance

In-line weaker 4Q23 with a 2H23 yield of 5.4%

Highlights

- SIRI reported a 4Q23 net profit of THB1.3b (-17% q-q, -27% y-y), in line. Excluding a one-time gain of THB157m from land sale, the core profit equaled THB1.1b (-26% q-q, -34% y-y).
- The q-q plunge came from higher SG&A after increased marketing activities, new project launches, and employee bonuses, while the profit dropped y-y due to lower transfers of SIRI and its JVs.
- Transfers stood at THB9.8b, recovering 19% q-q but decreasing 18% y-y since SIRI did not complete any condo during the quarter but began transferring three new condos in 4Q22. The profit sharing from JVs plummeted to THB91m (-43% q-q, -66% y-y) since they did not have much outstanding inventory.
- Property sales' gross margin recovered to 35.2% from 34.2% in 3Q23 due to the realization of low-rises, which reported solid presales.
- For the year ended 2023, the net profit amounted to THB6.1b (+42% y-y), a new high. Excluding an extra gain of THB1.2b from sales of a school and land, the core profit stood at THB4.9b (+21% y-y).
- At the end of 2023, the D/E and IBD/E was 2.1x and 1.7x, up from 1.9x and 1.6x in 2022, respectively. However, the IBD/E was still below its covenant of 2.5x.

Outlook

- We retain our 2024E core profit of THB4.7b (-3% y-y) due to a high base. Transfers would come mainly from low-rises amid an unsupportive market condition, lower demand, and high competition. Also, SIRI would realize THB12b from its end-2023 backlog (including JVs) as revenue this year. It is enough to secure 31% of our transfer estimate.
- We expect the 1Q24 net profit to decrease q-q and y-y before a 2Q24 recovery after SIRI completes more new condos. Also, the 2H24 performance should improve h-h.
- We reaffirm our TP of THB1.90. SIRI has a limited upside. Besides, it lacks any catalyst due to its declining performance outlook. Hence, we retain our HOLD rating. SIRI announced a 2H23 DPS of THB0.10, implying a 5.4% yield. It will go XD on March 15 and pay the dividend on May 20, 2024.

Exhibit 4: FSSIA ESG score implication

66.14 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 27-Feb-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
