EQUITY RESEARCH - COMPANY REPORT

THAI UNION GROUP

TU TB

1Q24 might be the lowest point

- Expect 1Q24 normalized profit to drop q-q, but grow y-y due to business downsizing and unclear purchasing trend in the US.
- Forecast revenue to recover in 2Q24 onwards, driven by seasonal factors and improving order trends.
- Retain BUY with the same TP of THB17.3.

Expect 1Q24 profit to decline q-q

We forecast a 1Q24 net profit of THB832m, an improvement from the significant loss in 4Q23, but a 19% y-y decline. Excluding an FX loss of around THB50m, TU's normalized profit should be THB882m (-25% q-q, +9% y-y). The y-y profit increase would come from higher gross margins in the frozen and pet care businesses. The expected q-q profit decline would be mainly due to 1) a 6.4% q-q decrease in total revenue; 2) a projected gross margin decrease to 16.8% from 17.8% in 4Q23; and 3) an expected tax expense rate of 6-8% following the tax credit benefit from Red Lobster in the previous period.

Revenue pressured by downsizing and unclear purchasing trend

We anticipate 1Q24 total revenue to drop by 6% q-q but rise 1.8% y-y. Excluding the positive impact of baht depreciation, its total revenue should be flat y-y. To elaborate, 1Q24 revenue from the frozen business should plunge by 16% q-q and 10% y-y, due to business downsizing and the unclear purchasing trend in the US market. Meanwhile, we project the ambient segment to experience a slight increase, without significant price reductions. In addition, we estimate the pet food business to grow by 15% y-y, in line with ITC's guidance. However, higher container shipping costs should push SG&A to sales up to 12.5% in 1Q24 compared to 11.7% in 4Q23, which is above the company's annual target of 11-12%.

Project 1Q24 to be the lowest point of the year

Assuming in-line 1Q24 results, it would account for 17.5% of our full-year earnings estimate. Despite the caution regarding potential price adjustments for branded products in 2Q24 – in accordance with lower tuna prices – management believes the average selling price can be maintained, as tuna prices are expected to recover in 2Q-3Q24 following seasonal trends. Hence, we expect earnings to recover in 2Q24 onwards, driven by seasonal factors and improving order trends.

Reaffirm BUY with the same TP of THB17.3

We retain our SoTP-based 2024 TP at THB17.3, implying a P/E of 17x. There is a high possibility that 1Q24 profit will be the lowest point of the year. On 27 March, TU repurchased 85.7m shares (1.84% of total) at an average price of THB14.4 per share. 114.3m shares remain for repurchase, with the buyback program ending on 30 March 2024.

Investment thesis

TU is one of the world's largest seafood companies. It is a leading producer and exporter of frozen and canned seafood such as tuna, shrimp, sardines, and mackerel. TU has affiliated companies, such as I-Tail Corporation (ITC TB, BUY), a major pet food manufacturer in Thailand. It also has overseas subsidiaries, one of which owns Chicken of the Sea, the #3 canned seafood brand in the US, and the TUE Group (formerly MWB), which owns canned seafood brands ranking among the top three in European markets, such as John West, Petit Navire, Parmentier, King Oscar, and Mareblu.

In 2020, TU began expanding into innovative products, aiming to increase its revenue mix to 10% of total revenue by 2025 from 6.7% at end-2022 and EBITDA to USD450m-550m.

Company profile

Thai Union was founded in 1977 as a canned tuna processor and exporter. It is now an international OEM business with a global portfolio of consumer-favourite brands. At the end of 2022, TU had 18 brands, five strategic partnerships and key joint ventures, and eight overseas sales offices. TU has 13 production locations in 12 countries and two innovation and R&D centres. In 2022, its revenue contributions from the USA, Europe, Thailand, and Japan were 43%/26%/11%/6%, respectively.

www.thaiunion.com

Catalysts

Potential catalysts for TU's 2024 earnings growth include 1) revenue growth of the three units; 2) its pet food and readyto-eat capacity expansion; 3) the declining tuna price outlook; and 4) the absence of loss-sharing from Red Lobster after the divestment in 4Q23.

Risks to our call

Downside risks to our SoTP-based 2024 TP include 1) a slower-than-expected revenue recovery; 2) a disruption on shipping routes, resulting in higher-than-expected freight costs; 3) a slower decrease in raw material costs than expected; 4) higher-than-expected labor costs and labor shortages; and 5) stronger Baht than expected.

Earnings sensitivity

- For every THB1/USD increase, we estimate 2024 net profit to fall by 7%, and vice versa, all else being equal.
- For every 1% increase in the tuna price, we estimate 2024 net profit to fall by 5.8%, and vice versa, all else being equal.
- For every 5% increase in the minimum wage, we estimate 2024 net profit to fall by 4.3%, and vice versa, all else being equal.

Exhibit 7: FSSIA ESG score implication

| Rating | Score | Implication |
|---------------------|---------|--|
| **** | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability. |
| **** | >59-79 | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers. |
| $\star \star \star$ | >39-59 | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually. |
| ** | >19-39 | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable. |
| * | 1-19 | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

| Company | Ticker | Price | Rating | Valuation & Risks |
|--------------------|--------|-----------|--------|--|
| Thai Union Group | TU TB | THB 14.50 | BUY | Downside risks to our SoTP-based 2024 TP include 1) a slower-than-expected revenue recovery; 2) a disruption on shipping routes, resulting in higher-than-expected freight costs; 3) a slower decrease in raw material costs than expected; 4) higher-than-expected labor costs and labor shortages; and 5) stronger Baht than expected. |
| i-Tail Corporation | ITC TB | THB 20.50 | BUY | Downside risks to our P/E-based TP include 1) a slower-than-expected recovery in purchasing power, 2) more fluctuating raw material prices than expected, 3) a stronger-than-expected THB, and 4) labour shortages. |

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 29-Mar-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
