EQUITY RESEARCH - COMPANY REPORT

CPALL CPALL TB

1Q24 core profit set to grow y-y, in line with sales and CVS GPM

- We expect a 1Q24 core profit of THB4.86b, down 13% y-y due to seasonality but up 29% y-y, supported by sales of the three units, an increase in CVS GPM, and lower interest expenses.
- The 2Q24 outlook remains bullish. We maintain our 2024E core profit of THB21b (+16% y-y).
- We retain a BUY call at our TP of THB77.0 (DCF).

The 1Q24 core profit should jump y-y, supported by sales of the three units and lower interest expenses

We expect a 1Q24 core profit of THB4.86b, down 13% q-q due to seasonality but up 29% y-y, supported by sales of the three units. In particular, we anticipate CVS SSSG of 3.5%, up in line with tourist arrivals, which support higher traffic at 7-Eleven. Also, we project 4% wholesale SSSG and 6% retail SSSG. Meanwhile, we expect 7-Eleven to add 200 new branches, MAKRO to open two eco-plus branches, and Lotus's to discontinue four Go Fresh stores, turn a supermarket into a hybrid store, and open a new supermarket in Malaysia.

Solid CVS margins, supported by product mix

We anticipate CVS GPM to be flat q-q but up by 70 bps y-y, supported by a change in the product mix towards high-margin RTE and beverages and away from low-margin products, such as cigarettes, due to changing consumer behavior. Wholesale should report a slightly lower GPM of 10.8% (vs 10.9% in 1Q23) due to a new distribution center (DC), while retail should record a flat GPM y-y at 18.0%. SG&A expenses should increase, in line with sales and pre-operating expenses of a new DC of MAKRO, while interest expenses should decrease after the loan restructuring of CPAXT.

A short-term growth outlook of the three businesses

If 1Q24 matches our estimate, it secures 23% of our 2024E core profit, which remains unchanged at THB21b (+16% y-y). In 2Q24, we expect qq and y-y growth due to long holidays and the summer season, supporting high-margin products, such as beverages, and a retail sales recovery.

Retain a BUY call at our TP of THB77

We reaffirm a BUY call at our TP of THB77. CPALL is our top pick in the commerce sector due to its short-term and 2024 growth outlook, in line with tourism and domestic consumption recoveries and O2O strength. Valuation-wise, it traded on an attractive level at 2024E P/E of 24.0x, its five-year historical average -2SD.

PREPARED BY FSS INTERNATIONAL INVESTMENT ADVISORY SECURITIES CO LTD (FSSIA). ANALYST CERTIFICATION AND IMPORTANT DISCLOSURES CAN BE FOUND AT THE END OF THIS REPORT

Investment thesis

CPALL is the #1 convenience store (CVS) operator in Thailand. It is expanding in Thailand, Cambodia, and Laos. At end-2Q23, it has 14,545, 82, and three branches in the three countries, respectively.

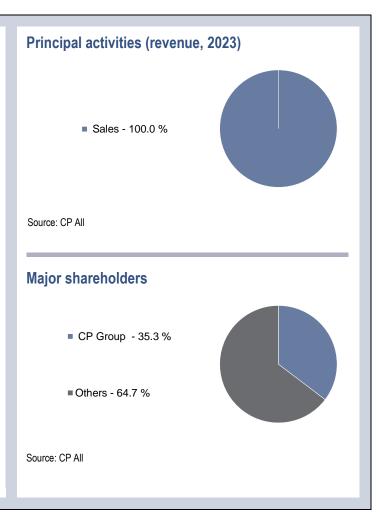

After the consolidation of CPAXT (BUY, 2024 TP THB36), in which CPALL holds a 59.9% stake, it has three units. They include CVS, wholesale, and retail.

We believe CPALL will benefit from domestic consumption recovery and the government measures to stimulate domestic purchasing power. We project a 2024-26 core profit growth of 15% CAGR.

Company profile

CPALL is the operator and franchiser of CVS under the 7-Eleven trademark in Thailand. Also, it invests in CVS supporting businesses, such as manufacturing and distribution of ready-to-eat food and bakery, and a cashand-carry business under MAKRO.

www.cpall.co.th

Catalysts

Potential catalysts for CPALL are 1) higher-than-expected recovery in domestic consumption and the tourism industry and 2) better-than-expected wholesale and retail operating performance.

Risks to our call

The key downside risks to our DCF-derived TP include 1) lower-than-expected SSSG, 2) lower-than-expected gross margin, and 3) higher-than-expected SG&A to sales ratio.

Event calendar

Earnings sensitivity

- For every 1% increase in SSSG, we estimate 2024 EPS to rise 1.3%, and vice versa, all else being equal.
- For every 0.1% increase in GPM, we estimate 2024 EPS to rise 3.0%, and vice versa, all else being equal.
- For every 0.1% increase in SG&A to revenue, we estimate 2024 EPS to fall 3.1%, and vice versa, all else being equal.

- F	FSSIA	ES	iG r	ating	J
	*	★	\star	\star	

78.53 /100

Score	Implication
>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.
	>79-100 >59-79 >39-59 >19-39

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 09-Apr-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
