THAILAND / FOOD & BEVERAGE

BUY

UNCHANGED

Higher temperature, higher profit

- 1Q24 net profit might be better than expected and hit its 10-year high.
- Hot weather and high season would support a record-high 2Q24 utilization rate.
- Reiterate a BUY call with the same TP of THB21.

1Q24 profit might be better than expected

We forecast 1Q24 core profit at THB350m (+18.7% q-q, +58% y-y), the highest in 10 years, despite insignificant revenue from new energy drinks, since ready-to-drink green tea continued to perform well in both traditional and modern trade channels due to hot weather. To elaborate, we expect total revenue to reach a new high of THB2.15b (+2% q-q, +17.5% y-y). It should support 1Q24 average utilization rate to 77% after a surge to 89.6% in March. Additionally, we expect the gross margin to improve by 50 bps q-q to 25%, better than our previous estimate. Finally, we expect Indonesia to make a turnaround and contribute a profit of THB12m, up from a loss of THB8m in 4Q23 after adjusting its strategy.

Expect higher utilization rate in 2Q24, supported by hot weather

Given increasingly hot weather and high season, ready-to-drink green tea sales should continue to soar in May, resulting in a higher 2Q24 average utilization rate estimate of c80-85%. Moreover, we expect higher revenue recognition from energy drinks due to improved production efficiency at the OEM unit, while ICHI is looking for more OEMs to accelerate product distribution. Our initial view of the 2Q24 profit trend remains positive, with a potential for further improvement to cTHB370-380m before slowing down in 3Q24 due to seasonal factors.

Land sale gain may support 2H24 net profit and extra dividend

We maintain our 2024E core profit of THB1.2b (+7.4% y-y). Our view of seasonally slow 2H24 operations remains unchanged. However, 2H24 net profit may continue improving if ICHI recognizes an extra gain from land sales this year since Hon Shin (Thailand), the buyer, is applying for BOI privileges. Although gain from land sale is a one-time item, ICHI may use it to pay future dividends to its shareholders.

Reiterate a BUY recommendation with our TP of THB21

We reiterate a BUY recommendation with our target price of THB21 (based on a PE of 23x, unchanged) since it offers an upside of 21%. In the short run, the momentum is strong, and the production capacity is expanding. ICHI is preparing to order machinery, and a test run should start as planned in Nov 2024.

Investment thesis

ICHI is a manufacturer and distributor of ready-to-drink green tea called “ICHITAN green tea”, the herbal drink “Yen Yen”, and green tea with chewy coconut cubes named “ICHITAN Chew Chew”, along with other beverages. In 2023, 91.7% of ICHI’s revenue came from domestic sales, and overseas sales accounted for 8.3%. ICHI’s factory is located at Rojana Industrial Park, Ayutthaya, which has seven bottle production lines and two UHT box product lines with a total capacity of 1,500 million bottles and 200 million boxes per year. ICHI plans to increase its capacity to 1,700 million bottles in 4Q24.

Company profile

Ichitan Group manufactures its own-branded beverages and sells ready-to-drink green tea beverages, herbal drinks, and low-sugar ready-to-drink tea beverages to the local market and CLMV. In 2014, ICHI engaged in a joint venture with the Indonesian company PT Atri Pasifik to produce and sell its products in Indonesia.

www.ichitangroup.com

Principal activities (revenue, 2023)

- Ready-to-drink green tea - 69.1 %
- Non-tea and others - 30.9 %

Source: Ichitan Group

Major shareholders

- Passakornnatee Family - 41.6 %
- Others - 58.4 %

Source: Ichitan Group

Catalysts

Potential catalysts for ICHI’s earnings growth in 2024 are 1) revenue growth, driven by rising sales volumes; 2) declining packaging costs; 3) successful new product launches; and 4) successful original equipment manufacturer (OEM) customer products.

Risks to our call

Downside risks to our P/E-based TP would be 1) a slower-than-expected consumption recovery; 2) high volatility in packaging costs; and 3) increased competition and government policy changes such as excise taxes for sugary drinks.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2024 net profit to rise by 1%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 3.8%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A to sales, we estimate 2024 net profit to fall by 2%, and vice versa, all else being equal.

Disclaimer for ESG scoring

ESG score	Methodology	Rating																												
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.	Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.																												
Sustainability Investment List (THSI) by The Stock Exchange of Thailand (SET)	THSI quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.	To be eligible for THSI inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETTHSI Index is extended from the THSI companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.																												
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.	Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).																												
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i>	The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.																												
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i>	The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.																												
Morningstar Sustainalytics	The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i>	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th>NEGL</th> <th>Low</th> <th>Medium</th> <th>High</th> <th>Severe</th> </tr> </thead> <tbody> <tr> <td>0-10</td> <td>10-20</td> <td>20-30</td> <td>30-40</td> <td>40+</td> </tr> </tbody> </table>	NEGL	Low	Medium	High	Severe	0-10	10-20	20-30	30-40	40+																		
NEGL	Low	Medium	High	Severe																										
0-10	10-20	20-30	30-40	40+																										
ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.	The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.																												
MSCI	MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table border="0" style="margin-left: 20px;"> <tr> <td style="vertical-align: top;">AAA</td> <td style="vertical-align: top;">8.571-10.000</td> <td style="vertical-align: top;">Leader:</td> <td style="vertical-align: top;">leading its industry in managing the most significant ESG risks and opportunities</td> </tr> <tr> <td style="vertical-align: top;">AA</td> <td style="vertical-align: top;">7.143-8.570</td> <td></td> <td></td> </tr> <tr> <td style="vertical-align: top;">A</td> <td style="vertical-align: top;">5.714-7.142</td> <td></td> <td></td> </tr> <tr> <td style="vertical-align: top;">BBB</td> <td style="vertical-align: top;">4.286-5.713</td> <td style="vertical-align: top;">Average:</td> <td style="vertical-align: top;">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td> </tr> <tr> <td style="vertical-align: top;">BB</td> <td style="vertical-align: top;">2.857-4.285</td> <td></td> <td></td> </tr> <tr> <td style="vertical-align: top;">B</td> <td style="vertical-align: top;">1.429-2.856</td> <td></td> <td></td> </tr> <tr> <td style="vertical-align: top;">CCC</td> <td style="vertical-align: top;">0.000-1.428</td> <td style="vertical-align: top;">Laggard:</td> <td style="vertical-align: top;">lagging its industry based on its high exposure and failure to manage significant ESG risks</td> </tr> </table>	AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities	AA	7.143-8.570			A	5.714-7.142			BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers	BB	2.857-4.285			B	1.429-2.856			CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks

A	5.714-7.142																													
BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers																											
BB	2.857-4.285																													
B	1.429-2.856																													
CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks																											
Moody's ESG solutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.																													
Refinitiv ESG rating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i>																													
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.																													
Bloomberg	ESG Score	Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.																												
Bloomberg	ESG Disclosure Score	Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.																												

Rating regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) "**CG Score**"; 2) "**AGM Level**"; 3) "**Thai CAC**"; and 4) **THSI**. The ratings are updated on an annual basis. FSSIA does not confirm nor certify the accuracy of such ratings.

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 29-Apr-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
