EQUITY RESEARCH - COMPANY REPORT

I-TAIL CORPORATION

THAILAND / FOOD & BEVERAGE

Expect highest profit in 7 quarters

- ITC has secured orders worth 110% and 25% of its 2Q24 and 3Q24 sales targets, respectively.
- We anticipate 2Q24 net profit to grow by 16% q-q and 113% y-y to reach a seven-quarter high.
- Reaffirm BUY call with TP of THB27.

2Q24 orders have secured 110% of ITC's target

Currently, ITC has secured orders worth 110% and 25% of its 2Q24 and 3Q24 sales targets, respectively, subject to the availability of shipping capacity for customers. However, we still assume that ITC can deliver 100% of its sales target in 2Q24 at around THB4.5b (+12% q-q, +39% yv), with U.S. customer demand expected to recover well after a major customer postponed its orders from 1Q24. We also expect the 2Q24 premium product mix to remain high at 49.7%, similar to 1Q24.

Starting new production lines but expect GM to remain high

We expect the 2Q24 gross margin to remain high, similar to 1Q24 at 25.7% due to 1) a high proportion of premium products; 2) reduced costs from lower tuna prices; 3) a higher utilization rate following increased orders; and 4) a weakening Thai baht. Initially, we anticipate them to fully offset higher depreciation expenses brought on by new production lines starting in June. Specifically, they should incur additional depreciation costs of cTHB20m per month. In addition, we project 2Q24 SG&A to sales would decrease to 6.8% from 7.7% in 1Q24 and 9.2% in 2Q23. However, we expect the 2Q24 effective tax rate to increase to 3-5% in line with ITC's target, up from 0.9% in 1Q24, following U.S. sales growth.

Expect 2Q24 net profit to reach a seven-quarter high

We anticipate a 2Q24 core profit of THB969m (+10% q-q, +124% y-y). Due to baht depreciation, we expect ITC to incur an FX loss of THB20m. Therefore, its 2Q24 net profit would be THB949m (+16% q-q, +113% y-y) - a seven-quarter high. Assuming in-line profit, ITC's 1H24 net profit would equal THB1.77b (+103% y-y), accounting for 55% of our full-year estimate. ITC might decrease its 2H24 selling price by 3-5%. However, seasonal demand factors remain strong, and management expects orders in 4Q24 to be the highest of the year. It should help offset the negative impact of reduced selling prices and higher depreciation costs. If the company's net profits in 2H24 remain robust, similar to those in 1H24, it would generate an upside of 8-9% on our full-year estimate for 2024.

Reaffirm BUY call with TP of THB27

We maintain our 2024 net profit of THB3.2b (+39% y-y) and our TP of THB27, based on a PE ratio of 25x, implying an upside of 17%. We also like the earning momentum, which has a chance to see ITC's profit return to THB1b per quarter and start to see an upside to our earnings estimates.

Investment thesis

ITC is a leading global pet food manufacturer. It has cost and innovation advantages due partly to its parent company, Thai Union Group (TU TB), a leading global tuna processor. Also, its management has extensive experience of over 20 years. They help make it possible for ITC to respond to changing customer needs and maintain a good relationship with global pet food brands.

Additionally, increased pet ownership should encourage continued growth in the global pet food market value. In 2024, ITC plans to expand its capacity by 17-18% to cope with pet food growth and develop new value-added products to enhance profitability.

Company profile

Revenue-wise, ITC is in the world's top 10 pet food producers and the second largest in Asia. Also, it is a global pet care company of TU, which has been operating a pet food business since 1977. ITC has two factories in Samut Sakhon and Songkhla. It distributes products globally. In 2023, its revenue came mainly from the U.S. (50.3% of total revenue), followed by Asia, Oceania, and others (37.1%), and Europe (12.6%).

Catalysts

Potential catalysts for ITC's earnings growth in 2024 are 1) revenue growth from existing customers in line with the industry and new customers, 2) capacity expansion, and 3) lower raw material costs.

Risks to our call

Downside risks to our P/E-based TP include 1) a slower-than-expected recovery in purchasing power, 2) more fluctuating raw material prices than expected, 3) a stronger-than-expected THB, and 4) labor shortages.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2024 net profit to rise by 0.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 2.9%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A, we estimate 2024 net profit to fall by 2.8%, and vice versa, all else being equal.

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 17-Jun-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
