# European events to drive 2Q24 record high profit

- Weak share prices present an opportunity to accumulate stocks, premised on a high potential of a record-high core profit in 2Q24.
- Strong industry parameters in Spain, Germany, and France during 2Q-3Q24; expect NHH's RevPAR to grow by 8-10% in 2Q24.
- Maintain BUY with a DCF-TP of THB44/shr.

#### Positive catalysts in Spain, Germany, and France

According to STR, several parameters indicate a strong performance for European hotels in the high tourism season in 2Q-3Q24. First, the RevPAR of its Madrid hotel jumped by 24% y-y in April, driven by The Madrid Open (tennis tournament) and UEFA Champions League quarterfinals. In addition, the RevPAR of Spain hotels jumped by 23% y-y from 26 May to 1 Jun, driven by Taylor Swift's concerts in Madrid. Secondly, the RevPAR of Berlin hotels jumped by 9% y-y in May, led by several events (CWIEME Berlin, Carnival of Cultures, Desertfest Berlin, and the Global Business Summit). In addition, according to SiteMinder, UEFA Euro 2024 would boost the booking volume of its hotels in Germany by 29% y-y in June and July with an 11% y-y higher ADR. Lastly, according to CoStar, the forward hotel bookings of Paris hotels (as of April) for the 2024 Olympics hit 60%, increasing from 50% three months ago.

#### RevPAR of NHH in 1H24 is already higher than our forecast

NHH has owned and leased room contributions in Spain, Germany, and France at 20%, 21%, and 2%, respectively. Thus, we expect a strong performance of European hotels in 2Q-3Q24. According to MINT, the RevPAR of European hotels is likely to grow by 7-9% y-y in April and May, while the forward bookings in June and July remain strong. Therefore, we expect at least a high single-digit RevPAR growth in 2Q24. This would imply around 10% y-y RevPAR growth of European hotels in 1H24, ahead of our 4% growth forecast for 2024.

#### Expect 2Q24 core profit to go beyond THB3.0b

Aside from robust European hotels, we expect the RevPAR of Thai hotels to grow by c10% y-y in 2Q24. With healthy growth in the two major portfolios, we believe MINT to deliver a record-high quarterly core profit in 2Q24 (vs the current record of THB3.0b in 2Q23).

#### Share prices underperform global peers

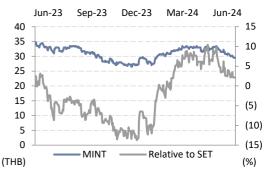

MINT traded at a cheap valuation of only 20x 2024 P/E, lower than its global peer average of 28x. The share prices underperformed global hotel operators by 10% YTD and 52% since the Covid pandemic, unjustified in our view, given that its core profit should hit a new record high in 2024.

#### Exhibit 11: FSSIA ESG score implication

84.43 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 18-Jun-2024 unless otherwise stated.

#### RECOMMENDATION STRUCTURE

#### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
