UP/DOWNSIDE	+27.4%
TD ve CONSENSUS	+4 2%

Another step toward downstream

- SCGP completed a 90% acquisition of VEM (Thailand), a manufacturer of high-performance plastic injection molding parts.
- This M&P should strengthen SCGP's healthcare packaging and supplies business.
- Reiterate our BUY rating with the same TP of THB43.

Another step to fulfill downstream portfolio

SCGP announced that its wholly owned subsidiary - SCGP Solutions (Singapore) Pte. Ltd. - acquired a 90% stake in VEM (Thailand) Co., Ltd. (VEM-TH), a manufacturer of high-performance plastic injection molding parts based in Rojana Industrial Park in Rayong. The total investment does not exceed USD4m or cTHB146m, equal to 0.1% of SCGP's 1Q24 total assets. The revenue recognition from VEM Thailand starts from July 2024 onward.

VEM Thailand is part of the strategic direction for healthcare unit

VEM Thailand is a part of VEM Group, a global provider of high-quality medical mold tooling and cleanroom injection molding. VEM Thailand is specialized in polymer injection molding with a focus on the automotive, aircraft, and medical industries. Its operation is ISO 13485 facility standard and has ISO class 8 and class 7 cleanrooms for medical devices. VEM Thailand has a capacity of 30 production lines. manufacturing over 59m pieces of high-quality products a year.

Small EBITDA contribution; synergies in the future

In 2023, VEM Thailand's total assets were worth cTHB455m (equal to 0.2% of SCGP's total assets) and it generated revenue of cTHB302m (0.2% of SCGP's revenue), with an EBITDA margin of c14-15%, close to that of SCGP's downstream operations and approximately 0.3% of SCGP's 2023 EBITDA. Although the EBITDA contribution from VEM Thailand may be negligible in the short term, this merger and partnership (M&P) should strengthen SCGP's healthcare packaging and supplies business, driven by the aging society trend. Additionally, synergies with SCGP's investments in Deltalab S.L. in Spain and Bicappa Lab S.r.L in Italy should manifest in the future.

Reiterate our BUY rating with the same TP of THB43

We believe SCGP's operations have been recovering along with the rising consumption globally. We maintain our profit forecast and TP of THB43.00 (DCF, 10.7% WACC, 3.1% LTG). SCGP is trading at 9.7x 2024E EV/EBITDA, -1.3SD of its four-year average. We reiterate our BUY call on its undemanding valuations.

Exhibit 4: FSSIA ESG score implication

81.93 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 28-Jun-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
