# NSL FOODS   NSL TB

THAILAND / FOOD & BEVERAGE

So far so good

- We expect NSL's 2Q24 revenue to grow better than CPALL's, and its net profit may reach a record high.
- We like the strong growth momentum and good financial position with low D/E but high ROE.
- Retain BUY call with unchanged TP of THB36.

Expect 2Q24 to reach a new profit high

We expect a 2Q24 net profit of THB133m (+4.2% q-q, +60% y-y), a new profit high. The main driver of this growth would be the continued strong revenue, which we project to grow by 4.6% q-q and 21% y-y. This growth is expected to be higher than 7-Eleven's same-store sales growth (SSSG) of 4% y-y and CPALL's 2Q24 total revenue of +5.8% y-y, as forecast by FSSIA. Not only are NSL's existing hot sandwich products continuing to sell well due to seasonal factors, as 2Q is typically a peak season after 4Q, but NSL has also been launching new products continuously, such as new flavors of Macaron, Yoko Donut by BAW, and Egg Tart Sandwich, which have received very positive feedback.

High gross margin, but associates have not recovered

Based on a production capacity utilization rate of around 70-75% and the expectation that raw material prices have remained stable, we project a 2Q24 gross margin at 20.7%, similar to 1Q24 and higher than 18.4% in 2Q23. However, we expect a higher loss contribution from Pen1 at THB2.5m from THB0.2m in 1Q24 due to Pen1's increased losses from promotional activities to clear inventory. As of the end of 1Q24, the net investment in Pen1 was THB5.9m, and we are still monitoring Pen1's business plan. Aside from that, we forecast NSL Intertrade to have a minor loss, and it is currently expanding in the overseas market.

Upside potential for our profit forecast this year

Assuming in-line results, NSL's 1H24 net profit would equal THB261m (+64% y-y), accounting for 60% of our full-year forecast. We expect 3Q24 net profit to be flat or slightly weaker q-q due to seasonal factors, and it should rebound in 4Q24 to reach another record high in line with the peak season for the business. Therefore, we are starting to see an upside potential of c15% from our current 2024E profit of THB434m (+30% y-y).

Strong earnings momentum and financial position

We maintain our TP at THB36, based on an unchanged P/E of 25x. There is an upside of 15%. We like the strong growth momentum and NSL's competitive edge in having a prominent R&D team, which can develop new products that are pleasing to consumers. Furthermore, NSL has extended its contract with 7-Eleven until 2031, along with its good financial position with a low D/E ratio of 0.59x and high ROE of 25%. We still recommend BUY.

Investment thesis

Besides growth in tandem with 7-Eleven, NSL continues to launch new bakery products to create a good impression and cope with rapidly changing consumer needs. It also plans to raise non-7-Eleven revenue to diversify dependency risks by introducing branded snacks and entering the food services business. In its latest move, NSL has invested in two subsidiaries, Bake A Wish and NSL Intertrade, to further its future growth.

Company profile

NSL is a manufacturer and distributor of bakery products, appetisers (under CPALL brands, such as EZY Taste, EZY Sweet, and 7 Fresh), and snacks (under NSL brands). It is also in the food services business covering seafood, fish, meats, and frozen vegetables. NSL earns its revenue mainly from domestic sales, with CPALL as its key account. Moreover, it sells food services products to the HoReCa market and other modern trade distributors. It currently has four factories in Chonburi and Nontaburi.

Catalysts

Potential catalysts for NSL's earnings growth in 2024 are 1) revenue growth driven by new product launches and a tourism recovery; 2) new 7-Eleven branch expansions; and 3) a decline in raw material costs that should offset higher utility costs.

Risks to our call

Downside risks to our DCF-based TP include 1) a slower-than-expected consumption recovery; 2) high volatility in raw material prices; 3) the failure of new products; and 4) changing consumer demand and lifestyles.

Earnings sensitivity

- For every 1% increase in revenue, we estimate 2024 net profit to rise by 0.9%, and vice versa, all else being equal.

- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 5.2%, and vice versa, all else being equal.

- For every 0.5% increase in SG&A to sales, we estimate 2024 net profit to fall by 5%, and vice versa, all else being equal.

Disclaimer for ESG scoring

ESG score	Methodology	Rating
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.	Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.
Sustainability Investment List (THSI) by The Stock Exchange of Thailand (SET)	THSI quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.	To be eligible for **THSI inclusion**, verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. **SETTHSI Index** is extended from the THSI companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.	Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). *(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)*	The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. *(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)*	The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.
Morningstar Sustainalytics	The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. *Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.*	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. NEGL 0-10, Low 10-20, Medium 20-30, High 30-40, Severe 40+
ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.	The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.

For Morningstar Sustainalytics rating:

NEGL	Low	Medium	High	Severe
0-10	10-20	20-30	30-40	40+

MSCI — MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers.

Rating	Range		
AAA	8.571-10.000	**Leader:**	leading its industry in managing the most significant ESG risks and opportunities
AA	7.143-8.570		
A	5.714-7.142		
BBB	4.286-5.713	**Average:**	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers
BB	2.857-4.285		
B	1.429-2.856		
CCC	0.000-1.428	**Laggard:**	lagging its industry based on its high exposure and failure to manage significant ESG risks

ESG score	Methodology	Rating
Moody's ESG solutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.	
Refinitiv ESG rating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. *(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)*	
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.	
Bloomberg	ESG Score	Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.
Bloomberg	ESG Disclosure Score	Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.

Rating regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) "**CG Score**"; 2) "**AGM Level**"; 3) "**Thai CAC**"; and 4) **THSI**. The ratings are updated on an annual basis. FSSIA does not confirm nor certify the accuracy of such ratings.

All share prices are as at market close on 15-Jul-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.
HOLD (H). The upside or downside is less than 10%.
REDUCE (R). The downside is 10% or more.
Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.
Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.
Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
