#### EQUITY RESEARCH - COMPANY REPORT

# SRINANAPORN MARKETING

THAILAND / FOOD & BEVERAGE

# Share price reflects low growth

- 2Q24 profit may reach THB161m (+2% q-q, +2.5% y-y), which is lower than our previous forecast of THB170m.
- We have lowered 2024E net profit by 7% to grow only 4.7% y-y.
- Cut TP to THB15.5 with a lower target P/E to reflect the low growth.

#### 2Q24 profit may grow less than expected

SNNP's 2Q24 profit may reach THB161m (+2% q-q, +2.5% y-y), which is lower than our previous forecast of THB170m (+9% y-y) due to slowerthan-expected revenue growth estimated at 5% y-y in both domestic and overseas markets. This is due to sluggish consumer demand, especially in traditional trade channels. Meanwhile, we expect 2Q24 revenue from Vietnam to grow only 3% q-q and remain flat y-y due to purchasing power issues. In addition, we project the 2Q24 gross margin to decline to 29% from 29.5% in 1Q24, but remain higher than 27.9% in 2Q23.

#### SNNP maintains its challenging target

Management still targets a 10% increase in total revenue this year, though we expect 1H24 revenue growth of only 3.2% y-y. SNNP is preparing to launch more marketing campaigns through modern trade channels in 2H24, in addition to introducing more new products. We forecast 1H24 revenue from Vietnam of THB325m (+3.5% y-y). There is a possibility that Vietnam revenue for 2024 may remain flat or decline from last year's THB784m. However, SNNP still aims for overseas revenue growth in the double digits, citing the Philippines as a key driver, with a target of not less than THB100m for the entire year.

#### Revising down 2024E net profit and target price

Due to slower-than-expected revenue growth, we have revised our revenue assumption for 2024 to 4.8% growth from 6.6%. We have reduced our Vietnam revenue assumption by 8% to THB750m (-4.3% y-y) and added Philippines revenue of THB60m. As a result, we have lowered our 2024E net profit by 7% to THB666m (+4.7% y-y). We estimate that 1H24 earnings will account for 48% of our full-year estimate. We have also lowered our TP to THB15.5, with a lower P/E ratio of 22x, in line with the average of the food and beverage industry.

#### Share price has reflected all bad news

SNNP's share price has fallen by 26% YTD, and is currently trading at a P/E of 18-19x, which reflects the company's earnings recovery. At present, we still see the ability to maintain profit margins and stability. We also expect the share price to rebound again when there is a new growth story. Our new TP has an upside of 18%, so we maintain our BUY rating.

PREPARED BY FSS INTERNATIONAL INVESTMENT ADVISORY SECURITIES CO LTD (FSSIA). ANALYST CERTIFICATION AND IMPORTANT DISCLOSURES CAN BE FOUND AT THE END OF THIS REPORT

#### **Investment thesis**

SNNP is a leader in the snacks and jelly market in Thailand. It has three famous brands, including Bento, Jele, and Lotus. SNNP sells in both Thailand and abroad. Its crucial export market is CLMV. At the end of 2023, domestic sales made the highest contribution at c73% of total revenue, followed by CLMV (20%) and others (7%).

We have a neutral view of SNNP's short-term growth in 2024 due to sluggish consumer demand. However, SNNP is preparing to launch more marketing campaigns through modern trade channels in 2H24, in addition to introducing more new products. Aside from that, if the company is successful in new markets such as the Philippines, South Korea, and China, these could be new growth drivers for SNNP in the future, providing upside potential to our earnings estimates for 2025-26.

#### **Company profile**

SNNP was founded in 1972 under the name of Sri Viwat. The company has been a manufacturer and distributor of snack foods for more than 30 years. It has many product categories with a lot of variety, such as jelly, fruit juice with carrageenan and konjac powder, fish and squid products, fruit and herb drinks, etc.

www.snnp.co.th

#### Catalysts

Potential catalysts for SNNP's earnings growth in 2024 are 1) domestic revenue growth, driven by new products; 2) overseas revenue growth, driven by its new plant and a channel expansion in Vietnam; and 3) a higher gross margin, supported by a higher utilization rate.

#### **Risks to our call**

Downside risks to our P/E-based TP include 1) a slowerthan-expected consumption recovery; 2) a potential rise in raw material costs; 3) a slower-than-expected capacity expansion; and 4) unsuccessful new products.

#### Key assumptions

|                          | 2024E | 2025E | 2026E |
|--------------------------|-------|-------|-------|
| Domestic revenue (THB m) | 4,576 | 5,034 | 5,436 |
| Overseas revenue (THB m) | 1,727 | 1,934 | 2,128 |
| Total revenue (THB m)    | 6,303 | 6,968 | 7,564 |
| Total revenue growth (%) | 4.8   | 10.5  | 8.6   |
| Gross margin (%)         | 29.2  | 29.4  | 29.5  |
| SG&A to sales (%)        | 16.0  | 16.0  | 16.0  |

Source: FSSIA estimates

#### **Earnings sensitivity**

- For every 1% increase in revenue, we estimate 2024 net profit to rise by 0.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 3.8%, and vice versa, all else being equal.
- For every 0.2% increase in SG&A, we estimate 2024 net profit to fall by 1.6%, and vice versa, all else being equal.

#### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 15-Jul-2024 unless otherwise stated.

#### **RECOMMENDATION STRUCTURE**

#### **Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
