2Q24 profit beat but deteriorated asset quality

- The mark-to-market FVTPL investment gains drove the better-than-expected 2Q24 net profit; excluding it, the profit was in line.
- Asset quality continued deteriorating but was manageable and aligned with the guidance for its NPL ratio and credit cost.
- We have downgraded our rating to HOLD (from Buy) with a 2024 TP of THB157.

2Q24 profit beat our forecast from MTM investment gains

The 2Q24 net profit rose sharply by 12.2% q-q and 4.6% y-y, amounting to 11.8THBb, beating our forecast and BBG consensus by 9.6% and 12.8%, respectively. PPOP was better than expected, marking a significant increase of 10.3% q-q and 8.9% y-y, buoyed by 1) higher-than-expected non-NII, mark-to-market FVTPL investment gains of THB2.42b, and 2) lower-than-expected effective tax rate. Loans contracted 0.6% q-q as expected (but +0.8% y-y and +1.8%YTD), dragged by corporate repayment (domestic and international) after a massive surge at the end of 1Q24, aligning with its 3-5% loan growth guidance in 2024. NIM posted a slight drop, by 3bp to 2.94%, pressured by a rise in the cost of funds. The cost-to-income ratio was narrower q-q to 44.1% against the backdrop of accelerated non-NII.

Deteriorated but manageable asset quality

The 2Q24 NPL ratio mounted more aggressively than expected to 3.64% due mainly to 1) relapsed restructured loans in the manufacturing and commercial segment, with a broad base, not a specific industry, 2) the continued contraction of the loan base, and 3) its practice to write off aggressively in 4Q (2Q24 figure was cTHB1b). In addition, BBL pointed out that its stage 2 loans also surged significantly from the longer-than-expected reclassification. However, it reaffirmed that the international loan quality had no alarms in 2Q24. The credit cost spiked higher than expected to 153 bp, exceeding its c100-bp guidance in 2024, thanks to the MTM investment gain booking. However, the abnormal 1H24 credit cost level of 140bp still aligned with BBL's desire to set aside ECL reserve heavily in 1H24 before decreasing it in 2H24. Consequently, the 2Q24 coverage ratio finished at 283%, which remained the highest in the industry.

Maintain 2024-26 forecast; NII and fee growths are key catalysts

We retain our 2024-26 forecast with a 3.7% CAGR, assuming a stable NIM (stable 2024 RP rate) and a slight increase in the credit cost (to factor in the sluggish economic recovery and rising concerns over its corporate loan quality) exceeding its c100bp guidance.

Downgrade to HOLD; maintain 2024 TP of THB157

We have downgraded our recommendation to HOLD (from Buy) for its attractive dividend yield of c5-6% p.a. Our rating cut reflected rising concerns over its asset quality. However, we maintain our 2024 GGM-based TP of THB157, implying a P/BV of 0.54x (under an expected LT-ROE of 7.0% and COE of 12.2%).

PREPARED BY FSS INTERNATIONAL INVESTMENT ADVISORY SECURITIES CO LTD (FSSIA). ANALYST CERTIFICATION AND IMPORTANT DISCLOSURES CAN BE FOUND AT THE END OF THIS REPORT

Investment thesis

We have a HOLD call for BBL for factors including

- Despite some hiccups during a couple of quarters – a slowdown in the Chinese and Vietnamese economies and rising concerns in the large corporate segment – BBL could deliver a resilient net profit, thanks to its NIM strength following an interest rate hike in 2023.
- Its asset quality has shown some deteriorating signs in 2Q24. However, its coverage ratio (LLR/NPL) remained the highest in the industry. Meanwhile, we expect BBL to retain its practice of aggressive write-off in 4Qs.
- Our rating cut reflected rising concerns over its asset quality. However, we maintain our 2024 GGM base TP of THB157, implying a P/BV of 0.54x (under an expected LT-ROE of 7.0% and COE of 12.2%). We expect the bank to deliver an attractive 2024-26 dividend yield of c5-6% p.a.

Company profile

Bangkok Bank is a leading bank in Thailand and a major regional bank in Southeast Asia. It is a market leader in corporate and business banking, with a large retail customer base.

www.bangkokbank.com

Principal activities (revenue, 1H24)

- Net interest income - 78.1 %
- Non-interest income - 21.9 %

Source: Bangkok Bank

Major shareholders

- Thai NVDR - 23.2 %
- Social Security Office - 2.7 %
- State Street Europe Ltd - 2.5 %
- Others - 71.6 %

Source: Bangkok Bank

Catalysts

Potential share price catalysts for BBL include:

- Higher foreign direct investments (FDIs) into Thailand and ASEAN countries.
- The Bank of Thailand's above-expectation increase in its policy rate.
- A lower credit cost from better-than-expected asset quality.

Risks to our call

Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) an impact of new regulations from the Bank of Thailand.

2Q24 profit beat our forecast from MTM investment gains

The 2Q24 net profit rose sharply by 12.2% q-q and 4.6% y-y, amounting to 11.8THBb, beating our forecast and BBG consensus by 9.6% and 12.8%, respectively. PPOP was also better than expected, marking a significant increase of 10.3% q-q and 8.9% y-y, buoyed by 1) higher-than-expected non-NII, mark-to-market FVTPL investment gains of THB2.42b, and 2) lower-than-expected effective tax rate. Loans contracted 0.6% q-q as expected (but +0.8% y-y and +1.8%YTD), dragged by corporate repayment (domestic and international) after a massive surge at the end of 1Q24, aligning with its 3-5% loan growth guidance in 2024. NIM posted a slight drop, as expected, by 3bp to 2.94%, pressured by a rise in the cost of funds but flattened loan yields. As expected, the net fee income shrank slightly following its lending activity and seasonal effect. The cost-to-income ratio was narrower q-q to 44.1% against the backdrop of accelerated non-NII. Overall, the 1H24 net profit jumped by 4.2% y-y, accounting for 53% of our full-year net profit forecast.

Deteriorated but manageable asset quality

The 2Q24 NPL ratio mounted more aggressively than expected to 3.64% due mainly to 1) relapsed restructured loans in the manufacturing and commercial segment, with a broad base, not a specific industry, 2) the continued contraction of the loan base, and 3) its practice to write off aggressively in 4Q (2Q24 figure was cTHB1b).

In addition, BBL pointed out that its stage 2 loans also surged significantly, despite no exact figures provided, from the longer-than-expected reclassification. However, it reaffirmed that the international loan quality had no alarms in 2Q24. The credit cost spiked higher than expected to 153 bp, exceeding its c100-bp guidance in 2024, thanks to the MTM investment gain booking. However, the abnormal 1H24 credit cost level of 140bp still aligned with BBL's desire to set aside ECL reserve heavily in 1H24 before decreasing it in 2H24. Consequently, the 2Q24 coverage ratio finished at 283%, which remained the highest in the industry.

Maintain 2024-26 forecast; NII and fee growths are key catalysts

We retain our 2024-26 forecast with a 3.7% CAGR, assuming a stable NIM (stable 2024 RP rate) and a slight increase in the credit cost (to factor in the sluggish economic recovery and rising concerns over its corporate loan quality) exceeding its c100bp guidance.

Downgrade to HOLD; maintain 2024 TP of THB157

We have downgraded our recommendation to HOLD (from Buy) for its attractive dividend yield of c5-6% p.a. Our rating cut reflected rising concerns over its asset quality. However, we maintain our 2024 GGM-based TP of THB157, implying a P/BV of 0.54x (under an expected LT-ROE of 7.0% and COE of 12.2%).

Bangkok Bank PCL (BBL TB)

FSSIA ESG rating

★★★★

Exhibit 7: FSSIA ESG score implication

62.08 /100

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★★	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Disclaimer for ESG scoring

ESG score	Methodology	Rating																				
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.	Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.																				
Sustainability Investment List (THSI) by The Stock Exchange of Thailand (SET)	THSI quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.	To be eligible for THSI inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETTHSI Index is extended from the THSI companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.																				
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.	Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).																				
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i>	The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.																				
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i>	The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.																				
Morningstar Sustainalytics	The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i>	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table><tr><th>NEGL</th><th>Low</th><th>Medium</th><th>High</th><th>Severe</th></tr><tr><td>0-10</td><td>10-20</td><td>20-30</td><td>30-40</td><td>40+</td></tr></table>	NEGL	Low	Medium	High	Severe	0-10	10-20	20-30	30-40	40+										
NEGL	Low	Medium	High	Severe																		
0-10	10-20	20-30	30-40	40+																		
ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.	The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.																				
MSCI	MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table><tr><td>AAA</td><td>8.571-10.000</td><td rowspan="3">Leader:</td><td rowspan="3">leading its industry in managing the most significant ESG risks and opportunities</td></tr><tr><td>AA</td><td>7.143-8.570</td></tr><tr><td>A</td><td>5.714-7.142</td></tr><tr><td>BBB</td><td>4.286-5.713</td><td rowspan="2">Average:</td><td rowspan="2">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td></tr><tr><td>BB</td><td>2.857-4.285</td></tr><tr><td>B</td><td>1.429-2.856</td><td rowspan="2">Laggard:</td><td rowspan="2">lagging its industry based on its high exposure and failure to manage significant ESG risks</td></tr><tr><td>CCC</td><td>0.000-1.428</td></tr></table>		AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities	AA	7.143-8.570	A	5.714-7.142	BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers	BB	2.857-4.285	B	1.429-2.856	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks	CCC	0.000-1.428

B	1.429-2.856	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks																			
CCC	0.000-1.428																					
Moody's ESG solutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.																					
Refinitiv ESG rating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i>																					
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.																					
Bloomberg	ESG Score	Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.																				
Bloomberg	ESG Disclosure Score	Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.																				

Rating regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) **"CG Score"**; 2) **"AGM Level"**; 3) **"Thai CAC"**; and 4) **THSI**. The ratings are updated on an annual basis. FSSIA does not confirm nor certify the accuracy of such ratings.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 18-Jul-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
