More visibility on 2024 performance

- KBANK reported an in-line 2Q24 net profit, with a q-q drag from lower NII and higher OPEX.
- We view its 2Q24 asset quality as manageable despite the expected vulnerability in 2H24.
- We raise our 2024 TP to THB145 and upgrade our call to BUY.

2Q24 profit corrected in line with expectation

KBANK delivered an in-line 2Q24 net profit of THB12.6b, dropping by 6.2% q-q but jumping 15.1% y-y, while PPOP rose to THB28.5b, dipping by 3.0% q-q but rising 4.8% y-y. The decrease in net profit q-q was due to 1) weaker-than-expected net interest income by 2.8% q-q (but still increased 2.1% y-y); and 2) higher-than-expected operating expenses (from marketing expenses/IT-related/one-time employee subsidy measure). Thus, the cost-to-income ratio jumped to 43.4% from an abnormal low of 41.3% in 1Q24. However, non-NII increased more than expected, supported by the mark-to-market gains on FVTPL investments of THB3.17b. Net fee income dropped as expected, dragged by decreased credit cards and loan-related fees. 2Q24 loans returned to growth of 1.0% q-q and 1.6% y-y, but were slightly negative at 0.1% YTD, higher than our estimate. The NIM was slightly lower than expected at 3.68%, due to a shrinking loan yield and rising cost of funds.

Asset quality continues to be a critical focus in 2H24

Asset quality was stable in 2Q24 as expected, with no alarms. The NPL ratio (FSSIA's calculation) dipped to 3.64%, while the reported NPL ratio was 3.18%, still in line with its 2024 guidance of not exceeding 3.25%. However, stage 2 loans rose by 1.2% q-q and 3.6% y-y, but the proportion remained stable since 1Q23 at around 7.3-7.4% of total. Credit costs were stable at 189bp, consistent with the 2024 guidance of 175-195bp and below our target of 200bp. Accordingly, the coverage ratio rose to 144% from 142% in 1Q24.

Upward revisions on 2024-26 profit forecast

We have raised our 2024-26 net profit forecasts by 12.1-15.8% due to 1) higher NIM, net fee income, and non-NII assumptions; and 2) the reduction in estimated loan growth and credit cost to align with its 2024 guidance. Consequently, the expected 2024-26 net profit growth rises to 10.1% CAGR, with our anticipated 2026 ROE spiking to 9.4%, close to its guidance of 10%, based on the expected dividend payout ratio increasing to 38-40% compared to 36.3% in 2023.

Upgrade to BUY with a new 2024 TP of THB145

We upgrade our recommendation to BUY from Hold, based on 1) the expectation that KBANK's 2024-26 profit growth will be higher than industry peers; and 2) attractive dividend yields of 6-7% p.a. We also raise the 2024 GGM-TP to THB145 (from THB140) at a P/BV of 0.63x (from 0.61x) under an expected 9.0% LT-ROE (from 7.9%) and 13.80% COE (from 12.36%).

Investment thesis

We have a more favorable view of KBANK's 2H24 business outlook despite several headwinds due to:

- Its lending strategy focuses more on quality, primarily low-yield secured loans, and slows down high-yield unsecured loans – SME and retail segments could prove better for asset quality;
- Its advantages of having the mark-to-market investment gains of the FVTPL investment from its life insurance subsidiary MTL. Despite the negative net premium earned, it could help manage KBANK's performance impact amid the high credit cost level in 2024;
- Given its cheap valuation of 0.5x P/BV at the current share price and a more attractive dividend yield of 6-7% p.a. to approach its challenging double-digit ROE target in 2026, we upgrade our recommendation to BUY from Hold with a new 2024 TP of THB145.

Company profile

Established on 8 June 1945, Kasikornbank was listed on the Stock Exchange of Thailand in 1976. In 3Q23, KBANK's branch declined to 813 from 2019 of 886. Assets in 3Q23 ranked second at 10.7% of the total assets of all Thai commercial banks.

Catalysts

Potential share price catalysts for KBANK include:

- Lower credit cost from better asset quality;
- On-going cost control efficiency;
- The return of foreign funds flows into the Thai stock market.

Risks to our call

Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand.

2Q24 profit q-q corrected in line with expectation

KBANK delivered an in-line 2Q24 net profit of THB12.6b, dropping by 6.2% q-q but jumping 15.1% y-y, while PPOP rose to THB28.5b, dipping by 3.0% q-q but rising 4.8% y-y. The decrease in net profit q-q was due to 1) weaker-than-expected net interest income by 2.8% q-q (but still increased 2.1% y-y); and 2) higher-than-expected operating expenses (from marketing expenses/IT-related/one-time employee subsidy measure) as reflected in the increasing cost-to-income ratio to 43.4% from an abnormal low of 41.3% in 1Q24. The 1H24 cost-to-income ratio of 42.4% was still in line with its 2024 guidance for low to mid-40%.

However, non-NII increased more than expected. Most came from the mark-to-market gains on FVTPL investments of THB3.17b vs our expectation of THB 2.50b, while the net premiums earned from its life insurance business (MTL) showed a lower negative figure. Net fee income dropped as expected, dragged by decreased credit cards, acceptance, approval, and guarantee fees.

Loans in 2Q24 returned to growth of 1.0% q-q and 1.6% y-y, but were still slightly negative at 0.1% YTD, higher than estimated. However, the growth was concentrated at the quarter's end from the corporate (38%) and housing (15%) segments. Meanwhile, SME (28%) and other retail (12%) – credit cards and personal loans – also contracted YTD. Overall, loan growth remains below its 2024 guidance of 3-5% y-y and our estimate of 5.0% y-y, where KBANK reaffirmed the lower-bound approach.

The NIM was slightly lower than expected in 2Q24 at 3.68%, due to a shrinking loan yield. KBANK addressed the issues stemming from 1) its greater emphasis on the secured, low-yield segment; 2) a pricing strategy for good quality customers; and 3) the interest rate reduction campaign for its vulnerable customers (5% of total). However, the 1H24 NIM increased to 3.76%, which was higher than its 2024 guidance of 3.66% and our estimate of 3.60%, as we expect the NIM to continue downward in 2H24.

Manageable asset quality following its prudent credit policy

Asset quality was stable in 2Q24, as expected. Despite no alarms in 2Q24, KBANK reiterated its critical focus in 2024. The NPL ratio (FSSIA's calculation) slightly decreased to 3.64%, while the reported NPL ratio was 3.18%, still in line with its 2024 guidance of not exceeding 3.25%. In addition, the NPL outflow (write-offs and sales) trended downward in 1H24 to 33% of the 2023 figure of THB92.5b, aligning with its 2024 guidance of c70%. However, stage 2 loans increased by 1.2% q-q and 3.6% y-y, but the proportion remained stable at around 7.3-7.4% of total since 1Q23. Credit costs were stable in the quarter at 189bp, consistent with the 2024 guidance of 175-195bp and below our target of 200bp. Accordingly, the coverage ratio rose slightly to 144% from 142% in 1Q24.

Regarding the EA loan issue, KBANK disclosed a minimal impact on its ECLs, fully reserved, and other financial targets following its shallow exposure to the customer. For ITD, the bank reaffirmed the better situation since the company had acquired new funding support from the consortium banks, while KBANK had already set aside partial reserves and classified the loans as stage 2.

Upward revisions on 2024-26 profit forecast

Since the 1H24 profit represented 62% of our previous 2024 estimate, we have raised our 2024-26 net profit forecasts by 12.1%, 14.3%, and 15.8%, respectively, due to higher NIM, net fee income, and non-NII assumptions. Meanwhile, we have lowered our estimated loan growth and credit cost to align with its 2024 guidance. Consequently, the expected 2024-26 net profit growth rises to 10.1% CAGR, with our anticipated 2026 ROE spiking to 9.4%, close to its guidance of 10%, based on the expected dividend payout ratio increasing to 38-40% compared to 36.3% in 2023.

FSSIA ESG rating

★★★★★

Exhibit 9: FSSIA ESG score implication

84.17 /100

| Rating | Score | Implication |
|--------|---------|--|
| ★★★★★ | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability. |
| ★★★★ | >59-79 | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers. |
| ★★★ | >39-59 | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually. |
| ★★ | >19-39 | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable. |
| ★ | 1-19 | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

Disclaimer for ESG scoring

| ESG score | Methodology | Rating | | | | | | | | | | | | | | | | | | | |
|---|--|---|---|----------------|---|-----------|-------------|----------|-------------|------------|-------------|-----------------|---|-----------|-------------|----------|-------------|------------|-------------|-----------------|---|
| The Dow Jones Sustainability Indices (DJSI) By S&P Global | The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion. | Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe. | | | | | | | | | | | | | | | | | | | |
| Sustainability Investment List (THSI) by The Stock Exchange of Thailand (SET) | THSI quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years. | To be eligible for THSI inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETTHSI Index is extended from the THSI companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks. | | | | | | | | | | | | | | | | | | | |
| CG Score by Thai Institute of Directors Association (Thai IOD) | An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations. | Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%). | | | | | | | | | | | | | | | | | | | |
| AGM level By Thai Investors Association (TIA) with support from the SEC | It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i> | The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79. | | | | | | | | | | | | | | | | | | | |
| Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC) | The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i> | The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements. | | | | | | | | | | | | | | | | | | | |
| Morningstar Sustainalytics | The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i> | A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table><tr><th>NEGL</th><th>Low</th><th>Medium</th><th>High</th><th>Severe</th></tr><tr><td>0-10</td><td>10-20</td><td>20-30</td><td>30-40</td><td>40+</td></tr></table> | NEGL | Low | Medium | High | Severe | 0-10 | 10-20 | 20-30 | 30-40 | 40+ | | | | | | | | | |
| NEGL | Low | Medium | High | Severe | | | | | | | | | | | | | | | | | |
| 0-10 | 10-20 | 20-30 | 30-40 | 40+ | | | | | | | | | | | | | | | | | |
| ESG Book | The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis. | The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance. | | | | | | | | | | | | | | | | | | | |
| MSCI | MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table><tr><td>AAA</td><td>8.571-10.000</td><td rowspan="3">Leader:</td><td rowspan="3">leading its industry in managing the most significant ESG risks and opportunities</td></tr><tr><td>AA</td><td>7.143-8.570</td></tr><tr><td>A</td><td>5.714-7.142</td></tr><tr><td>BBB</td><td>4.286-5.713</td><td rowspan="3">Average:</td><td rowspan="3">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td></tr><tr><td>BB</td><td>2.857-4.285</td></tr><tr><td>B</td><td>1.429-2.856</td></tr><tr><td>CCC</td><td>0.000-1.428</td><td>Laggard:</td><td>lagging its industry based on its high exposure and failure to manage significant ESG risks</td></tr></table> | AAA | 8.571-10.000 | Leader: | leading its industry in managing the most significant ESG risks and opportunities | AA | 7.143-8.570 | A | 5.714-7.142 | BBB | 4.286-5.713 | Average: | a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers | BB | 2.857-4.285 | B | 1.429-2.856 | CCC | 0.000-1.428 | Laggard: | lagging its industry based on its high exposure and failure to manage significant ESG risks |

| BB | 2.857-4.285 | | | | | | | | | | | | | | | | | | | | |
| B | 1.429-2.856 | | | | | | | | | | | | | | | | | | | | |
| CCC | 0.000-1.428 | Laggard: | lagging its industry based on its high exposure and failure to manage significant ESG risks | | | | | | | | | | | | | | | | | | |
| Moody's ESG solutions | Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term. | | | | | | | | | | | | | | | | | | | | |
| Refinitiv ESG rating | Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i> | | | | | | | | | | | | | | | | | | | | |
| S&P Global | The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100. | | | | | | | | | | | | | | | | | | | | |
| Bloomberg | ESG Score | Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best. | | | | | | | | | | | | | | | | | | | |
| Bloomberg | ESG Disclosure Score | Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point. | | | | | | | | | | | | | | | | | | | |

| Company | Ticker | Price | Rating | Valuation & Risks |
|-----------------------|----------|------------|--------|--|
| Kasikornbank | KBANK TB | THB 128.00 | BUY | Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand. |
| Kiatnakin Phatra Bank | KKP TB | THB 41.00 | HOLD | Downside risks to our GGM-based target price include weakened asset quality and lower fee income. By contrast, upside risks include better capital market conditions, higher used car prices, and strengthened asset quality. |
| Bangkok Bank | BBL TB | THB 132.50 | HOLD | Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand. Upside risks comprise 1) lower credit cost from better asset quality; and 2) better ongoing cost control efficiency. |
| Krung Thai Bank | KTB TB | THB 17.10 | BUY | Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand. |
| SCB X | SCB TB | THB 101.50 | HOLD | Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand. Upside risks comprise 1) the faster-than-expected recovery of EA's operations and financial stability; and 2) a reduction in Thailand's household debt. |
| Tisco Financial | TISCO TB | THB 93.75 | HOLD | Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand. Upside risks are 1) aggressive loan growth; and 2) well-controlled asset quality. |
| TMBThanachart Bank | TTB TB | THB 1.76 | BUY | Downside risks to our GGM-based TP are 1) prolonged economic sluggishness affecting loan growth and asset quality; and 2) the impact of new regulations from the Bank of Thailand. |

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 19-Jul-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
