# EQUITY RESEARCH - COMPANY REPORT

# MINOR INTERNATIONAL THAILAND / FOOD & BEVERAGE

# European hotels shine and drive new profit high

- NHH post a record high core profit of EUR97m (+23% y-y) in 2Q24, beating our estimate by 11%.
- Expect MINT's 2Q24 core profit to grow by 11% y-y and hit a record high of THB3.4b.
- Maintain BUY with a DCF-TP of THB44/shr.

### NHH: an impressive 2Q24 result

NH Hotels' (NHH) 2Q24 RevPAR grew 6% y-y and exceeded the pre-Covid level by 41% with an OCC rate of 73% and ADR of EUR161 (vs 73% and EUR152 in 2Q23). Key drivers were strong ADR growth of hotels in Spain (+10% y-y) and Central Europe (+8% y-y). Its EBITDA margin was relatively flat y-y at 33.5%. Overall, NHH's 2Q24 core profit grew 23% y-y and hit a record high of EUR97m. The result beat our estimate by 11%, mainly due to the higher-than-expected EBITDA margin and lower-than-expected tax rate (21% in 2Q24 vs 27% in 2Q23) following the application of non-activated credits in Spain and Italy and a tax loss in Argentina.

# Non-NHH: strong RevPAR growth in Thailand continues in 2Q24

Thai hotels' RevPAR should grow 13-15% y-y in 2Q24. However, Maldives hotels' RevPAR should drop 3-5% y-y. The hotel & mixed-use business' EBITDA margin should slightly decline to 32% (vs 33% in 2Q23), pressured by lower residential sales and an FX loss from USD loans in Sri Lanka and Brazil, as their currencies depreciated against the USD. For the food business, we expect SSSG to decline by 3% y-y due to a slowdown at its Chinese restaurants (-20-25% y-y), while SSSG of Thai and CLMV restaurants should be relatively flat y-y. The EBITDA margin of its food business should improve to 22% (vs 21% in 2Q23). Overall, we expect MINT's core profit to grow by 11% to a new high of THB3.4b in 2Q24 (current record high is THB3.0b in 2Q23).

### Earnings growth momentum y-y to continue in 3Q24

We expect the strong y-y earnings growth momentum to continue in 3Q24. RevPAR growth in July continued in Europe (+7-8% y-y) and Thailand (+10-12% y-y). In addition, MINT plans to deleverage in 2H24 and targets net IBD/E to decline to 0.8x by the year's end from 0.98x as of 1Q24. This should lead to declining interest expenses going forward.

# Cheap and unjustified valuation

MINT trades at a cheap valuation of only 21x 2024E P/E, lower than its global peers' average of 28x. The share price has underperformed global hotel operators by 7% YTD and 49% since the Covid pandemic, which is unjustified in our view. The share price catalyst is a potential record high profit in 2Q24.

#### Investment thesis

MINT's earnings are now in recovery mode. We expect continued core profit growth in 2024, led by Thai and European hotels and the food business.

NH Hotels (NHH) should continue to deliver a strong performance. We expect a recovery in business travel and pent-up demand from long-haul travelers to be crucial growth drivers in 2024. They should offset rising personnel costs and the potential for further interest rate hikes.

We expect MINT's core profit to exceed the pre-Covid level in 2024, driven by an improved EBITDA margin and lower interest expenses.

There is a potential upside from a wider EBITDA margin following cost-saving measures, which should permanently reduce some expenses.

# **Company profile**

MINT is one of the largest hospitality and leisure companies in the Asia-Pacific region.

#### Catalysts

Key potential growth drivers include 1) a faster occupancy rate ramp-up following a global tourism recovery; 2) improving consumption and economic growth resulting in strong SSSG; and 3) the return of Chinese tourists which should drive demand for Thai and Maldives hotels.

# Risks to our call

Downside risks to our DCF-based target price include 1) extraordinary events such as political turmoil and natural disasters; 2) a higher hotel room supply and higher competition in the F&B business, which may result in price competition; and 3) the slower-than-expected recovery of international tourist numbers.

### Exhibit 14: FSSIA ESG score implication

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 24-Jul-2024 unless otherwise stated.

# **RECOMMENDATION STRUCTURE**

#### **Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
