EQUITY RESEARCH - COMPANY REPORT

DELTA ELECTRONICS

THAILAND / ELECTRONIC COMPONENT

Trading on story driven by Al

- We have revised 2024-26E net profit to reflect higher AI revenue from Delta Taiwan and upcoming revenue from its own AI products in 2025.
- Stock is trading at 2024E P/E of 62x, reflecting high expectation.
- Recommend trading Buy for investors who can accept the risks.

DELTA is developing its own AI products

We have a positive outlook for the analyst meeting on 30 July, as we are gaining more clarity and seeing more significant AI revenue. DELTA aims for AI revenue to increase to c10% of total revenue by the end of 2024, with most orders still coming from Delta Taiwan. DELTA also revealed that it is in the process of developing its own AI products at its factory in Germany, expecting to begin selling these products in 2H24, with more visible orders anticipated in 2025.

Expect AI revenue growth at high rate of 34.7% in next five years

DELTA has not yet disclosed its growth targets and revenue contribution for AI by 2025. Initially, we estimate that AI revenue for 2024 will be around USD321m, accounting for 7% of total revenue. We expect revenue in 2025-26 to accelerate with growth rates of 50% and 40%, respectively, leading to an increase in revenue contribution to 11% and 13% of total revenue. We anticipate that the revenue growth rate for AI over the next five years (2025-29) will average 34.7% CAGR, slightly lower than the projected growth rate for the global AI market.

Revised up net profit due to clearer strategy for Al-related

We have revised our net profit forecasts for 2024-26 upwards by 11.4%/24.4%/41%, resulting in growth rates of 16%/28%/28%, respectively. Currently, most AI orders come from Delta Taiwan, causing DELTA to pay royalty fees and technical service fees to Delta Taiwan. Initially, we estimate that the total fees for both components will be c10-15% of revenue (DELTA has not disclosed this information). However, if DELTA can recognize revenue from self-developed AI products more quickly and in greater amounts, it will further support profit growth, as there will be no fees.

Share price increasing to reflect higher expectation

We roll forward our TP to 2025, resulting in a higher TP of THB110. We raise our target P/E to 50x (from 40x), in line with the historical average P/E, to reflect the high expected growth rate of profit with a clearer growth potential in the AI-related and EV sectors. However, the risks that investors still need to monitor are the global economy, competition, and inventory write-downs. Over the past five months, the stock price has risen by 45%, trading at a 2024E P/E of 62x. Therefore, we recommend a trading Buy for investors who can accept the risks.

PREPARED BY FSS INTERNATIONAL INVESTMENT ADVISORY SECURITIES CO LTD (FSSIA). ANALYST CERTIFICATION AND IMPORTANT DISCLOSURES CAN BE FOUND AT THE END OF THIS REPORT

Investment thesis

We have a bullish view of DELTA's growth since its main product, power supplies, are crucial to several product groups, such as automotive, industrial, data center, cloud computing, and medical. DELTA has expanded into downstream businesses, such as EV power and EV battery chargers, infrastructure, and Al-related.

However, the risks that investors still need to monitor are 1) a greater global economic slowdown than expected; 2) higher competition than anticipated; and 3) inventory write-downs and reversals, which impact the gross margin. In addition, over the past five months, DELTA's stock price has risen by 45%, reflecting high expectations, trading at a 2024E P/E of 62x. Therefore, we recommend a trading Buy for investors who can accept the risks.

Company profile

DELTA is an electronics manufacturer and exporter of power supplies and electronic components comprising cooling fans, EMI filters, and solenoids. Key power management products consist of switching power supplies, EV chargers, DC-DC converters, and solar inverters. Its operations cover regions such as Asia, Europe, and South America. In 2023, its revenue contribution came mainly from power electronics at 53%, with mobility/infrastructure/automation/others at 29%/15.4%/2.7%/0.1%, respectively.

www.deltathailand.com

Catalysts

Potential catalysts for DELTA's earnings growth in 2024 are 1) purchase order growth from EV power with supporting capacity expansion; 2) a recovery in data centers and fans; 3) lower raw material costs and an absence of inventory provisions; and 4) successful market expansion.

Risks to our call

Downside and upside risks to our P/E-based TP include 1) lower or higher-than-expected global EV sales growth; 2) a sooner or later-than-expected decrease in raw material costs; and 3) a stronger or weaker-than-expected THB.

Earnings sensitivity

- For every 1% increase in USD revenue, we estimate 2024 net profit to rise by 0.9%, and vice versa, all else being equal.
- For every THB1/USD increase, we estimate 2024 net profit to fall by 6.5%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 3.4%, and vice versa, all else being equal.
- For every 0.2% increase in SG&A, we estimate 2024 net profit to fall by 1.8%, and vice versa, all else being equal.

Source: FSSIA estimates

2Q24 core profit was a record high

DELTA reported a solid net profit of THB6.57b (+52% q-q, +41% y-y) in 2Q24. Excluding an FX gain of THB379m and compensation for contract decommitment of THB252m, the normalized profit was at THB5.93b (+56% q-q, +34% y-y). This core profit was a record high and beat our projection and Bloomberg's consensus estimate by 18% and 24%, respectively.

Total USD revenue grew by 6.7% q-q and 11% y-y, supported by revenue from power electronics (+11% q-q, +12% y-y) and mobility (+4% q-q, +14% y-y). To elaborate, 2Q24 EV power revenue increased by 3.9% q-q and 14% y-y due to a higher order volume from customers in Europe (+28% q-q, +42% y-y). Meanwhile, US & Asian customer orders drop by 18% q-q and 11% y-y. Revenue from data centers slightly grew by 5% q-q and 3% y-y, while the India business increased by 10% q-q and 42% y-y. Aside from that, we believe revenue from AI-related products might significantly grow from the low base and high demand. DELTA has not disclosed clear figures, only stating that the revenue contribution remains in the single digits.

The 2Q24 gross margin reached a 34-quarter high at 26.9%, up from 21% in 1Q24 and 23.4% in 2Q24. This mainly came from the reversal of the inventory provision that had been set aside previously. We expect that the 2H24 gross margin will likely decline to normal levels, while DELTA maintains its annual gross margin target of 23-24%.

SG&A to sales remained high at 12.9%, up from 11.2% in 1Q24 and 10.6% in 2Q23, due to higher royalty and technical service fees of THB2.27b (+26% q-q, +113% y-y) paid to Delta Taiwan. This fee contribution was at 5.4% of total revenue, up from 4.7% in 1Q24 and 3% in 2Q23.

DELTA's 1H24 net profit was equal to THB10.8b (+31% y-y). We expect 3Q24 net profit to continue to increase q-q and y-y due to seasonality and higher demand for Alrelated products.

DELTA is developing its own AI products

We have a positive outlook for the analyst meeting on 30 July, as we are gaining more clarity and seeing more significant AI revenue. In the short term, DELTA aims for AI revenue to increase to 10% of total revenue by the end of 2024, up from our current estimate of about 5% of total revenue in 1H24, with most orders still coming from Delta Taiwan. DELTA also revealed that it is in the process of developing its own AI products at its factory in Germany, expecting to begin selling these products in 2H24, with more visible orders anticipated in 2025.

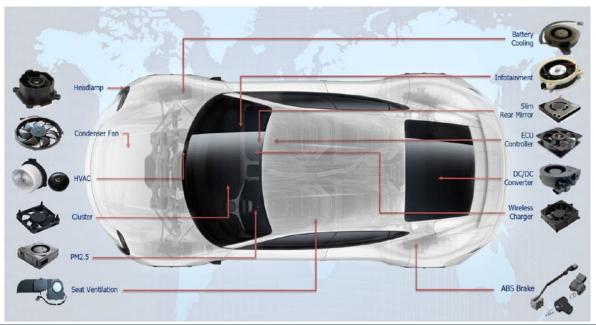

DELTA maintains its target for total revenue growth in 2024 at no less than 10% y-y, despite reducing its revenue growth target for EV to 20% y-y from the beginning of the year at 40-50% y-y due to a sharper-than-expected slowdown in the US market. DELTA also continues to project moderate growth for data centers (non-AI) as previously planned, while benefiting from a strong recovery in revenue from AI to support overall growth.

Al opportunities to drive growth

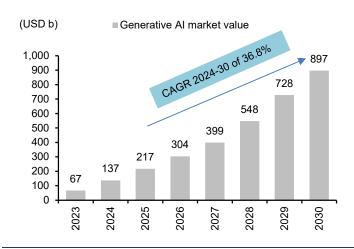

The global artificial intelligence market value is projected to grow at an annual growth rate (CAGR 2024-30) of 36-38%, according to Bloomberg. Particularly, Bloomberg estimates that the largest drivers of market value will be generative AI infrastructure as a service used for training LLMs, followed by digital ads driven by the technology and specialized generative AI assistant software. On the hardware side of this, market value would be driven by AI servers, AI storage, computer vision AI products, and conversation AI devices. This hardware information is related to DELTA's business and we can use this number to project DELTA's revenue growth in the future.

Exhibit 17: Generative AI market opportunities

| | 2022 | 2027E | 2032E | CAGR |

Source: Bloomberg

Exhibit 18: Global generative Al market value

Sources: Bloomberg, FSSIA's compilation

Exhibit 19: NVIDIA's total revenue

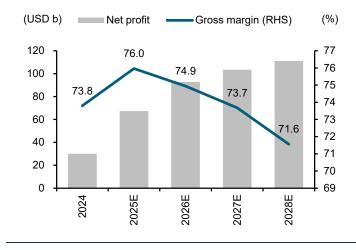

Sources: Bloomberg, FSSIA's compilation

Moreover, we would say NVIDIA is one of DELTA's AI customers. The Bloomberg consensus estimates that NVIDIA's revenue growth from 2025 to 2028 will average 38.7% CAGR, which is closely aligned with the overall growth of the AI market.

DELTA has not yet disclosed its growth targets and revenue contribution for AI by 2025. Initially, we estimate that AI revenue for 2024 will be around USD321m, accounting for 7% of total revenue. We expect revenue in 2025-26 to accelerate with growth rates of 50% and 40%, respectively, leading to an increase in revenue contribution to 11% and 13% of total revenue. We anticipate that the revenue growth rate for AI over the next five years (2025-29) will average 34.7% CAGR, slightly lower than the projected growth rate for the global AI market.

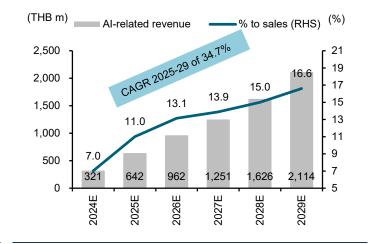

Exhibit 21: DELTA's AI revenue projection

Sources: Bloomberg, FSSIA's compilation

Source: FSSIA estimates

Revised up net profit on clearer improvement from Al-related revenue

We have revised our net profit forecasts for 2024-26 upwards by 11.4%/24.4%/41%, resulting in growth rates of 16%/28%/28%, respectively, to reflect the accelerating growth of AI revenue. In additional, we have increased our assumptions for DELTA's gross margin for 2024-26 by an average of 1.6-1.9%, resulting in margins of 24.2%/25.2%/25.5%. This adjustment is due to higher utilization rates and changes in product mix, particularly in AI, which we expect to have a gross margin of around 40-50%.

Currently, most AI orders come from Delta Taiwan, causing DELTA to pay royalty fees and technical service fees to Delta Taiwan. Initially, we estimate that the total fees for both components will be c10-15% of revenue (DELTA has not disclosed this information). However, if DELTA can recognize revenue from self-developed AI products more quickly and in greater amounts, it will further support profit growth, as there will be no royalty fees or technical service fees.

Continues to trade on high premium valuation, driven by story

We roll forward our TP to 2025, resulting in a higher TP of THB110. We raise our target P/E to 50x (from 40x) for three reasons: 1) it is based on DELTA's historical average P/E over the past five years; 2) it reflects the expected growth rate of revenue and profits, which are anticipated to continue increasing for at least the next 1-2 years; and 3) there is a clearer growth potential in the AI-related and EV sectors. Given the upward trend in profits, we believe that DELTA will continue to receive a premium valuation due to high expectations of high profit growth and will likely be one of the few companies in the Thai stock market with a clear revenue stream related to AI, even if it is just at the upstream level (the product that DELTA produces in AI is power systems). Moreover, NVIDIA is considered one of DELTA's AI customers, and currently NVIDIA trades at an estimated P/E ratio of 90x and 41x for 2024-25, respectively.

However, the risks that investors still need to monitor are 1) a greater global economic slowdown than expected; 2) higher competition than anticipated; 3) customer loss; and 4) inventory write-downs and reversals, which impact the gross margin. In addition, over the past five months, DELTA's stock price has risen by 45%, reflecting high expectations, trading at a 2024E P/E of 62x. Therefore, we recommend a trading Buy for investors who can accept the risks.

Delta Electronics Thailand (DELTA TB)

FSSIA ESG rating

 $\star \star \star \star \star$

87.59 /100

Exhibit 26: FSSIA ESG score implication

| Rating | Score | Implication |
|-------------------|---------|--|
| **** | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability. |
| **** | >59-79 | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers. |
| $\star\star\star$ | >39-59 | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually. |
| ** | >19-39 | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable. |
| * | 1-19 | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 30-Jul-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
