### 2 AUGUST 2024

#### EQUITY RESEARCH - COMPANY REPORT

## **CENTRAL RETAIL CORP**

THAILAND / COMMERCE

## Slow SSSG with lack of short-term catalysts

- We expect a 2Q24 core profit of THB1.73b, down 31.5% q-q due to seasonality and slightly up 0.7% y-y owing to continued total sales growth in line with new branches.
- Cut our 2024-26E core profit by 5-9% to reflect a slower-than-expected SSSG recovery.
- Decrease our TP to THB40.

#### 2Q24 core profit should edge up y-y

We anticipate a 2Q24 core profit of THB1.73b, dropping 31.5% q-q due to seasonal effects and the end of the E-receipt program but slightly increasing 0.7% y-y. The negative SSSG should persist at -2% due mainly to hardline, which should record a c8% lower SSS. Food SSS should ease by 0.5%, while fashion should increase by 2%. However, total sales growth should continue at c5% due to sales of new stores in tandem with the aggressive branch expansion of Thai Watsadu and Go wholesale recently.

## GPM should be flat y-y, but SG&A should increase in line with expansion

We project a gross margin of 26.6%, jumping by 90bps q-q due to lower lowmargin electrical appliance sales after the end of the E-receipt program but barely changing y-y. However, SG&A expenses should increase by 4% y-y in tandem with the branch expansion of Thai Watsadu and Go wholesale since CRC focused on expanding these two formats. Also, profit sharing from associates and joint ventures should decrease due to the absence of profitsharing of Gucci.

## Decrease 2024-26E core profit by 5-9% to reflect below-estimate SSSG

We have cut our 2024-26E core profit by 5-9%, resulting in a lower three-year average growth of 9% CAGR (from 12% CAGR). It reflected a slower-than-expected SSSG recovery and the SSS outlook in July with a persistent 1-3% loss assumption after a 1H24 negative SSSG of c0.5%. In the short term, CRC still lacks fresh catalysts. In particular, 3Q is a low season before a peak in 4Q.

#### Slash our TP to THB40

Similarly, we have cut our TP to THB40 to factor in the slower-than-expected SSSG recovery outlook. In the short term, CRC still lacks fresh catalysts. However, it has plunged -6.3% MTD probably to price in a disappointing performance recovery. It currently traded at 22x 2024E P/E, its five-year average -2SD.

#### **Investment thesis**

CRC is a leading multi-format (physical/online) and multicategory (fashion/hardline/food) retailer. Also, it has expanded its business to Italy and Vietnam. CRC has multi-store formats. In 2023, it has 1,969 stores, including 85 department stores, 114 specialty stores, 338 brand shops, 38 hypermarkets, 725 supermarkets & CVS, 4 Food wholesales, 81 home DIY, 171 electronics stores, 219 OFM & B2S, 72 malls, and 122 health & wellness stores.

According to Euromonitor, the projected market growth of the modern retail and wholesale industry in Thailand and Vietnam during 2023-27 equals 7.8% and 9.4% CAGR, respectively. In this regard, Vietnam has a higher growth potential than Thailand. Also, revenue from Vietnam accounted for 20-25% of sales.

#### **Company profile**

Established in 1947 by the Chirathivat family, CRC is a multi-category retailer. It operates multi-store formats in Thailand, Italy, and Vietnam. Also, it is an omni-channel pioneer in Thailand, which helps strengthen its retail store network in offering products and services to consumers.

www.centralretail.com

#### Catalysts

Potential growth drivers include 1) a recovery in domestic purchasing power, 2) a recovery in tourist arrivals, 3) the government's stimulus, and 4) an economic recovery in Vietnam.

#### **Risks to our call**

Downside risks to our DCF-based TP include 1) a decline in domestic purchasing power, 2) lower-than-expected tourist arrivals, 3) an absence of the government's stimulus, and 4) a slower-than-expected economic recovery in Vietnam.

#### Earnings sensitivity

- For every 1% increase in SSSG, we estimate 2024 EPS would rise 1%, and vice versa, all else being equal.
- For every 0.1% increase in GPM, we estimate 2024 EPS would rise 2.2%, and vice versa, all else being equal.
- For every 0.1% increase in SG&A to revenue, we estimate 2024 EPS would fall 2.5%, and vice versa, all else being equal.

#### Exhibit 17: FSSIA ESG score implication

| Rating              | Score   | Implication  |
|---------------------|---------|--|
| ****                | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.   |
| ****                | >59-79  | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.  |
| $\star \star \star$ | >39-59  | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.   |
| **                  | >19-39  | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.   |
| *                   | 1-19    | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

#### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 01-Aug-2024 unless otherwise stated.

#### **RECOMMENDATION STRUCTURE**

#### **Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
