**EQUITY RESEARCH - COMPANY REPORT** 

**ICHI TB** 

THAILAND / FOOD & BEVERAGE

# 2H24 profit outlook is unexciting

- We have a slightly negative view from the analyst meeting. 2H24 revenue and gross margin to weaken from 1H24.
- The plan to expand Tan Power into modern trade in 2H24 at THB10/unit is very challenging, in our view.
- The positive aspects are the attractive valuation and a high dividend vield.

## 2Q24 in line with our estimate, and was unexciting

ICHI reported a 2Q24 net profit of THB379m (+4% q-q, +48% y-y). Excluding a gain from the sale of UHT production equipment worth THB33m (before tax), or THB26m (after tax), its core profit equalled THB353m (-3% q-q, +38% y-y). Total revenue grew by 7.7% q-q and 13.5% y-y, supported by strong domestic revenue. However, export revenue decreased by 3.3% q-q and 34.5% y-y due to major OEM customers being unable to supply coconut raw materials to ICHI as planned, due to drought issues that reduced coconut production levels.

## Negative items were higher SG&A and lower profit sharing

The 2Q24 gross margin improved to 26.4% from 26.1% in 1Q24 and 23% in 2Q23, due to the product mix and a higher utilisation rate. The SG&A to sales ratio increased to 7.8% from 6.1% in 1Q24, due to an FX loss and a rise in employee expenses. In addition, profit sharing from Indonesia plunged to THB1.2m in the quarter from THB11.5m in 1Q24 due to image adjustment issues that have temporarily halted sales.

## Slightly negative view from analyst meeting

We have a slightly negative view from the analyst meeting. Management guided that ICHI's revenue and gross margin would weaken in 3Q-4Q24. This is due to seasonal factors as it enters the low season, plus a slight increase in packaging costs by 1-2%. ICHI plans to focus on new products, such as Ichitan Chiew Chiew and Tan Power, to support its performance in 2H24. We have a neutral view on the plan to expand Tan Power into modern trade. While this will increase brand recognition, selling at THB10/unit, the same amount as in traditional trade, will result in lower margins for modern trade compared to traditional trade. Furthermore, the competition in the energy drink market is very intense, posing a challenge for ICHI. This will need to be monitored further.

### Retain BUY rating with cheap valuation and high dividend yield

In addition, there is a chance that the plan to install the new production line may be delayed from the currently targeted commercial run date in December 2024 due to issues with machinery transportation. This also needs to be monitored. We maintain our view that the profit outlook for 2H24 is not exciting. The positive aspects are the attractive valuation and a high dividend yield of c7% annually (paid twice a year).

#### Investment thesis

ICHI is a manufacturer and distributor of ready-to-drink green tea called "ICHITAN green tea", the herbal drink "Yen Yen", and green tea with chewy coconut cubes named "ICHITAN Chew Chew", along with other beverages. In 2023, 91.7% of ICHI's revenue came from domestic sales, and overseas sales accounted for 8.3%. ICHI's factory is located at Rojana Industrial Park, Ayutthaya, which has seven bottle production lines and two UHT box product lines with a total capacity of 1,500 million bottles and 200 million boxes per year. ICHI plans to increase its capacity to 1,700 million bottles in 4Q24.

# **Company profile**

Ichitan Group manufactures its own-branded beverages and sells ready-to-drink green tea beverages, herbal drinks, and low-sugar ready-to-drink tea beverages to the local market and CLMV. In 2014, ICHI engaged in a joint venture with the Indonesian company PT Atri Pasifik to produce and sell its products in Indonesia.

## Principal activities (revenue, 2023)

Ready-to-drink green tea - 69.1 %

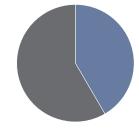

Source: Ichitan Group

## **Major shareholders**

■ Passakornnatee Family - 41.6 %

■ Others - 58.4 %

Source: Ichitan Group

# **Catalysts**

Potential catalysts for ICHI's earnings growth in 2024 are 1) revenue growth, driven by rising sales volumes; 2) declining packaging costs; 3) successful new product launches; and 4) successful original equipment manufacturer (OEM) customer products.

#### Risks to our call

Downside risks to our P/E-based TP would be 1) a slower-than-expected consumption recovery; 2) high volatility in packaging costs; and 3) increased competition and government policy changes such as excise taxes for sugary drinks.

## **Event calendar**

### Earnings sensitivity

- For every 1% increase in revenue, we estimate 2024 net profit to rise by 1%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 3.8%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A to sales, we estimate 2024 net profit to fall by 2%, and vice versa, all else being equal.

# Exhibit 14: FSSIA ESG score implication

43.67 /100

| Rating | Score   | Implication  |
|--------|---------|--|
| ****   | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.   |
| ****   | >59-79  | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.  |
| ***    | >39-59  | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.   |
| **     | >19-39  | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.   |
| *      | 1-19    | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 07-Aug-2024 unless otherwise stated.

### RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
