## 2Q24 results at first glance

## 2Q24 hit a new profit high, in line with our estimate

SAPPE TB

## Highlights

- SAPPE posted a 2Q24 net profit of THB411m (+17% q-q, +32% y-y). Excluding an FX gain of THB12m, its core profit equaled THB399m (+9% q-q, +21% y-y), reaching a new high as anticipated.
- Total revenue grew well by 9% q-q and 21% y-y in 2Q24, aligning with SAPPE's target of 20-25% y-y growth. Domestic revenue increased by 8% q-q and 19.5% y-y, driven by both CVS and traditional trade channels.
- Overseas revenue also remained strong in the quarter, increasing by 9% q-q and 21% y-y, led by Europe (+38% q-q, +42% y-y), America (+41% q-q, +32% y-y), and the Middle East and others (+5% q-q, +18% y-y). Revenue from Indonesia decreased q-q due to Ramadan occurring in 1Q24, while the Philippines continued to show growth both q-q and y-y. Overall, revenues reached new highs in Thailand, Europe, America, and the Middle East, which is impressive.
- The gross margin surprisingly increased to 47.1% in 2Q24, up from 46% in 1Q24, despite nearly fully recognizing the depreciation of the new line (which started operating in mid-April). This was due to effective management and a weaker baht. The utilization rate averaged 74% in 2Q24 (80% for the old line and 30-40% for the new line).
- Total expenses increased by 9% q-q and 42% y-y, mainly from higher transportation and marketing costs, including presenter fees for the group SEVENTEEN. However, SG&A to sales remained under control at 25%, matching 1Q24 levels.

## Outlook

- SAPPE's 1H24 net profit equaled THB763m (+30% y-y), accounting for 54% of our full-year estimate. The purchase order trend for 3QTD remains positive, initially expected to grow by no less than 20-25%.
   SAPPE indicated that the new line's utilization rate has increased to 50-70% in 3Q24.
- We expect 3Q24 net profit to reach another record high before declining seasonally in 4Q24.
- We maintain our 2024 net profit growth estimate at 32% y-y and retain our BUY call with the same TP of THB115.

## SAPPE PCL (SAPPE TB)

## Exhibit 14: FSSIA ESG score implication

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
$\star\star\star\star$	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
$\star \star \star$	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 09-Aug-2024 unless otherwise stated.

## **RECOMMENDATION STRUCTURE**

## **Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

## **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
