# 19 AUGUST 2024

#### EQUITY RESEARCH - COMPANY REPORT

COM7 COM7 TB THAILAND / COMMERCE

# Believe net profit has troughed

- We have a neutral view of the Oppday meeting. It focused mainly on new products and services and use cases of Gen AI.
- We believe the net profit has passed its trough in 2Q24. Increase our 2024-26E profit by 7-9%.
- Raise our rating to BUY after a higher TP of THB24.0.

#### A neutral view of the Opportunity Day meeting

We have a neutral view of the Oppday meeting on August 16, 2024. It focused mainly on new products and services and use cases of Gen AI. In particular, COM7 started selling integrated solar cells at Banana. Also, it cooperates with AWS to provide cloud services through solution design for SME customers. COM7 has developed Gen AI to assess the credit scoring of its customers for installments via Banana, as well as Gen AI to assist in-store sales.

#### Believe 2Q24 net profit is this year's trough

We expect a 3Q24 net profit of THB770m, up 2% q-q due to the planned iPhone 16 launch in September and jumping 26% y-y due to the iPhone 16 and higher N minus (iPhone15, 14, etc.) sales. Since the iPhone 15 and 16 support Apple intelligence, they should help boost sales. Moreover, COM7 renovated some of its branches last year. Hence, we expect a flat GPM of 13.5%.

#### Raise our 2024-26E profit by 7-9%

We have increased our 2024-26E profit by 9.5%, 7.4%, and 7.2%, respectively, to reflect higher-than-expected sales and gross margin. Additionally, sales should increase due to the iPhone 16, which supports Apple intelligence, and the launches of other AI smartphones.

#### Upgrade rating to BUY at a higher TP of THB24.0

Similarly, we have raised our rating to BUY after rerating our P/E target to 18.1x, close to the five-year historical average, to factor in the higher-than-expected growth outlook, our view that the net profit has passed its trough for this year, and the likelihood that AI Smartphones will receive a favorable response, which would support sales and the profitability of COM7.

#### **Investment thesis**

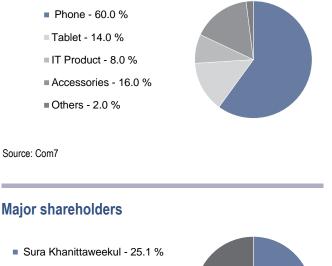

COM7 targets a 2024 growth of 10%, which is viable, in our view, due to its continued channel expansion, including shop-in-shop, standalone, and online platforms, and a shift to focus on 5G compatible devices since the Thai 5G adoption rate was low at just 11%. Also, COM7 has developed new sales tools, such as consumer loans via UFund and warranty extension, and expanded to other businesses, such as Dr.Pharma drugstore, Pet Paw pet food, and BeBePhone accessories. However, the slower-than-expected purchasing power recovery outlook and the low-impact government stimulus measures have forced COM7 to extend its aggressive promotion, pressuring its overall gross margin.

#### **Company profile**

COM7 distributes IT products such as laptops, desktops, mobile phones, tablets, and computer peripherals through various distribution channels. Also, it operates Apple repair & service centers.

www.comseven.com

#### Principal activities (revenue, 2023)

- Pongsak Thammathataree 22.5 %
- Others 52.5 %

Source: Com7

#### Catalysts

Key potential growth drivers for COM7 shares include 1) changing consumer behavior in the digital era where consumers turn to use more IT products and change them more frequently, 2) domestic consumption and purchasing power recoveries, and 3) the 10% sales growth target.

#### Risks to our call

Risks to our P/E-based TP include 1) lower/higher domestic consumption and purchasing power, 2) store cannibalization/expansion, and 3) lower/higher-thanexpected gross margin.

#### Key assumptions

COM7	2023A	2024E	2025E	2026E
Sales growth (%)	10.9	10.7	8.2	8.1
Total Stores (no.)	1,356	1,426	1,496	1,566
GPM (%)	13.2	13.3	13.3	13.4
SG%A to sales (%)	7.9	8.0	8.1	8.2

Source: FSSIA estimates

#### Earnings sensitivity

- For every 1% increase in sales, we estimate 2024 net profit to rise by 0.9%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2024 net profit to rise by 9.5%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A expenses, we estimate 2024 net profit to fall by 9.5%, and vice versa, all else being equal.

#### Exhibit 13: FSSIA ESG score implication

FSSIA ESG rating	
$\star$ $\star$ $\star$	

61.78 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 16-Aug-2024 unless otherwise stated.

#### **RECOMMENDATION STRUCTURE**

#### **Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
