Ongoing balance sheet cleanup takes effect

- The proactive NPL management plan should positively affect the results in 2H24.
- Most positive effects have already been reflected in our 2024-26 forecasts, but not the impacts, reducing the net profit by 4-5%.
- Maintain HOLD with a new 2024 TP of THB37.

The proactive NPL management yields a positive 2H24 outlook

SAWAD's analyst meeting on 16 August mainly focused on 1) progress on the proactive NPL management plan regarding ECLs, and the losses on sales of repossessed cars, mainly SCAP's; 2) the better-than-expected loan spread in 2Q24 and its funding strategy in 2H24 amid the vulnerable bond market; and 3) the growth strategy throughout the rest of 2024. In addition, SAWAD guided for the 3Q24 operating results to be better than those in 2Q24, owing to higher loan demand and debt collection, along with the downward trend of losses on sales of repossessed vehicles.

Manageable asset quality

The overall asset quality aligns with its guidance, including an NPL ratio not exceeding 3.50% vs 3.40% at the end of 2Q24 and a coverage ratio that has risen to 59.8% at the end of 2Q24. SAWAD also expects a positive vehicle repossession trend in 2H24, with losses gradually declining. However, credit costs remain elevated above the full-year 2024 guidance of 180bps, which management indicated might decrease as asset quality improves. Nonetheless, given the ongoing rise in Stage 2 loans, now accounting for 11.1% of total loans, we believe that reducing credit costs in 2H24 may be challenging. Additionally, the need for ECL provisions to reflect the current economic situation will likely keep LGD (loss given default) high. As a result, we expect 2H24 credit costs to remain elevated, similar to the 1H24 level of c200bp.

2024-26E earnings cut to reflect the loan and spread reduction

We have reduced our 2024-26 net profit forecast by an average of 4-5% from our previous estimates, primarily due to lower loan growth and loan spread assumptions. Although declining credit costs and lower cost-to-income ratio assumptions offer positive effects, they cannot offset the impact.

Maintain HOLD with a new 2024 TP of THB37

We maintain our HOLD call with a new 2024 GGM-based TP of THB37 (from THB40), suggesting a P/BV of 1.51x (from 1.72x) under the expected LT ROE of 16.5% (from 18.1%) and COE of 12.6%. However, we are more inclined towards MTC (BUY; TP THB50) due to its superior earnings growth potential and more solid asset quality.

Investment thesis

- We maintain our neutral view of SAWAD's outlook following its balance sheet cleanup process in 1H24. Despite expected impacts aligning with the 2024 guidance, its 2H24 performance and share price should be under pressure until a visible trend of losses on sales of repossessed cars and credit costs emerges.
- We expect 2024-26 net profit to grow at a 10.7% CAGR, with title loans being a main supporting factor.
- We maintain our HOLD recommendation at the current price due to its limited potential returns. We prefer MTC (BUY; TP THB50) to SAWAD because of its superior earnings growth potential and more solid asset quality.

Company profile

SAWAD provides loan services to retail customers. Its business operations can be classified into four main categories: 1) auto title loans against all types of used vehicles, homes, and land; 2) unsecured personal loans; 3) motorcycle hire-purchase; and 4) asset management.

www.meebaanmeerod.com

Principal activities (revenue, 1H24)

- Net interest income - 81.6 %
- Non-interest income - 18.4 %

Source: Srisawad Corp

Major shareholders

- Kaewbootta Family - 28.2 %
- Thai NVDR - 9.3 %
- Others - 62.4 %

Source: Srisawad Corp

Catalysts

- 1) Better-than-expected loan growth.
- 2) Better-than-expected spread.
- 3) Lower-than-expected NPLs and credit costs.
- 4) Lower-than-expected operating expenses.

Risks to our call

Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board. Upside risks include 1) a faster-than-expected decline in losses on sales of repossessed cars for SCAP; and 2) an interest rate downtrend could push its interest spread.

We maintain our HOLD call with a new 2024 GGM-based TP of THB37 (from THB40), suggesting a P/BV of 1.51x (from 1.72x) under the expected LT ROE of 16.5% (from 18.1%) and COE of 12.6%. However, we are more inclined towards MTC (BUY; TP THB50) due to its superior earnings growth potential and more solid asset quality.

Highlights

- 1) **Progress on the proactive NPL management plan:** SAWAD provided details on its proactive management of NPLs by accelerating the repossession and sale of vehicles. It has already completed 80-90% of its vehicle repossession target. SAWAD observed positive signs at the end of 2Q24, with a decreased volume of repossessed vehicles. The situation led to a reversal of THB61m in impairment reserves for repossessed cars in 2Q24, mainly from SCAP. Meanwhile, the loss from selling repossessed vehicles decreased to THB475m, down from the peak of THB490m in 1Q24.

Furthermore, the policy for new loan approvals has become more stringent regarding quality since late 2023, notably by reducing the LTV to around 40% based on the appraised value of collateral, which has decreased significantly recently. Consequently, SAWAD expects a positive vehicle repossession trend in 2H24, with losses gradually declining.

- 2) **The better-than-expected loan spread in 2Q24**, which increased q-q by 12bp to 14.67% vs our expectation of 14.15%. Additionally, the cost of funds slightly decreased due to stable total borrowings, which aligned with the relatively stable loan portfolio during this period. SAWAD attributed the improvement in loan yield in 2Q24 to three key factors: 1) SCAP's slightly higher loan yield was mainly due to the effects of lower dealer commissions, which had shown as a net amount deducted from the loan yield, without increasing the HP interest charged; 2) the interest rate on motorcycle title loans in Fast Money (FM)'s portfolio increased to 22% for new contracts, up from the previous 18%. Despite violating the guidelines for receiving low-cost funding from GSB, the company believes the spread is worthwhile; and 3) working days in 1Q24 were fewer than in 2Q24 (90 vs 91 days). Accordingly, the cost of funds will have a limited impact on the 2H24 loan spread.

Additionally, SAWAD revealed its plan for managing funding sources in 2H24 in response to the current volatility in the bond market. The company has secured new loans from foreign banks (SMBC and BOC) amounting to THB5b. The effective interest rate, including the hedging costs, is similar to domestic borrowing rates. SAWAD has also obtained an additional THB1b in loans from domestic banks, which will help reduce the need for a new bond issuance until November 2024.

In 2H24, the company has THB6.6b in bonds maturing (including SCAP). The recent issuance of THB2.0b has prepared liquidity for redeeming these bonds. The company and SCAP have monthly cash inflows of THB4b-5b from debt repayments and available credit lines from financial institutions of THB5b-6b, which is sufficient to cover the upcoming bond obligations.

- 3) **The 2H24 outlook.** The company has identified negative aspects in the lower-than-expected loan growth compared to its original target. On the positive side, there is a rebound in insurance brokerage fee income, the loan spread is stabilizing – aligning with the expected cost of funds' interest expenses rising only marginally – and the losses from vehicle repossessions are starting to decrease, as mentioned above.

Due to its policy to focus of maintaining liquidity and reducing credit risk, the loan growth for 2024 will not achieve the previously targeted 15-20% y-y, but should not exceed 10% y-y instead, with a primary focus on vehicle title loans.

Meanwhile, for motorcycle hire purchase loans (SCAP) the priority is on maintaining loan quality over growth, leading to a contraction in this portfolio.

However, the decline in fee income in 2Q24 was attributed to the long holiday period during the Songkran festival, which significantly reduced the staff's insurance sales effectiveness. The expected 2H24 fee income should return to near-normal levels, similar to those in 1Q24.

Srisawad Corp PCL (SAWAD TB)

FSSIA ESG rating

46.52 /100

Exhibit 7: FSSIA ESG score implication

Rating	Score	Implication
★★★★★	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
★★★★☆	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
★★★☆☆	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
★★☆☆☆	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
★☆☆☆☆	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Disclaimer for ESG scoring

ESG score	Methodology	Rating																			
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.	Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.																			
Sustainability Investment List (THSI) by The Stock Exchange of Thailand (SET)	THSI quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.	To be eligible for THSI inclusion , verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality. SETTHSI Index is extended from the THSI companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.																			
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.	Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).																			
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). <i>(The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)</i>	The scores are classified into four categories: 5 for Excellent (100), 4 for Very Good (90-99), 3 for Fair (80-89), and not rated for scores below 79.																			
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years. <i>(Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)</i>	The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.																			
Morningstar Sustainalytics	The Sustainalytics' ESG risk rating provides an overall company score based on an assessment of how much of a company's exposure to ESG risk is unmanaged. <i>Sources to be reviewed include corporate publications and regulatory filings, news and other media, NGO reports/websites, multi-sector information, company feedback, ESG controversies, issuer feedback on draft ESG reports, and quality & peer reviews.</i>	A company's ESG risk rating score is the sum of unmanaged risk. The more risk is unmanaged, the higher ESG risk is scored. <table><tr><th>NEGL</th><th>Low</th><th>Medium</th><th>High</th><th>Severe</th></tr><tr><td>0-10</td><td>10-20</td><td>20-30</td><td>30-40</td><td>40+</td></tr></table>	NEGL	Low	Medium	High	Severe	0-10	10-20	20-30	30-40	40+									
NEGL	Low	Medium	High	Severe																	
0-10	10-20	20-30	30-40	40+																	
ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.	The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.																			
MSCI	MSCI ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. It uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. <table><tr><td>AAA</td><td>8.571-10.000</td><td rowspan="3">Leader:</td><td rowspan="3">leading its industry in managing the most significant ESG risks and opportunities</td></tr><tr><td>AA</td><td>7.143-8.570</td></tr><tr><td>A</td><td>5.714-7.142</td></tr><tr><td>BBB</td><td>4.286-5.713</td><td rowspan="3">Average:</td><td rowspan="3">a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers</td></tr><tr><td>BB</td><td>2.857-4.285</td></tr><tr><td>B</td><td>1.429-2.856</td></tr><tr><td>CCC</td><td>0.000-1.428</td><td>Laggard:</td><td>lagging its industry based on its high exposure and failure to manage significant ESG risks</td></tr></table>	AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities	AA	7.143-8.570	A	5.714-7.142	BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers	BB	2.857-4.285	B	1.429-2.856	CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks
AAA	8.571-10.000	Leader:	leading its industry in managing the most significant ESG risks and opportunities																		
AA	7.143-8.570																				
A	5.714-7.142																				
BBB	4.286-5.713	Average:	a mixed or unexceptional track record of managing the most significant ESG risks and opportunities relative to industry peers																		
BB	2.857-4.285																				
B	1.429-2.856																				
CCC	0.000-1.428	Laggard:	lagging its industry based on its high exposure and failure to manage significant ESG risks																		
Moody's ESG solutions	Moody's assesses the degree to which companies take into account ESG objectives in the definition and implementation of their strategy policies. It believes that a company integrating ESG factors into its business model and relatively outperforming its peers is better positioned to mitigate risks and create sustainable value for shareholders over the medium to long term.																				
Refinitiv ESG rating	Designed to transparently and objectively measure a company's relative ESG performance, commitment and effectiveness across 10 main themes, based on publicly available and auditable data. The score ranges from 0 to 100 on relative ESG performance and insufficient degree of transparency in reporting material ESG data publicly. <i>(Score ratings are 0 to 25 = poor; >25 to 50 = satisfactory; >50 to 75 = good; and >75 to 100 = excellent.)</i>																				
S&P Global	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100.																				
Bloomberg	ESG Score	Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean) of Pillar Scores, where the weights are determined by the pillar priority ranking. Values range from 0 to 10; 10 is the best.																			
Bloomberg	ESG Disclosure Score	Disclosure of a company's ESG used for Bloomberg ESG score. The score ranges from 0 for none to 100 for disclosure of every data point, measuring the amount of ESG data reported publicly, and not the performance on any data point.																			

Rating regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) **"CG Score"**; 2) **"AGM Level"**; 3) **"Thai CAC"**; and 4) **THSI**. The ratings are updated on an annual basis. FSSIA does not confirm nor certify the accuracy of such ratings.

Company	Ticker	Price	Rating	Valuation & Risks
Srisawad Corp	SAWAD TB	THB 32.00	HOLD	Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board. Upside risks include 1) a faster-than-expected decline in losses on sales of repossessed cars for SCAP; and 2) an interest rate downtrend could push its interest spread.
JMT Network Services	JMT TB	THB 13.40	HOLD	Downside risks to our P/BV-based TP include 1) lower cash collection from both debt management and debt tracking collection services; and 2) higher-than-expected funding costs and operating expenses. Upside risks include 1) better-than-expected purchasing power and cash collection 2) lower-than-expected operating and financing expense.
Ngern Tid Lor	TIDLOR TB	THB 13.80	HOLD	Downside risks to our GGM-based TP include 1) further weakening asset quality could potentially hit both loan yield and credit cost; and 2) tighter supervision from related regulators. Upside risks are 1) lower-than-expected credit costs from better asset quality management; and 2) higher-than-expected loan and insurance premium growth from the positive effects of a more favorable economic situation.
Ratchthani Leasing	THANI TB	THB 1.81	HOLD	Downside risks to our GGM-derived TP include 1) an economic slowdown, especially for logistics activities and private investment; 2) deteriorating asset quality; and 3) changes in financial regulations from the Bank of Thailand. Upside risks include 1) a better-than-expected macroeconomic improvement; 2) a downtrend in the policy rate could reduce cost of funds and enhance interest spreads; and 3) a faster-than-expected decline in ECL expense.
Muangthai Capital	MTC TB	THB 42.50	BUY	Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board.
Saksiam Leasing	SAK TB	THB 4.74	BUY	Downside risks include 1) competition from existing and new players; 2) regulatory changes by the Bank of Thailand (BoT); and 3) a slower-than-expected reduction in its cost of funds due to a shift toward more long-term loans.
Aeon Thana Sinsap (Thailand)	AEONTS TB	THB 110.00	HOLD	Downside risks are: 1) regulatory actions to curb industry growth; 2) a higher-than-expected policy rate; and 3) deteriorating asset quality. Upside risks are: 1) better-than-estimated economic improvement; 2) stronger-than-estimated improvement in the overall asset quality; and 3) less pressure from the market yield and cost of funds.
Krungthai Card	KTC TB	THB 39.75	HOLD	Downside risks are: 1) regulatory actions to curb industry growth; 2) a higher-than-expected policy rate; and 3) deteriorating asset quality. Upside risks are: 1) better-than-estimated economic improvement; 2) stronger-than-estimated improvement in the overall asset quality; and 3) less pressure from the market yield and cost of funds.
Asia Sermkij Leasing PCL	ASK TB	THB 9.95	REDUCE	Upside risks include 1) a better-than-expected macroeconomic improvement; 2) downtrend of policy rate could reduce cost of funds and enhance interest spreads; and 3) a faster-than-expected decline in ECL expense.
Bangkok Commercial Asset Mngt.	BAM TB	THB 6.80	BUY	Downside risks to our NAV-based TP include 1) lower cash collection than estimated; 2) lower-than-expected bad debt acquisition; and 3) a slowdown in the property market.
Chayo Group	CHAYO TB	THB 2.68	HOLD	Downside risks to our GGM-based TP include 1) lower-than-expected bad debt acquisition; and 2) higher-than-expected operating expenses. Upside risks include 1) better-than-expected cash collection performance and lower pressure from ECL, 2) stronger-than-expected loan growth, and 3) better cost control than expected.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 16-Aug-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
