EQUITY RESEARCH - ANALYST MEETING

OSOTSPA OSP TB THAILAND / FOOD & BEVERAGE

THB28.00

THB23.00

+21.7%

-0.2%

Key takeaways from analyst meeting

Highlights

- From the analyst meeting last Friday, we have a positive outlook for medium- to long-term growth and a neutral view of the 2H24 outlook.
 With 1H24 revenue growth at 10% y-y, management has raised the 2024 revenue growth target to 7-9% y-y from the previous 4-5% y-y.
- In 2H24, OSP plans to increase its branding efforts, new product launches, and international market expansion. The company will start with Laos, targeting Chinese consumers there, and will re-enter Vietnam in 4Q24, focusing on both the energy drink sector (with new distribution, products and pricing, with a focus on the premium segment) and personal care (with a major distributor introducing Babi Mild). In addition, OSP will enter Indonesia with new distribution, expanding city by city.
- Management indicated that the focus for 2024 will be on completing divestments (involving the exit from unprofitable or non-core businesses) before entering a growth phase in 2025. In 2Q24, an impairment of THB319m was recorded (from the divestment of Basecamp Brews in the UK). We anticipate that in 2H24, there may be further divestment from the glass bottle factory for OEM customers in Myanmar (though beverage manufacturing will continue).
- Future M&A opportunities are being considered, with several deals under review. Management mentioned that there are no planned M&A for 3Q24, with the earliest potential deal being in 4Q24.

Comments

- We have a neutral view of the 2H24 profit outlook. The new revenue target from management implies that 2H24 revenue may grow by 5-8% y-y, though it might weaken h-h due to seasonality, especially in 3Q24, which is the low season both domestically and internationally.
- OSP plans to expand its production capacity for can beverages at its Ayutthaya factory to meet the growing demand in overseas markets and to support the production of the new M150 Sparkling product, which has received a very positive response. Currently, it holds a market share of 1.1% of the energy drink market value, which translates to c4% of quarterly revenue. While this share is still relatively small, the growth trend is quite promising. The expansion is expected to be completed by 4Q25, with full commercial operations beginning in 1Q26.
- We maintain our 2024E core profit growth at 36% y-y and target price of THB28. Short-term profit growth for 2H24 might not be exciting but should still show y-y growth. We anticipate continued growth in 2025-26.

Bloomberg	ESG Score	The S&P Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to its peers within the same industry classification. The score ranges from 0 to 100. ESG Score Bloomberg score evaluating the company's aggregated Environmental, Social and Governance (ESG) performance. The score is based on Bloomberg's view of ESG financial materiality. The score is a weighted generalized mean (power mean)								

Rating regarding the sustainable development of Thai listed companies, both on the SET and MAI, are publicly available on the website of the Securities and Exchange Commission of Thailand (SEC). Currently, ratings available are 1) "CG Score"; 2) "AGM Level"; 3) "Thai CAC"; and 4) THSI. The ratings are updated on an annual basis. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 23-Aug-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
