# **BEYOND TB**

# A bargain amidst the cadmium dust

- BEYOND's core earnings turned profitable in 1H24, but escaped market's attention due to the cadmium waste issue.
- Strong momentum to continue in 2H24; announcing a new hotel and F&B project possibly by the end of this year.
- Maintain BUY with a 2024 DCF-derived TP of THB18/shr.

# Only minor cadmium-related expenses remaining in 2H24

BEYOND's strong hotel business profit was buried by negative news of the cadmium waste issue. In 1H24, revenue grew by 20% y-y, the EBITDA margin significantly improved to 23% (vs 18% in 1H23) and core profit turned around to THB29m (vs core loss of THB96m in 1H23). The cadmium waste issue is likely to be finalized soon. BEYOND recorded expenses related to compensation of the lawsuit and legal fees over cadmium contamination of THB34m in 2Q24, and should book expenses to bring the cadmium waste back to the landfill of up to THB15m in 2H24.

## Positive feedback from analyst meeting

We attended the analyst meeting yesterday and have positive feedback from the hotel operation. Occupancy should maintain its momentum with a rate of 58-60% in 3Q24 (vs 52% in 3Q23). Meanwhile, management sees strong demand from MICE for the remainder of this year, implying strong F&B revenue continuing in 2H24 (+14% y-y in 1H24). Overall, we forecast RevPAR to grow by 20% in 2024 (OCC rate improving to 59% in 2024 from 52% in 2023 and +5% y-y ADR), leading core profit to turn around to THB75m in 2024 from the THB169m loss in 2023.

## New hotel likely to open by 2025

BEYOND recently issued debentures of THB400m with a 7% interest rate and tenor of 1 year and 9 months to support new projects, including a new hotel in the southern region of Thailand with capex of THB600-700m, scheduled to open by 4Q25, and an F&B business which is likely to launch by the end of this year. Despite higher debt, we should still see declining interest expenses, as the interest rate of bank loans has been reduced by 50 bps since 2Q24 and may reduce further this year.

## Cut earnings; share price has been overly punished

We conservatively cut 2024-26E earnings to reflect the higher-thanexpected expenses (especially related to the cadmium waste issue), and derive a new DCF-TP of THB18/shr. We believe the share price has been overly punished, given the loss of THB770m in market cap since the beginning of the cadmium waste issue, compared to cTHB50m in total cadmium-related expenses. BEYOND trades at undemanding valuations of 0.4x 2024E P/BV and 9x 2024E EV/EBITDA.

#### **Investment thesis**

BEYOND transformed its business focus from energy to hospitality during the Covid pandemic and is now in a strong position to benefit from Thailand's tourism recovery.

We expect Thailand's tourist arrival numbers to recover significantly in 2024, especially in the highspending segment, which should directly benefit BEYOND's luxury hotels. According to CBRE, luxury hotels accounted for 17% of the total hotel supply in Bangkok, and riverfront hotels only made up 7% as of 2022.

We expect BEYOND's earnings to rebound in 2024 and deliver strong growth over 2024-25 as its EBITDA margin improves from its high operating leverage structure. In addition, its interest expenses should gradually decline thanks to its strong cash flow and low levels of maintenance CAPEX.

# **Company profile**

BEYOND owns and operates two ultra-luxury hotels, Four Seasons Hotel Bangkok and Capella Bangkok, with 400 rooms total, situated along the Chao Phraya River.

www.boundandbeyond.co.th

#### Catalysts

Key potential growth drivers include 1) a faster OCC rampup rate following the global tourism recovery; 2) strong pentup demand, which should drive ADR; and 3) new project announcements.

## **Risks to our call**

Downside risks to our DCF-based target price include 1) extraordinary events such as political turmoil and natural disasters; 2) a higher hotel room supply, which may result in price competition; and 3) the slower-than-expected recovery of international tourist numbers.

# **RECOMMENDATION STRUCTURE**

#### **Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
