Muted 3Q24 operations expected

- We expect flat net profit growth in 3Q24, with modest loan growth due to an aggressive write-off policy.
- Asset quality remains under control and aligns with its guidance of below 2.00%.
- We maintain our HOLD call for KTC with a 2025 TP of THB44.

Overall performance and profit in 3Q24 remain relatively stable

We expect a 3Q24 net profit of THB1.86b, marking 1.7% growth q-q but remaining stable y-y. The expected NII of THB3.59b represents a minimal change both q-q and y-y, aligning with our flat loan growth estimate. We project a loan contraction of 5.3% YTD, making its 6-7% y-y growth target for 2024 seem challenging. We anticipate a slight q-q increase in the loan spread to 12.41% due to a stable cost of funds and a slight increase in loan yields. 3Q24 non-NII should remain stable q-q, driven by 1) a 10% y-y increase in spending; and 2) a higher bad debt recovery income base to THB1.0b/quarter vs an average of THB700-800m in 2023. We project 3Q24 OPEX at THB2.36b, flat q-q but rising by 5.0% y-y, in line with the increase in spending volume, with the expected CIR at 37.3%. KTC's auto title loans via the "P-Berm" brand will likely remain muted due to low market recognition, with most disbursements catering to short-term liquidity needs for debtors, leading to a high turnover rate. Our 9M24E net profit accounts for 73% of our 2024E.

NPLs remain under control with faster write-off policy

We expect KTC's 3Q24 asset quality to remain unchanged from 2Q24, with an anticipated NPL ratio of 2.00%, aligning with its 2024 target. The revised write-off policy implemented since 1Q24 has continued to manage the balance sheet quality efficiently. The prudent lending policy initiated in 2023 should improve the overall portfolio quality and lower the LGD in its ECL model. Consequently, we expect the 3Q24 credit cost to decrease slightly by 10bp q-q to 6.34%, with the coverage ratio remaining stable at 364%.

Minor revisions on 2024-26E earnings with 5.6% growth CAGR

We cut our 2024-26E earnings by 0.8-2.7% to reflect the higher credit costs due to the impact of the faster loan write-off policy, partially offset by increased debt recovery income. Additionally, we adjust our 2024 loan growth forecast to contract by 3.0% y-y (from growth of 1.9% y-y), with growth likely concentrated in 4Q24 following the seasonal effect. Consequently, we expect net profit growth at 5.6% CAGR during 2024-26, aligning with KTC's guidance of demonstrating profit growth every year.

Maintain HOLD call with 2025 TP at THB44

We roll forward our GGM-based TP to 2025 at THB44, implying a P/BV of 2.57x, assuming an LT ROE of 18.0% and a COE of 9.0%. Given the current share price, there is no upside potential, so we maintain our HOLD call.

Investment thesis

We maintain our HOLD recommendation on KTC due to:

- We expect the overall unsecured consumer finance industry to experience a certain degree of pressure on portfolios and economic stalls, and operators remains cautious on growth.
- 2) We expect KTC's 2024-26 net profit to expand at an average growth rate of 5.6%, while we estimate its loan portfolio to slightly contract by 3.0% y-y in 2024 due to the influence of a large write-off in 1Q24. We expect an average recovery at a pace of 4.5% CAGR during 2025-26.
- We maintain our HOLD call on KTC with our 2025 GGM-based TP of THB44, referencing 2.57x P/BV (LT ROE 18.0% and COE 9.0%), which currently offers no upside.

Company profile

The company provides consumer financial products in Thailand, including credit cards, personal loans, auto-title loans, and leasing products.

www.ktc.co.th

Principal activities (revenue, 1H24)

Net interest income - 56.4 %

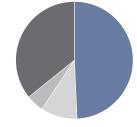

Source: Krungthai Card

Major shareholders

- Krung Thai Bank 49.3 %
- Mongkol Prakitchaiwatthana -10.1 %
- Chantana Jirattiphat 4.8 %
- Others 35.8 %

Source: Krungthai Card

Catalysts

- 1) Stronger-than-expected momentum of economic recovery and card spending;
- 2) Better-than-estimated loan growth;
- 3) Lower-than-estimated new NPL formation;
- 4) A significant acceleration in the auto title segment.

Risks to our call

Downside risks are: 1) regulatory actions to curb industry growth; 2) a higher-than-expected policy rate; and 3) deteriorating asset quality. Upside risks are: 1) better-than-estimated economic improvement; 2) stronger-than-estimated improvement in the overall asset quality; and 3) less pressure from the market yield and cost of funds.

FSSIA ESG rating

★ ★ ★ ★

Exhibit 9: FSSIA ESG score implication

71.80 /100

| Rating | Score | Implication |
|--------|---------|--|
| **** | >79-100 | Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability. |
| **** | >59-79 | A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers. |
| *** | >39-59 | Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually. |
| ** | >19-39 | Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable. |
| * | 1-19 | The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC. |

| Company | Ticker | Price | Rating | Valuation & Risks |
|-----------------------------------|--------------|------------|--------|---|
| Krungthai Card | КТС ТВ | THB 48.25 | HOLD | Downside risks are: 1) regulatory actions to curb industry growth; 2) a higher-than- expected policy rate; and 3) deteriorating asset quality. Upside risks are: 1) better-than- estimated economic improvement; 2) stronger-than-estimated improvement in the overall asset quality; and 3) less pressure from the market yield and cost of funds. |
| Aeon Thana Sinsap (Thailand | i) AEONTS TB | THB 142.00 | HOLD | Downside risks are: 1) regulatory actions to curb industry growth; 2) a higher-than- expected policy rate; and 3) deteriorating asset quality. Upside risks are: 1) better-than- estimated economic improvement; 2) stronger-than-estimated improvement in the overall asset quality; and 3) less pressure from the market yield and cost of funds. |
| Muangthai Capital | МТС ТВ | THB 49.50 | BUY | Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board. |
| Srisawad Corp | SAWAD TB | THB 41.50 | HOLD | Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board. Upside risks include 1) a faster-than-expected decline in losses on sales of repossessed cars for SCAP; and 2) an interest rate downtrend could push its interest spread. |
| Ngern Tid Lor | TIDLOR TB | THB 17.70 | HOLD | Downside risks to our GGM-based TP include 1) further weakening asset quality could potentially hit both loan yield and credit cost; and 2) tighter supervision from related regulators. Upside risks are 1) the lower-than-expected credit costs from better asset quality management and 2) the higher-than-expected loan and insurance premium growth from the positive effects of the more favorable economic situations. |
| Saksiam Leasing | SAK TB | THB 4.82 | BUY | Downside risks include 1) competition from existing and new players 2) regulatory changes by the Bank of Thailand (BoT) and 3) a slower-than-expected reduction in its cost of funds due to a shift toward more long-term loans. |
| Asia Sermkij Leasing PCL | ASK TB | THB 13.30 | HOLD | Downside risks to our GGM-derived TP include 1) an economic slowdown, especially for logistics activities and private investment; 2) deteriorating asset quality; and 3) changes in financial regulations from the Bank of Thailand. Upside risks include 1) a better-than-expected macroeconomic improvement; 2) downtrend of policy rate could reduce cost of funds and enhance interest spreads; and 3) a faster-than-expected decline in ECL expense. |
| Ratchthani Leasing | THANI TB | THB 2.12 | HOLD | Downside risks to our GGM-derived TP include 1) an economic slowdown, especially for logistics activities and private investment; 2) deteriorating asset quality; and 3) changes in financial regulations from the Bank of Thailand. Upside risks include 1) a better-than-expected macroeconomic improvement; 2) a downtrend in the policy rate could reduce cost of funds and enhance interest spreads; and 3) a faster-than-expected decline in ECL expense. |
| Bangkok Commercial Asset Mngt. | ВАМ ТВ | THB 9.20 | BUY | Downside risks to our NAV-based TP include 1) lower cash collection than estimated; 2) lower-than-expected bad debt acquisition; and 3) a slowdown in the property market. |
| JMT Network Services | JMT TB | THB 17.80 | HOLD | Downside risks to our P/BV-based TP include 1) lower cash collection from both debt management and debt tracking collection services; and 2) higher-than-expected funding costs and operating expenses. Upside risks include 1) better-than-expected purchasing power and cash collection 2) lower-than-expected operating and financing expense |
| Chayo Group | СНАУО ТВ | THB 3.70 | HOLD | Downside risks to our GGM-based TP include 1) lower-than-expected bad debt acquisition; and 2) higher-than-expected operating expenses. Upside risks include 1) better-than-expected cash collection performance and lower pressure from ECL, 2) stronger-than-expected loan growth, and 3) better cost control than expected. |

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 09-Oct-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
