**EQUITY RESEARCH - COMPANY REPORT** 

## GFPT GFPT TB

THAILAND / AGRIBUSINESS

# Passing this cycle's peak in 2024

- Although 3Q24 revenue and gross margin would remain strong, we expect 3Q24 net profit to be unexciting.
- We cut our 2025E net profit growth to -23% y-y due to declining domestic chicken prices.
- Downgrade to HOLD with a lower TP of THB12.5.

#### Expect 3Q24 revenue and gross margin to remain robust

We expect a 3Q24 net profit of THB546m (-6.3% q-q, +71% y-y). Excluding an FX loss of cTHB10m, core profit would equal THB556m (-1% q-q, +75% y-y), a good profit. However, details show that solid performance in July and August was likely the main driver, with a decline starting in September. We expect total revenue to grow by 3.5% q-q and 5% y-y, with expected chicken export volume growth to 9,200 tonnes (+2.2% q-q, +39% y-y). In addition, we anticipate raw material costs would decrease, leading to a projected increase in the gross profit margin to 15% from 14.2% in 2Q24.

#### Domestic chicken prices have started to decline

We began seeing a drop in chicken prices in September due to flooding, which continued in October, and the vegetarian festival. The prices of live chickens in 3Q24 decreased by 2.3% q-q to THB43/kg and further declined by 10% q-q in 4QTD to THB39/kg (-10% q-q). Also, chicken carcass prices have sharply decreased to THB11/kg (-24% q-q, -19% y-y), approaching its breakeven. This leads us to anticipate that GFN's profit sharing in 3Q24 would decline by 50% q-q to THB68m due to domestic chicken price losses. We expect the profit sharing from McKey to remain strong, continuing from 2Q24.

#### Passing this cycle's peak in 2024, with declining profit in 2025

Looking ahead, we expect 4Q24 net profit to weaken q-q due to falling chicken prices, as it is the low season for exports. There is a possibility that GFN's profit sharing may decrease further if domestic chicken prices remain low throughout 4Q24. Nevertheless, we have raised our 2024E net profit by 12% to THB2b (+47% y-y) but cut our 2025 profit forecast by 14.7% to THB1.6b (-23% y-y), adjusting our chicken price assumption down by 5% to THB40/kg and reducing the profit sharing estimate by 21%.

#### Downgraded to HOLD with lower TP of THB12.5

We roll forward our TP to 2025 at THB12.5, lowering our PE ratio target to 10x from the previous 12x to reflect the anticipated slowdown in 2025 profit. The new target price has limited upside and lacks catalysts to support the stock price in terms of weak profit momentum and declining chicken prices. Therefore, we downgrade our recommendation to HOLD.

#### Investment thesis

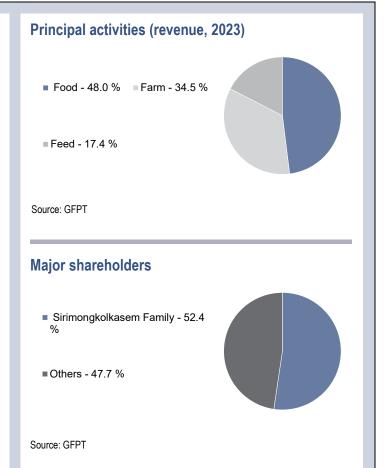

GFPT is doubling the capacity of its slaughterhouse from 150,000 to 300,000 chickens per day. It should begin operating from 2H24 onwards, partly to cope with the processing capacity expansion of its associate McKey earlier. GFPT is also preparing to expand its processing plant afterward to cope with export growth since it currently runs at a 100% utilization rate.

The situation for chicken exports in 2024 appears to be quite optimistic, supporting both the volume of exports of GFPT and its associates, such as GFN and McKey, and offsetting declines in export prices. However, we still assume a relatively conservative growth rate for our 2024-25 net profit forecast, partly because we started seeing price increases in animal feed raw materials. We would also need to monitor the trend of chicken prices.

#### Company profile

GFPT operates a vertical, fully integrated poultry business covering feed production, grandparent farms, breeder farms, broiler farms, production and distribution of chicken meat, cooked chicken products, and other chicken-related products under its own and customers' brands for both domestic and export markets. In 2022, GFPT had a chicken processing capacity of 150,000 tonnes/year and a cooked chicken product capacity of 30,000 tonnes/year.

www.gfpt.co.th

#### Catalysts

Potential catalysts for GFPT's earnings growth in 2024-25 are 1) chicken export volume growth; 2) a higher-than-expected chicken price; 3) the operation of a new slaughterhouse; and 4) lower raw material costs.

#### Risks to our call

Downside and upside risks to our P/E-based TP include 1) a slower or faster-than-expected consumption recovery; 2) a slower or faster-than-expected decrease in feed costs; 3) a stronger or weaker-than-expected THB; and 4) a minimum wage increase and/or a labour shortage.

#### **Event calendar**

#### Earnings sensitivity

- For every 1% increase in revenue, we estimate 2025 net profit to rise by 0.8%, and vice versa, all else being equal.
- For every 0.5% increase in GPM, we estimate 2025 net profit to rise by 4.1%, and vice versa, all else being equal.
- For every 0.5% increase in SG&A, we estimate 2025 net profit to fall by 3.8%, and vice versa, all else being equal.

#### Exhibit 18: FSSIA ESG score implication

53.67 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### Disclaimer for ESG scoring

ESG score	Methodolog	У				Rating				
The Dow Jones Sustainability Indices (DJSI) By S&P Global	The DJSI World applies a transparent, rules-based component selection process based on the companies' Total Sustainability Scores resulting from the annual S&P Global Corporate Sustainability Assessment (CSA). Only the top-ranked companies within each industry are selected for inclusion.					Be a member and invited to the annual S&P Global Corporate Sustainability Assessment (CSA) for DJSI. Companies with an S&P Global ESG Score of less than 45% of the S&P Global ESG Score of the highest scoring company are disqualified. The constituents of the DJSI indices are selected from the Eligible Universe.				
Sustainability Investment List (THSI) by The Stock Exchange of Thailand (SET)	THSI quantifies responsibility in Environmental and Social issues by managing business with transparency in Governance, updated annually. Candidates must pass the preemptive criteria, with two crucial conditions: 1) no irregular trading of the board members and executives; and 2) free float of >150 shareholders, and combined holding must be >15% of paid-up capital. Some key disqualifying criteria include: 1) CG score of below 70%; 2) independent directors and free float violation; 3) executives' wrongdoing related to CG, social & environmental impacts; 4) equity in negative territory; and 5) earnings in red for > 3 years in the last 5 years.					To be eligible for <b>THSI</b> inclusion, verified data must be scored at a minimum of 50% for each indicator, unless the company is a part of DJSI during the assessment year. The scoring will be fairly weighted against the nature of the relevant industry and materiality.  **SETTHSI Index** is extended from the THSI companies whose 1) market capitalization > THB5b (~USD150b); 2) free float >20%; and 3) liquidity >0.5% of paid-up capital for at least 9 out of 12 months. The SETTHSI Index is a market capitalisation-weighted index, cap 5% quarterly weight at maximum, and no cap for number of stocks.				
CG Score by Thai Institute of Directors Association (Thai IOD)	An indicator of CG strength in sustainable development, measured annually by the Thai IOD, with support from the Stock Exchange of Thailand (SET). The results are from the perspective of a third party, not an evaluation of operations.					Scores are rated in six categories: 5 for Excellent (90-100), 4 for Very Good (80-89), 3 for Good (70-79), 2 for Fair (60-69), 1 for Pass (60-69), and not rated for scores below 50. Weightings include: 1) the rights; 2) and equitable treatment of shareholders (weight 25% combined); 3) the role of stakeholders (25%); 4) disclosure & transparency (15%); and 5) board responsibilities (35%).				
AGM level By Thai Investors Association (TIA) with support from the SEC	It quantifies the extent to which shareholders' rights and equitable treatment are incorporated into business operations and information is transparent and sufficiently disclosed. All form important elements of two out of five the CG components to be evaluated annually. The assessment criteria cover AGM procedures before the meeting (45%), at the meeting date (45%), and after the meeting (10%). (The first assesses 1) advance circulation of sufficient information for voting; and 2) facilitating how voting rights can be exercised. The second assesses 1) the ease of attending meetings; 2) transparency and verifiability; and 3) openness for Q&A. The third involves the meeting minutes that should contain discussion issues, resolutions and voting results.)									
Thai CAC By Thai Private Sector Collective Action Against Corruption (CAC)	The core elements of the Checklist include corruption risk assessment, establishment of key controls, and the monitoring and developing of policies. The Certification is good for three years.  (Companies deciding to become a CAC certified member start by submitting a Declaration of Intent to kick off an 18-month deadline to submit the CAC Checklist for Certification, including risk assessment, in place of policy and control, training of managers and employees, establishment of whistleblowing channels, and communication of policies to all stakeholders.)					The document will be reviewed by a committee of nine professionals. A passed Checklist will move for granting certification by the CAC Council approvals whose members are twelve highly respected individuals in professionalism and ethical achievements.				
Morningstar Sustainalytics	based on an risk is unma	n assessment on naged. ESG Book	The ESG score identifies sustainable companies that are better positioned to outperform over the long term. The methodology considers the principle of financial materiality including information that significantly helps explain future risk-adjusted performance. Materiality is applied by over-weighting features with higher materiality and rebalancing these weights on a rolling quarterly basis.					The total ESG score is calculated as a weighted sum of the features scores using materiality-based weights. The score is scaled between 0 and 100 with higher scores indicating better performance.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 24-Oct-2024 unless otherwise stated.

#### RECOMMENDATION STRUCTURE

#### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

#### **Industry Recommendations**

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
