## Key takeaways from analyst meeting

## **Highlights**

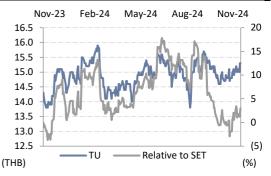

- Management guided for a positive 4Q24 outlook, with the revenue trend continuing to improve. Although it is the low season, the outlook for the ambient and pet food segments remains strong, and the frozen segment is expected to complete its business downsizing by the end of 2024. Management expects tuna prices in 2025 to remain stable or increase slightly compared to 2024, driven by improved demand. The average price of tuna in 2024 is projected to be USD1,419/tonne.
- TU also addressed a lawsuit filed by Fortress Credit Corp (Fortress), the new owner of Red Lobster since 16 September, against Thai Union North America (TUNA) for allegedly violating a limited guarantee by failing to pay Fortress USD65m. This case is currently in legal proceedings. TU believes it has met all the conditions of the agreement and will not recognize any damage provision in the financial statements until a final legal decision is made.
- The guarantee contract was established in 2022, where TUNA guaranteed a loan of USD65m for Red Lobster (RL), with conditions including 1) RL's minimum EBITDA; 2) the qualifications of RL's CEO; and 3) the qualifications of RL's CFO (information from TU).

#### Comments

- In the short term, we expect 4Q24 profit to remain stable or slightly increase q-q, supported by the positive revenue trend. Although TU has not yet disclosed its growth targets for 2025, we maintain our previous assumption of 4% y-y revenue growth in 2025, using an FX rate of THB33/USD, and expect a 2025 profit of THB5.59b (+11%).
- TU has entered a significant organizational restructuring phase that will take about 3 years. This restructuring aims to improve efficiency, reduce redundancy, and create sustainable growth in the future. There may be a downside risk to our 2025 profit estimate due to transformation costs, which are already starting to be recognized in 3Q24, amounting to about 0.6% of revenue, or THB234m.
- Management is not concerned about Donald Trump's tax policies, having already navigated the trade war period. If import taxes on China rise, it could be positive for TU, as US customers are likely to shift their purchasing to products from Thailand. For context, during Trump's presidency (2017-21), TU's US revenue grew by 3.6% CAGR, higher than the overall revenue growth of 1.1% CAGR, while Europe and Japan saw a decline (-1.4% and -3.4% CAGR).
- Regarding the RL lawsuit, it has not caused any immediate harm, and TU is in the process of legal defense to protect its interests. However, we view this issue as a pressure on the stock price moving forward. The USD65m value is equivalent to cTHB0.5/shr.

## Exhibit 2: FSSIA ESG score implication

68.12 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 06-Nov-2024 unless otherwise stated.

## RECOMMENDATION STRUCTURE

## Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

## **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
