3Q24 results at first glance

CPAXT reported a 3Q24 core profit of THB2.41b (+11% q-q, +40% y-y), beating our estimate by 9% due to one-time amalgamation expenses and an FX loss and BBG's consensus by 15%.

Highlights

- CPAXT reported a 3Q24 net profit of THB1.95b (-10% q-q, +16% yy), aligning with our estimate of THB1.91b. Excluding two one-time items— amalgamation-related costs and an FX loss (after-tax THB458m vs our estimate of THB290m)—CPAXT posted a core profit of THB2.41b, up 11% due to a GPM increase of 30bps q-q and 40% y-y due to a 4% increase in total sales, GPM expansion of 70bps y-y, and stable SG&A-to-revenue of 13.6% y-y.
- Total revenue rose 4% y-y, primarily from higher sales, with positive SSSG across all units: Makro at +1.5%, Lotus's Thailand at +2.4%, and Lotus's Malaysia at +1.7%, driven by fresh food products, offstore sales (Omni Channel), and Makro's store expansion.
- Overall GPM was 14.4% (+30bps q-q, +70bps y-y), with growth in all units due to enhanced fresh food product variety, increased sales of high-margin products, and improved inventory management of fresh food, reducing wastage. SG&A-to-revenue stood at 14% (+40bps yy). Excluding the two extra items, it equaled 13.6%, remaining stable y-y.

Outlook

- Core profit for 9M24 accounts for 68% of our 2024 forecast, with our estimate for core profit in 2024 maintained at THB10.4b (+19% y-y). Our preliminary expectations are that 4Q24 core profit would see q-q and y-y growth, driven by revenue during a high season of Makro and Lotus's. Additionally, Makro and Lotus's GPM should gradually improve, and Makro's expenses should decrease as Omni Channel sales continue to grow, reflecting the benefits of economies of scale.
- SSSG in October should maintain positive growth of around 1-3% for both wholesale and retail, with growth higher than 3Q24, mainly supported by the fresh food segment.

Exhibit 12: FSSIA ESG score implication

59.46 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
