## 3Q24 results at first glance

PR9 reported a surprising 3Q24 core profit of THB208m (+49% y-y), beating our estimate by 17%

## **Highlights**

- PR9 reported a 3Q24 core profit of THB208m (+49% y-y, +50% q-q), beating our estimate by 17% mainly due to higher-than-expected international patient revenue and a new record high EBITDA margin of 27% (excluding Covid pandemic period).
- Revenue jumped 15% y-y in 3Q24. Thai patient revenue grew by 11% y-y, while international patient revenue jumped by 42% y-y, led by higher patient revenue from the Middle East and CLMV segments.
- The revenue contribution from Thai patients made up an 82% proportion. Meanwhile, international patient revenue made up an 18% proportion a record high compared to 14-15% previously.
- SG&A increased by 7% y-y due to higher marketing expenses, employee costs, and utilities expenses. COGS increased by 9% y-y following the revenue increase. As a result, the 3Q24 EBITDA margin hit a record high at 27% (vs 23% in 3Q23).
- 9M24 core profit grew by 37% y-y to THB506m and accounted for 75% of our 2024 core profit forecast of THB671m.

#### **Outlook and valuation**

- We expect the strong earnings growth momentum to continue in 4Q24, driven by strong international patient revenue and the high season for check-up services.
- We see a potential upside to our 2024-25 core profit forecast due to the strong international patient revenue contribution (18% in 3Q24 vs our forecast of 16% in 2024).
- PR9 announced an interim dividend of THB0.15/shr, implying a dividend yield of 0.6%.
- PR9 is trading at an attractive valuation of 25x 2025E P/E, with a potential upside on international patient revenue.

## Exhibit 4: FSSIA ESG score implication

54.08 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

#### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 08-Nov-2024 unless otherwise stated.

## RECOMMENDATION STRUCTURE

## Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

## **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
