3Q24 results at first glance

Temporary profit slowdown driven by the power unit

Highlights

- WHA reported a net profit of THB459.2m in 3Q24. Excluding the FX impact and other non-recurring items, the core profit was THB757m (-41.2% q-q, +21.6% y-y), lower than our expectation by 18% and the Bloomberg consensus by 8%.
- The lower-than-expected profit in 3Q24 was mainly due to the impact of the Gheco-One power plant, which was affected by both the appreciation of the Thai baht and the increased cost of coal.
- The other business segments performed as expected. The core profit decline q-q was primarily due to a high base in 2Q24 from land transfers. In 3Q24, land transfers amounted to 370 rai (+28.0% y-y), with 171 rai being land owned by WHA (recognized as revenue from sales), resulting in a -30.7% q-q and -24.1% y-y decrease in revenue from land sales for the quarter. The remaining 199 rai were from land owned by its JV IER (recognized as a share of profit).
- As a result, the total land transfer for 9M24 reached 1,571 rai, up 56.0% y-y, which represents 70% of our full-year estimate.
- Although the 3Q24 core profit slowed q-q, the core profit for 9M24 showed strong growth (+69.6% y-y), driven by revenue growth across all business segments and an overall improvement in the gross margin.

Outlook

- We expect WHA's profit outlook to recover strongly in 4Q24, supported by a land backlog of 1,250 rai awaiting transfer, the recovery of the Gheco-One power plant, and a gain from the sale of factories into WHAIR.
- The core profit in 9M24 accounts for 70.4% of our full-year estimate. We maintain our 2024-25 core profit estimates at record highs of THB4.8b (+9.4% y-y) and THB5.3b (+10.1% y-y), or at a CAGR of 8.7% during 2024-26.
- Recently, the stock price has risen rapidly due to news of land sales to Google for the construction of a data center, as well as the results of the US presidential election, which could lead to another wave of production relocation. The outlook for WHA remains bright, thus we maintain our BUY rating with a TP of THB6.40, based on a 2025E P/E of 18x (+0.5SD of its five-year historical average).

WHA Corporation PCL (WHA TB)

Exhibit 4: FSSIA ESG score implication

69.86 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 08-Nov-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
