3Q24 results at first glance

Resilient profit despite lower residential revenue

Highlights

- CPN reported a core profit of THB4.1b in 3Q24 (-1.9% q-q, -0.9% y-y), aligning with both our and the consensus expectations. The slight slowdown in core profit this quarter was mainly due to revenue from the residential business, which dropped by 49.3% q-q and 49.1% y-y, accounting for only 8% of total revenue, down from 13% in 1H24. This decline was due to most condos being transferred starting in 2H23, with full transfers completed this quarter.
- On the other hand, revenue from other businesses showed strong growth. Revenue growth from the shopping center business (86% of total revenue) continued, driven by additional NLA from new shopping centers opened since 4Q23 (Central Westville, Central Nakhon Sawan, and Central Nakhon Pathom).
- Revenue from food courts decreased q-q due to seasonality but still grew significantly y-y, driven by a higher number of food courts at shopping centers. Revenue from hotels grew both q-q and y-y, contrary to seasonality, due to improved RevPar across all hotels.
- Although revenue from some businesses declined, the blended gross profit margin reached a new impressive high of 56.8%. This was primarily driven by the shopping center business, which continued to benefit from lower electricity tariffs than last year. This helped offset depreciation and interest expenses related to the Central Pinklao lease extension and the residential business, where transfers of highfloor units contributed to the improvement.

Outlook

- Revenue from the residential business reached THB4.3b in 9M24. We believe there is a high chance it will fall short of our target of THB7b for 2024. However, the company currently has a backlog of THB5.7b (about 90% in condos), of which it expects customers to transfer 20% in 4Q24. Together with revenue from low-rise transfers, we estimate that residential revenue for 2024 could miss our target by no more than 10%. Assuming a net margin of 10-12%, this could impact our 2024 profit estimate by less than 2%.
- CPN's core profit for 9M24 was THB12.5b, accounting for 74% of our full-year forecast. Given that 4Q24 is the high season for its core businesses, we anticipate only a slight downside of 1-2% to our fullyear projection.
- We maintain our BUY call and TP of THB83 (DCF, 7.4% WACC, 2% LTG).

Central Pattana PCL (CPN TB)

81.38 /100

Exhibit 4: FSSIA ESG score implication

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
$\star \star \star$	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 14-Nov-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months. **Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months. **Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
